[00:00:01] And I don't know how reliable this information is. But I can't rule out that there could be some kind of provocation to impose martial law. How they're going to punish that is up to me as well. The second border we saw even before the war started where the border crossing point is this could be some kind of line and then the president will declare martial law. For me there are no illusions about this. It will be quickly approved and we will try just an offensive. The internal troops too, not only wars on the territory of Ukraine but also on the territory of Russia as martial law is a very horrible bloody regime. Thank you very much for coming on the air, that was lawyer Anastasia Burlakova. Numerous rallies in support of Vladimir Putin, that is, in support of the war in Ukraine, took place in Yaroslavl. It was organized by the All-Russian People's Front. This organization is fully controlled by the Kremlin. Public activists carry out direct instructions from the presidential administration, in particular, they are often responsible for the attendance of state employees at pro-government rallies.

[00:01:22] By the way, today's rally and this time unity and notes from the vice president of the Russian Federation. In our country, those who are defending it who are defending the rally for Russia for a peace that will no longer be built will be able to discuss. The next question is how. This is a difficult time when our soldiers. Relations with the bandera's on the territory of Ukraine. And it is very important that they understand that these hopes. And the economic way to travel. Russia to compare who. I ask my colleagues to support that you had the opportunity to give your

[00:02:48] Phones and you can open just plain cameras to display and there you will see a link to it click and immediately get to the telegram channel of the present why it is important because in particular in Russia now our site is blocked as well as many other independent media that were still in Russia that broadcast in Russian language.

[00:03:11] So it's very important that we stay in touch with you and that you have access to independent information and so on by the NTV Channel staff for now. The Russian general prosecutor's office took him there from the petition against the war in Ukraine. Ponomarev didn't indicate an agent status there, which he disagrees with.

[00:03:36] By the way, the petition itself has already been signed by almost 1 million 200,000 people and here at the time of the scuffle near the prosecutor's office.

[00:03:57] Я. If you what and now if I get a chance at who. I got hit and man I hit myself. Vorobiev well I hope against our guys didn't get off. Not all of them.

[00:05:19] You me in the sense of a provocateur I am the voice of the people the voice of the people of Russia. I am a man who is doing his mission, if you can put it that way. The man got it all figured out not the goal and why spoil the property. This. And data on Chernihiv state

emergency service informs as a result of Russian air strikes on Chernihiv today killed 28 people injured 18. At the same time, rescuers.

[00:06:15] Still continuing their work and promise that the number of casualties and victims

[00:06:20] could increase. Today, air strikes again today, they hit the center of the city and the Yermakova district. The largest market in eastern Europe is located there. There was a fire in a warehouse and these are the shots. A good neighborhood is Shevchenko Park.

[00:06:42] Now there. Yes it is.

[00:06:58] But it's a bummer now. That's where it's there to the left. Oh the warehouse is on fire. Academician Pavlova. People from neighboring houses something pops up from the street in robes. The mayor of Kharkiv in one of the shelters and told residents how the city will distribute medicine to those in need. These are people.

[00:07:56] People are afraid to go out to work why shooting or rockets or planes or machine guns.

[00:08:06] So the way I decided to do now I'm creating completely. It's not people's fault look scared.

[00:08:14] That there shooting can save lives.

[00:08:20] We're taking medication now we're handing out in hospitals polyclinics making announcements. A person needs something if they need it.

[00:08:30] Come and get it indoors let's hope those barbarians aren't enough barbarians.

[00:08:37] Generally there's no heart and soul there if you speak for all they've done to us. But in the hospital, even by all canons war is not war hospitals have burned their efforts have gone to the airwaves now a local journalist from Kharkov joins us on the phone. I salute you, hello. I would like to know what's going on in Kharkiv right now, what kind of attacks it has been subjected to today. I'm going to correct you a little bit, I heard on the air the first video we shot today's shelling, where the person is filming mentions that in Shevchenko's Garden, this is yesterday's arrival of the morning by the National Police and the National Security Service when it hit the building of Karazin University economics fact all the most today but in fact it is not calm and now outside the window Mohamed morning there was only a lull but about ten words we heard loud noises and from about 15 kiev none of today's facilities that came under fire is noise control showed these footage. The largest market of Ukraine and not only Ukraine in the region. This is the outskirts of the city's largest bedroom community as a result of shelling about 40 houses zarya. Rescuers do not have time to count. And this figure is so approximate and by experience only tomorrow will know the number of victims how many people under the rubble how many people were affected by the fires that started after the shelling. We heard planes with

them today from the immediate suburbs. The guys are warning us that samoilov is flying to kharkov and indeed through the example we heard the head and before the explosion.

[00:00:00] [00:00:00] [00:00:00] [00:00:00] The guys warn us that Samoilov is coming to Kharkov, and indeed through the example we heard the head before the explosion.

[00:00:00] Korotych airfield near Kharkov and there. The airline does not see oak in the summer every year for many years in a row hold big festivals thousands of Kharkov citizens gathered there to watch the flights. And then today it was destroyed. In the districts of the region the head of the idiotic district state administration reported that they could raisins and in several hundred more in just one should have seen the dead civilians and two of them were children. Around twelve o'clock this afternoon.

[00:00:40] The city was bombed which borders the Donetsk region.

[00:00:49] And the numbers that were announced this morning on yesterday's shelling just for March 2 as a result of the massive shelling of Kharkiv raisin and two all 34 civilians killed almost 300 wounded this just in one day. And the figures are not final for their sources that modern civilian cars are still standing on the highway near deaf yar. Civilian cars and picking up the dead are not allowed by the occupiers because Russian troops are standing there. People continue to evacuate. According to the military-civilian administration only

[00:01:36] yesterday and only centralized 23 thousand people left. But in Donetsk. Leaving in luxury

[00:01:48] Cars of those who operate occupy some boutiques and cars today from Kharkov there are trains as far as Poltava. And there's a big logistics center for resettlement and aid. But it is extremely difficult to get to the train station. People get there by cab under fire. But I see that people somehow find cab drivers who agree to go. The amount can exceed, for example, a thousand hryvnias. As I understand it, a non-standard trip from this area to the train station may cost somewhere around 120 hryvnia.

[00:02:31] Here I saw today that people were getting up to a thousand. Now poland and ssr have already become such a car the question according to.

[00:02:44] Kharkiv has begun to receive humanitarian aid from other regions it will be given out at post offices these are commercial carriers popular in Ukraine and they have joined to help the centralized military civil administration has published today addresses in different areas of the city where it will be possible to receive humanitarian aid. It is 60 cars and 35 vans. They are basically checking that the grouping is also occupied. This morning, the mayor published two pictures where talking to the occupiers

[00:03:22] He agreed to cooperate with.

[00:03:31] Will cooperate. Today, the residents of Blagoveshchensk. Photos and video from there. How Russian soldiers move around the city. How their equipment is being dealt with. I was told that they set up roadblocks there. The Russians search them, but they also let them through if there are no questions. In the southern part spoke about the medicines, but nevertheless I cannot help asking, because it is very important the mayor of Kharkiv, whom we showed, said that the medicines will still be distributed as providers are afraid to go to work, can you tell a little more about it. Understanding of how their actions. And medication is not yet understood. I would very much like to know how it will be run but there is no answer yet. I see, thank you very much it was a journalist from Kharkiv talking about the situation in the city and the new shelling. Energor Dmitriy Orlov reported about the approach of the Russian army. According to him, more than a hundred pieces of heavy equipment are moving towards the city. The Russian military shelled the roadblock.

[00:04:51] And are using weapons against civilians. The mayor urged residents to stay indoors and not use elevators and move away from windows.

[00:05:00] This is what's happening in the city. He was harshly critical of the question even put to him. Moreover, Olga Romanova recalled that yesterday the residents and employees of Zaporizhzhya NPP did not let the Russian military to the station, they blocked the road. This is how the roadblock was set up by the residents at the entrance to the city. Glory to the heroes. The people massively but massively gathered to discuss their rights so talk. According to Mayor Dmitry Orlov the fight at the roadblock at the entrance to the city continues. Fresh eyewitness footage. According to preliminary information, several houses were damaged in the shelling on the new boulevard and youth street and a shell hit the school number two. It is currently being specified whether there were any wounded. The meeting of the manager of the International Atomic Energy Agency today adopted a resolution condemning the Russian military operation on the territory of Ukraine. Magate called on the parties to ensure the safety of Ukrainian nuclear power plants. The situation in Ukraine is unprecedented for the first time a military conflict is taking place on the territory of the country with large nuclear facilities. This was stated by the director general of the agency, Raphael Rossi. He warned that any incident would have serious consequences not only for the people of Ukraine. On the prospects of the use of nuclear weapons and the consequences of the very same, the director of research at the think tank and head of the Stockholm International Peace Institute, Oles Doniy. I think it's very hard for us to read the real meaning of the decisions to halt nuclear weapons on alert two whole weeks ago I would say that this is just rhetoric not to take it seriously and that what has happened in the last two weeks and not the invasion and use of this extraordinary force against cities and residential areas in Ukraine makes you wonder if there is still any compliance.

websdr\_recording\_2022-03-03T17 00 54Z\_7061.0kHz.wav

[00:00:00] Nato's reluctance to get involved in a total war in Europe

[00:00:05] And nato in moscow matters where the weapons are located and almost none

[00:00:12] The significance of the detail is no more than 2,000 warheads deployed operationally. And that's enough to do completely unprecedented damage on a global scale.

[00:00:21] And that's beyond what you can imagine at

[00:00:24] We're getting a call from Moscow. Our main topic is in the area of events that are likely to spread to neighboring countries. Consequently, this could be seen as an attack on Nato countries. Therefore it is extremely dangerous for Russia to threaten this. What we have to do now is let the Russian people know that we are going to use nuclear weapons against Russia and that any attack from Russia will be met with retaliation first. Last week, the Russian

[00:01:14] The army took control of the nuclear power plant in Chernobyl. On March 1, Russia informed the world that its armed forces have taken control of the area around Ukraine's Zaporozhye nuclear power plant in Ukraine, the largest nuclear power plant with 6

[00:01:29] Of the 15 nuclear power reactors operating in Ukraine.

[00:01:34] Risks associated with conducting combat operations outside the immediate vicinity of nuclear power plants earlier in our broadcast, Ukrainian Energy Minister Volodymyr Glushchenko said.

[00:01:47] As of today, missiles are being fired with tourist missiles. You understand that the risk of a missile hit or not with me here already I honestly know after what's going on I don't know what to think anymore. And a nuclear power plant. Plus the most important thing is that the geography of nuclear generation in Ukraine covers almost the entire country. That is, there are two power plants in Ukraine and one in southern Ukraine. Three blocks and Zaporizhzhya NPP, too, as you were rightly told, has six blocks. So in fact if we talk about what to close there. It is a combination of some one. This does not solve the question of those missiles that today fall in the Ivano-Frankivsk region or fall in other regions. So it's a very serious issue and in principle we're very much counting on the fact that it's very important to connect Ukraine with security and Ukraine has always met its obligations and we've always taken it very seriously. We've certainly lived through the Chernobyl disaster and we know what nuclear safety is and what the consequences might be. So it's a good thing to call for specific actions because I don't want it to turn out that actions will be taken after some kind of tragedy happens.

[00:03:42] Now we have footage from the village of Rodzianko in the Kiev region, let's look at what's left of the city after the bombing by the Russian army itself, but anyway, 200 people were evacuated from the village according to the latest figures who had been in basements for two days because of the shelling by the Russian army. This was reported today by the State Emergency Service of Ukraine. To quote the message in the Kiev region rescuers Pushkin district together with volunteers evacuated

[00:04:20] More than 200 people.

[00:04:26] Now I want to show you a photo published by Zaporizhzhya regional military administration. From the village of Vasilievka there, Russian troops shelled a hospital, three people were killed and four wounded. These attacks took place on March 1 and 2. In the photos appeared only today. Now in Makeyevka reported regional administration problems with water and electricity supply and also heating. The staff of this destroyed hospital continues to provide medical care to the population. The administration of the Zaporozhye region states the actions of the Russian occupation troops are a direct violation of the Hague and Geneva Conventions. Without light, water and heating as well. Mariupol is a city with access to the sea in the Donetsk region. According to local authorities, 200 people in the city have been wounded since the start of the invasion. The shells hit high-rise residential buildings as well. Authorities say wounded women and children are being prevented from leaving the city and people are trapped there. Donetsk police are reporting seven deaths in the past 24 hours alone. The police published a video sent to them by locals. Lee war. This. Here's a look at this eastern. 21 branch of the new post office next door a direct hit in the Kiev market bookstore now we'll show a direct hit also a pipe format

[00:06:52] So possession is his whole plan. Look how many repairs have been made direct hit. Look at what's happening on the roads lying down. The wires are blown.

[00:07:07] Central district. Look at the store, there's not a living whole thing either.

[00:07:17] Ukraine's aid to the Ukrainian army keeps coming in from everywhere and right now I see a post by the minister of digital transformation, Mikhail Fedorov, on social media.

[00:07:26] Ukrainians have raised 80 million hryvnias for the army through a special

[00:07:30] The global aid application in strong currency for Ukraine was almost 55 million

[00:07:37] Dollars. Such data was once again highlighted by the minister

[00:07:41] digital transformation mikhail fedorov. French customs arrested another cargo ship. Authorities suspect it has Russian owners, although the Arabian dry cargo ship was flying the flag of Panama and will now check to see if the vessel violated the restrictions imposed by the European Union and the United States against Russia. Last week, another man was arrested in France carrying a car. Washington linked him to one of the Russians on the sanctions list after the invasion of Ukraine. Today it became known that the French authorities confiscated the Amur Beast yacht, which belongs to the head of Rosneft, Igor Sechin. It used to be called Princess Olga and Sechin's ex-wife used to spend time on it. In addition, according to Forbes, the yacht of billionaire Alisher Usmanov worth about \$600 million was confiscated in Hamburg. The Verkhovna Rada of Ukraine today passed a bill on the compulsory seizure of Russian property in Ukraine. Verkhovna Rada deputy alexander babakov posted

[00:08:51] Video from the Ukrainian parliamentroom and we can on it.

[00:09:05] But also we're all brothers. It's a pity that. So. Miller denied rumors of a possible.

[00:09:57] Just in the past year, the deputy chairman of the Mejlis of the Crimean Tatar people of Ukraine joins our airwaves by phone hello.

[00:10:10] Hello.

[00:10:11] I'd like to ask you. It's clear that now there is such unity among MPs of the Verkhovna Rada from different factions and quite a lot of laws have been passed today, as well. First of all, how did you manage to get so many deputies together and what do you think are the most important laws that have been passed now?

[00:10:30] First of all, there were some serious doubts that the other factions would not gather. Our faction was practically in full strength, but it was present in quite a weighty way and there was such unity in the hall, I would say, that it was taken into account by those actions of our army and people in Ukraine. There are people in almost every village standing guard over their administrative units and if there is one attitude that is very inspiring that there is no doubt that such a terrorist enemy is coming who has directed all his aggression against the civilian population, no one has doubts about it. This unity of everybody, the army and the parliament and the government, but these last 4 or 5 days we feel very strongly as my colleagues have noticed today that Ukraine is associated with a mother and when the children at home are in danger, the defense and the answer is so swift and ruthless. This is what we are seeing everywhere today. I went to checkpoints with my colleagues and I saw what yesterday's peaceful people were grabbing. Today they are standing with a clear for themselves and understanding of their role as citizens of our state and it is very much demonstrated in the battle when today a fictitious enemy with its new equipment with its demoralized patriots as it was presented to us to the world imagined by this terrorist number one Putin today in front of everyone's eyes they are disgracefully leaving the convoy and their equipment and surrendering and in general and somehow those who died in the war during this terrorist campaign are tied to Putin they are not even buried burned they are left lying in the field lying in a ditch.

[00:13:46] So I don't think everyone saw what we passed in parliament today were the necessary laws that will already begin to be put into practice today such as the election law. It eliminated these nuances of the criminal code, which were not sufficient for the application of clear actions on people who by their actions contribute to this in our territory. There are other laws on weapons that in general the entire country is now armed and everyone has clearly understood that people take up arms to defend themselves from the enemy and not to have it as a tool for self-realization. For example, one of the points where we adopted an appeal to the world is that they fulfill their role not only in support, but also in such an area as the protection of the sky. So all that's needed is for us to have a number of other laws what's needed today to apply and what's just an urgent situation that's dictated by what's dictated by the goals of today's state of affairs.

[00:15:44] And can you also say such a law on the nationalization of Russian property in Ukraine. Is it clear by now about how much can it be an expression equivalent to some amount or maybe it's some very significant objects that everyone knows everyone understands what we're talking about.

[00:16:05] This list is available and in general I think it's kind of a consequence of the logical action of our state. Following our partners who at the beginning of their programme today showed how this looted property on blood

[00:16:30] Innocent people are being killed by this Russian state

[00:16:36] And basically

[00:16:39] Used by Russia for Russians

[00:16:44] And today it's all confiscated man arrests temporarily we have enough of these objects on the territory of Ukraine as well. And it's all very logical.

[00:17:03] Do you believe in the negotiation process. Now while you and I were talking as I understand the negotiations are going on, what do you think needs to be addressed in these negotiations right now, what is the first thing that needs to be done to achieve.

[00:17:18] But I think that all of us understand both the authorities of Ukraine and the society of Ukraine and ours in general they understand that with those conditions with which Russia enters the so-called negotiations there can be no agreements whatsoever. In addition to the recognition of administrative territories temporarily occupied by the same terrorists from the side of Russia, this means incomprehensible changes in the political structure of Ukraine, I would say. Well we all understand that this has not been fulfilled but we for our part are trying to show that despite the conditions in which

[00:18:19] Moscow thank you very much. We now have an urgent speech by Vladimir Putin I'd like to listen to it live to discuss thank you very much.

[00:18:27] Our people Russian soldiers and officers. What a government official.

[00:18:43] Even after being wounded, soldiers and officers remain in the ranks, sacrificing themselves

[00:18:49] With their lives to save their comrades and civilians though wearing soldiers and militia of Donbass take really

[00:19:03] Could. I will note the personnel of the marine brigade operating in the Donetsk direction under the command of Colonel Boris Nemtsov. The realization of the military power broke through the defenses that the nationalists were strengthening and the defense

[00:19:26] For almost eight years. Tank platoon commander Guards Lieutenant Victor Sokolov during the battle of February 4 5 in the area of officials commander

[00:19:43] Company 160 of the third tank regiment captain alexey levkin encountered units of nationalists numbered 15 tanks bmp attacked with his soldiers enemy destroyed all these tanks

[00:20:07] Task without. I as a senior lieutenant Magomed Magomedov the title of Hero of Russia unfortunately posthumously.

[00:20:26] In my opinion he confidently commanded his fighters as a real commander takes his subordinates. I was seriously wounded and fought to the last man and blew up

[00:20:41] grenade the fighters around him. He went to such a step because he. Application with the Nazis who bully the prisoners and brutally kill them.

[00:20:57] I am a Russian man. Some people say that I have Ivan da Marya in my family. But when I see a prince of such heroism as young Magomed Magomedov, a native of Dagestan of our other warriors I feel like saying

[00:21:18] I am a Dagestanian I am a Chechen I am an Ingush Russian ploughman. More than three hundred national groups and ethnic

[00:21:29] Groups just can't sit at home. I'm proud to be part of this world part of a mighty strong multinational people. Messi I will never give up my conviction that Russians and Ukrainians are one people. Even despite the fact that some of the inhabitants of Ukraine spoke a lot of neo-Nazi nationalist propaganda and some consciously of course went the way of the Banderites and Nazi henchmen who fought on the side of Hitler during the Great Patriotic War. And the fact that we're at war with Nazis shows that there are nationalist and

[00:22:18] Nazi formations and there are foreign mercenaries among them including those from the Middle East are covering up civilians as I said before that. Many. And. Workers of foreign nationals, including students who were training for more than a day detained at the railway station in Kharkiv 179 citizens of Serbia, mostly students. Most of them are still being detained, including 576 people. Our neighbors who tried to breathe the air russia will repeat the fate of Soviet Union foreigners and. Holding hostage collections and documents a little later. So all of this is happening, our soldiers are looking at everyone without exception to ensure that there are no foreign nationals here. It was possible to go to a safe place. Going back by plane can't do that. But now everything. Go to their authorities, and already in turn will have to go to the Ukrainian Foreign Ministry. In fact, they are just abandoning. Even worse let them address their conscience and their population. As I said before.

[00:24:43] Instead of human shields our military covers such facts when in the cities of the people's republics of Donbass in Severodonetsk frequent deaths of apartment buildings are

dispersed in order to live in the lower floors. The right cause is exposed heavy equipment tanks are driven on the roofs on the upper floors machine guns are placed snipers. Only the Nazis fought so verbally treated civilians. Soviet troops fought them including liberating the territory of Ukraine.

[00:25:26] I repeat our soldiers and officers did not allow civilian casualties.

[00:25:32] And unfortunately disagree with us. It is our duty to support the families of our fallen.

[00:25:41] Who fought. First. Monthly monetary compensation I believe should be filled to every family of the fallen servicemen of the Ministry of Defense of the military and other participating personnel in the amount of 5 million rubles

[00:26:25] And servicemen wounded and Russian operation and also receive appropriate payments meaning insurance

[00:26:33] And a lump sum benefit for injuries and contusions. If servicemen serving under the contract after

[00:26:41] Wounded conscripts in Ukraine he will receive a lump sum benefit of

[00:26:46] 2 million 960. The chairman of the Russian government also believes that it is necessary to provide for additional servicemen of the Ministry of Defense

[00:27:04] Servicemen and staff

[00:27:06] Other security agencies involved in the operation and wounded in

[00:27:12] In the course of its setting. Right now on Ukrainian territory our soldiers and officers are fighting for Russia for a peaceful life for the citizens of Donbass in Ukraine so that no Russia created by the west for years right near our borders would threaten us, including nuclear

[00:27:35] Weapons as it has been for the last people. Don't you regret that it's over. And the development of this education of our family and friends. Please honor the memory of our warriors

[00:27:57] Those who died in the performance of their military duty during the special

[00:28:00] Military operation in Ukraine.

[00:28:07] So Vladimir Putin has spoken out about the war in Ukraine that Russia started I'll just draw your attention to some points now. Keeping people at the train station for more than 24 hours. First of all, people are standing at the station for three days and they cannot leave. We are not talking about foreigners here.

Websdr\_recording\_2022-03-03T17 24 59Z\_7061.0kHz.wav

[00:00:00] Well how did we see one of the foreigners at one of the train stations pull out a knife into the opening of the carriage and not let Ukrainians in and only let foreign students into the carriage. Apparently this is what Vladimir Putin is talking about because it seems to him that it is the students and he also talks about weapons being placed in residential areas, but according to the footage that we get from the news agencies from our correspondents when Russian missiles fly into residential areas of course no actual weapons there as Putin says they are placed for human shields. You just can't see it in these shots. I'm being prompted now that he should be speaking any minute now. Defence Minister Sergei Shoigu, if he does speak, of course, we'll show you too. And that is probably where we will finish with Vladimir Putin and what he said, but now we will continue our special broadcast while news agencies were broadcasting a recording of Vladimir Putin's address to the Ukrainian military, Ukrainian military correspondent Roman Bochkala reported on the Ukrainian armed forces unit that broke up the Kadyrov convoy. Good to you from Ukraine. Here we are, here they are, the conquerors came to our land, they are throwing themselves at the equipment and. There will be skin or say we will declare our land. Glory to the Ukrainians to the heroes. So our Cossacks and Cossacks chase the invaders and throw tanks. The borders of Ukraine give immediate food to the thieves such people are given a real fight back. Technics burned saw Ural with ammunition under the hail. In Chelyabinsk today passed the funeral of a soldier killed in Ukraine Konstantin Luzhkov was 36 he was left with three children. Luzhkov went to Ukraine as a contract serviceman he died on February 24, 2022 in one of the first battles after Russian President Vladimir Putin announced the start of the so-called military special operations. In the school through. Lviv military garrison I came today to support almost

[00:02:41] Good old responsive and cheerful but even more kind word as

[00:02:55] I was written

[00:02:57] Relatives and friends. Konstantin has a brother.

[00:03:03] twin Alexei who is also in the territory of Ukraine there is no communication with him right now according to the Russian defense ministry 498 servicemen have been killed in Ukraine so far this figure was first announced the day before. Earlier today, French President Emmanuel Macron held telephone talks with Vladimir Putin. The conversation lasted for an hour and a half. At the end of the conversation, the Élysée Palace said that the worst is yet to come. This was reported by French television. Putin demonstrated his determination to continue the offensive if Ukraine does not accept his terms. Let me remind you initially Russia demands the demilitarization of the country and also during the talks Putin said that the Russian operation is developing according to the plan of Moscow. It is reported that after this conversation, Makri called President Vladimir Zelensky. I am alive, but I remind you that the negotiations between the Russian and Ukrainian sides are continuing right now, before they began, President Zelensky's adviser Mikhail Podar said the main demands of the Ukrainian side are an immediate

cease-fire and humanitarian corridors to get civilians out of the villages and towns destroyed and constantly shelled. The actual footage from the beginning of the meeting. Let's see it again. I wanted to. Let's. Of course, joining us on the air from Kiev is journalist Roman Dry. Hi. You were at Vladimir Zelensky's press conference today, tell us about the most important thing he said. Hi, Igor. The press conference actually lasted an hour and a half. There were a lot of important moments, a lot of emotions on the part of Vladimir Zelensky. Let's start from the beginning. The president began without any questions with an address actually to the mothers of Russian soldiers. He urged them that if they know that their son is in captivity let them come to Ukraine. We are determined to return their children to them immediately. He also talked about how he would like the bodies of fallen Russian soldiers to be as well.

[00:05:45] They also came for him and could have taken them away but he also explained that according to his information the Russian army did not come to Ukraine with special equipment to burn bodies that there might not even be anything left of them and the Russian leadership of the Russian army it doesn't even count its losses in Ukraine. And he urged that those bodies that Ukraine was taking away it was ready to hand over so that they could be properly committed to the ground. And he also said that we have prisoners that we are treating and in Russia instead of treating our soldiers they are treating Russian soldiers but it's also to bring them back home. Two very important aspects that Zelensky is talking about today are the open skies over Ukraine and the negotiation process that is going on in Belarus. Let's talk about the situation in Belarus, I directly asked Zelensky what our questions are, what are the requirements in this law for the Russian side. On the points 1 2 3 respectively. What does the Russian side want? Maybe there are some ultimatum demands. To what the president says that these negotiations are not about demands and ultimatums because in his words the Russian side, which voices any demands or questions about the transfer of the recognition of Crimea on the recognition of the LNR and DNR, it is in children's questions knowledge Ukrainian answers to these questions to put it mildly for the Russians are important. The process itself, not the result of these negotiations. If it is possible let's listen to a part of the speech of the stars the answer to my question about the negotiations in Belarus. In general the story is not about the conditions. The story is about the fact that there is a scheme of questions.

[00:07:46] We're ready to talk about all these topics as I said about the Russian side has long formulated answers to their own questions. I just think there's no point in them asking questions if you already have the answer. And that, it seems to me, is the difficulty of this dialogue so far because there are things in which you need to find some kind of compromise so people don't die. But there are things where there are no compromises. Just because you can't just walk away. Yes this is your country. Ukraine is part of Russia but it's impossible to be a part of Russia. Why suggest that. But I think this is the kind of thing they are squeamish about and it flies. The word is not a sparrow, but there are quite a lot of these frankly birds now. So I think there Japanese I don't relate to the wording there. I think that these wording is fair since that side is willing to destroy for the sake of these issues I mean so they are fair for our dialogue. Because I want to stop the war. It is a question of wording. It is a question of balancing our agreements and wishes everything in life in general depends on desire. This is the main one. What. If Russia already knows the answer to the question whether these negotiations make sense. He replied

that there is always a point because diplomacy is also a great force that can resolve issues, and we are willing to talk as long as it is necessary. And a second important question came up today about closing the sky over Ukraine. I mean the Nato forces and the US forces from the European Union countries, I mean the air defense forces, shoot down the Russian missiles that are flying into Ukraine. The President reminded me that a lot of these missiles have already flown from Kiev to Kharkiv and other cities.

[00:10:00] And he says that by addressing the leaders of society that it may be too late just as you take your time with the sanctions. In the same way with the sky you can guess that a huge number of Ukrainians will be killed and asks to make this decision as soon as possible and shoot down the Russian missiles in order to save Ukrainian lives. Igor. About the situation in Kiev what is going on in the Ukrainian capital and the situation in the city for the last few days it will settle down a little bit. On the streets we see a lot of equipment broken in all these cases I have already told in the broadcasts today strolling along the central street of Kiev one of the central streets is Prospect of Victory. On the side of the road saw enough going on. I will not lie. A few cars exactly saw the windows that were just on the curb and it is unclear for what reason they were there. I suspect that this is all the work of our security forces and self-defense fighters with so-called. They are saboteurs. It's at night when this work becomes more intense, and local saboteurs are most often hunted at night. As for ordinary people, some stores have lines at some stores, there are no longer any lines for the availability of products in some stores that have already begun to bring fresh goods, such as fresh milk and bread. Some still see that the goods run out at home in the store. Yes, I see there is already a shortage of goods there, but the most essential is the meat has run out, for example there is only very little left to choose sausages and very few expensive ones to choose from and there is no problem with water, no problem with bread, no problem with vegetables and problems. And of course thank you very much. optimistic roman in was on live from kiev

[00:12:13] And about the situation.

[00:12:17] Locals are trying to prevent Russian troops from reaching the Zaporozhye nuclear power plant. It's the largest in Europe and here's the latest video from the city. There's a huge column of black smoke on the roof. Sirens are howling in the city, people in the video say it was Russian tanks that shot at the roadblock that was erected earlier by locals. But we can't confirm or deny this information yet. But let's watch the video without comments. Putin himself

[00:12:55] Sam. What. For example.

[00:13:30] And again. Gaidar Dmitriy Orlov reports that Russian troops have shelled a roadblock and are using weapons against civilians. Russia won't allow humanitarian corridors to open in Mariupol for local residents. The city in the Donetsk region on the shore of the Azov Sea. If the Russians are shelling for several days in the city is already a humanitarian disaster says the city council and stresses that the group Metinvest, which belongs to oligarch Ahmetov is ready to organize humanitarian corridors. Quote. The Metinvest group is ready to deliver food and basic necessities to Mariupol at any time. But the worst thing is that the enemy does not allow

opening humanitarian corridors than creates a humanitarian disaster in Mariupol. The city council noted that production at all enterprises of the Metinvest group in Mariupol has been stopped for a week. These are huge industrial enterprises, which now employ only those who provide. The number of staff and equipment and makes sure that there are no man-made accidents. Mariupol remains without electricity and other communications due to Russia's military invasion of Ukraine. There are no mobile operators in the city. But it is hoped to be restored soon. Earlier, the head of the Donetsk military and civil administration, Pavel Kirilenko, said that Russian invaders are purposefully destroying civil and critical infrastructure in Mariupol to create a humanitarian disaster there. Russian Foreign Minister Sergei Lavrov said that he does not justify actions in which civilians are killed but further I quote him not we came up with enemy expressions come up with excuse the expression collateral damage.

[00:15:59] End quote. He also accused the media of allegedly preventing foreigners from leaving Ukraine. He's already been answered by the head of the Ukrainian Foreign Ministry, Dmytro Kuleba, warning of possible provocations from the Russian side. There is a lot of information about what provocations are being prepared, including in Mariupol and other territories where Ukrainians are now trying to use citizens as human shields. Talk to the Native Americans who are now trying to leave Ukraine, but they are not allowed in. And just yesterday the president of the prime minister of india was talking to the president of russia concerned that an indian citizen student was killed in ukraine in Kharkov. There are no Russian troops in Kharkov but we see a situation where foreigners who want to leave including through Russian territory are not allowed out at the Kharkov railway station. Russia's barbaric military tactic is to manipulate the suffering of the people it itself has caused. Lavrov is now accusing Ukraine of preventing the evacuation of civilians. Tell your boss that the aerial bombardment of Ukrainian cities. Show the world that russia is serious about negotiations. There are disturbing reports. The Russians may have sent multiple rocket launchers in the direction of the Russian border village of Popovka into their territory. Knowing the barbaric nature of the actions.

[00:17:33] Russia.

[00:17:37] In order to accuse

[00:17:39] Ukraine if

[00:17:40] By the Turkish journalist of the Woodrow Wilson Center. Hello. I'd like to discuss with you actually Vladimir Putin's speech where he's now saying that Russia's goal will still be Russia's goal meaning to win. Do you think he really is at all. First let us first understand what his goal is. It is clear that the calculation from the beginning was that the population will be sort of after. It's very interesting in that regard. This is the third time that the divers have used the beach infantry for direct purpose officially in the official letter is still if just I do not know. Especially if at.

[00:18:40] next week homemade meanwhile yesterday felt the catch-up and the only thing that today is really about

[00:19:10] went wrong.

[00:19:11] For the sake of staying healthy. And defeat.

[00:19:17] Russian politicians. And besides I think that such were unprepared so the actions. I think russia has

[00:19:25] The last two decisions.

[00:19:35] And we've been handed assurances that we don't have some kind of monument to a prince or we're completely unrelated to our planet. I can again.

[00:20:06] Assume that all of this was allowed and no one could. A person who could have cast their votes on the surface. I think we should expect a little bit of Ukrainian culpability and in the 90's the world didn't disappear. Trade ties and

[00:20:31] Higher education institutions may increase even more orders at the entrance to the city was attacked the American crew was concussed however there are other kinds of man for example the crew was concussed. However, there's still a good chance of getting past russia.

[00:21:23] In the west now everyone has realized and understands, but the Russians when they realize and understand most to be sure that they in the west just stopped just scared. And we'll be normal now for those who

[00:21:44] Loves soccer and at the home European and World Cup the Bandera kids will sit with you or the Bandera kids even without much doubt. I don't you.

[00:22:15] Tell you. Russia doesn't have its own production in russia but it doesn't. From start to finish so the breakdown of trade ties is an air fleet five kilometers a light SUV. Because even by mail. So if everything lasts, very soon there will be a problem of communication of common goods, including food. And you as a historian can compare. I already talked to tamara eidelman about this too, but I can't help but ask you what you could compare the current period in russian history this war that putin started against ukraine victoria

[00:23:05] And its and in fact much

[00:23:15] bigger now the situation in the world and russia and the cold war is much more of a man-made accident. Ouch. Everyone understands that just the damage done is theirs.

[00:00:00] Throughout the world, the cold war is much bigger than the cold war.

[00:00:00] Through the app and it's a government official app there are electronic documents of Ukrainians and so on stored there.

[00:00:08] So with this app on cell phones, Ukrainians are transferring their money to their army by today have already collected more than 8 million hryvnia in the app alone that's about 3 million dollars and there's another figure of how much people have collected in the Kremlin. I mean, no offence, but if you are happy with the new sanctions against Russia they will affect companies and the industry they will cut off access to British insurance companies. Sanctions and sanctions on Russian oligarchs have sanctions on more than two people organization we have another list over which could be visa sanctions on Russian banks and freeze

[00:01:15] Central bank activities including export controls.

[00:01:20] And unless Russia intends to strengthen its presence on the eastern flank of the nato bloc. Ukraine strengthens its presence on the eastern flank we have doubled the number of troops

[00:01:37] In estonia support and new and new sanctions against russia and its invasion of ukraine. It's all businessmen and companies.

[00:02:07] Niki, for example, announced today that it's shutting down its operations in russia. We've outlined the main Western sanctions against Russia and tried to figure out what they might lead to. The U.S. Treasury Department has expanded sanctions against Russian government debt siberia to U.S. financial institutions. Any deals with Russian and ruble-denominated federal loan bonds are banned. In the European Union, most likely restrictions for wealthy Russians and can no longer be kept on deposit in banks. Over one hundred thousand euros from Great Britain Russians cannot keep deposits of more than 50 thousand pounds. All in all, it makes borrowing opportunities much narrower more difficult for the Russian state. And as a result of some kind of maneuvering. And the fiscal one will turn out to be more difficult. In all likelihood, we'll have to make greater use of humanitarian mechanisms his words include

[00:03:11] A printing press that affects inflation even more than it already does today.

[00:03:22] Economists expect the defense industrial complex

[00:03:26] Aircraft and shipbuilding. Should be hit hard by U.S. sanctions now russia will have to more than halve imports of high-tech electronics products institute of nuclear research aerospace industry and left to impose an embargo on the supply of goods. Russia can't be sold now.

[00:03:54] Boeing airplanes and brands. In addition, all contracts have been broken because of the breakdown of cooperation of the German concern KAMAZ.

[00:04:03] Russian trucks will no longer be able to get foreign appropriately on the short range of time. Russian industry to a large extent simply stops. Over time, it will apparently replace what turns out to be the target of today's

[00:04:24] A simplistic now outdated solution of what was still in the noughties and early tens. In Iran a plane went down a plane went down right now in the coming years.

[00:04:41] It will be a big risk for Russia in a few years. But what we can say for sure is a reduction in numbers. Six years of human rights from in Russia everything. It's very difficult. Britain and Canada have closed the skies to Russian planes. They will not be able to appear on the territory of these countries to cross it and take action. This applies to any Russian airliner that

[00:05:21] Belongs to a Russian

[00:05:22] Russian person and formed by them in

[00:05:27] The Russian central bank was also subject to restrictions and organizations and prohibited from following this bank. According to Joseph Marcel, as a result, more than half of the central bank's reserves have been blocked. This is the money that the bank of Russia holds in credit institutions itself and in the whole bank VTB opening bank Promsvyazbank and company have fallen under the most stringent sanctions. Assets are still completely blocked here. This is a complete isolation from the dollar system. A number of other Russian banks have fallen under restrictions. Some of them have been disconnected from the system. All of this has had a very strong impact on the game in the Russian cup abroad. Samara clubs from agriculture to medicine. May need help and drugs to control this quickly and help because the incoming blocking of the CB accounts means that controlling the currency resource will now be impossible.

[00:06:29] If you and I saw last week when. We started. Time for a few hours of restriction.

[00:06:44] That was because the central bank lost control of the exchange rate and now those tools of control have been lost. Officially the central bank has already announced this so the euro and dollar exchange rates will go up today to recognizable things. All countries in the UK Japan and countries have been sanctioned against President Putin's defense ministry response their assets in those countries

[00:07:20] Should be frozen. The EU sanctions list hit 98 Russian all including

[00:07:25] Putin's prime minister, Dmitry Medvedev. Another 271 State Duma deputies in general for the recognition of the so-called LNR and DPR return to. Today, Russian troops launched a missile strike on a high-rise residential area in the center of Chernihiv. This is a peaceful city of about three hundred thousand people. There are no military facilities nearby. Nearby there are hospitals, several schools and dozens of kindergartens, as well as dozens of high-rise buildings. The mayor of Chernihiv compared the current shelling by Russian troops to

the Nazi bombings of 1941. Here's the footage from there. I did not expect it to be at its height. We that the apartment building flew from Russia took place but it is necessary that through. Ukraine's state emergency services report as of 6:20 p.m. local time as a result of the attack on Chernihiv, the bodies of 33 dead and 18

[00:09:15] Wounded civilians. Because of the incessant shelling, rescue efforts have been temporarily suspended. Hence.

[00:09:53] Russian aviation began bombing Ukrainian military depots near Odessa in the afternoon. The eyewitnesses' footage remains only the missile can't be seen hit under the eye and Odessa broadcasts Olga Sumska journalist of Channel 5, Olga hello. Hello, Olga. I read the news that the Commander-in-Chief said that the Russians want to send mobilized residents of the occupied territories, what they mean is the Donetsk and Luhansk regions, the so-called DPR and LNR, to storm Odessa. What about it. And in general, how is life in Odessa now? Well first of all it's still at the level of rumors, but in any case our airfield is federal and our defenders and our armed forces are ready to fight back, literally before we spoke to you. You had a video about an airstrike on a military parade. I want to let you know right away that.

[00:00:00] Here's the video of the airstrike on the military parade.

[00:00:00] Here it is now being sought by literally the entire neighborhood of Belgorod where the shelling was before curfew began. In Odessa, the air defense forces were also practicing to repel possible attacks attempting to attack Odessa itself. In addition, gunfire could be heard near the airport in Odessa. The territorial defense police were already working there and trying to disarm the drug as well. In fact, the night is already beginning and the night is getting pretty busy. Moreover, since the morning there have been rumors about attempts to land Russian landing troops. So far this is all at the level of rumors, but this night it is not excluded that they will try to approach the shore again. Moreover, the Russians have managed to sink another Estonian ship near us, literally. They used it as a cover as a human shield. There were six people on that ship, it was a ship registered in Estonia. But it sank today around 12 noon, not far from Odessa. The point is that the Russians using it as a human shield also managed to hit it and strike because the vessel refused to budge. So far we can say that there were only 6 people on the ship, four of them were Ukrainians, one was a Russian citizen and according to preliminary information one was a Belorussian. But now, fortunately, the entire crew has been rescued by the maritime search and rescue service of Ukraine in time to arrive at the place of possible, so to speak, possible maintenance of the vessel. All six crew members have been rescued and are now on their way to medical facilities in Odessa.

[00:02:01] After the change of the head of the region the appointment of the military commandant I now see the commandant of the Odessa region has been appointed. It's all kind of life-changing. Yes everything in this world that and

[00:02:16] Defense is a spitfire. Yesterday we had the head of the district administration, Maxim Marchenko, smashed because this man is known as a great commander in his time of 20 years

of mechanized brigade that he stopped. Moreover, this man is from Donetsk region and he knows firsthand what the situation there was. And he knows firsthand what the Russian world is, so he has no doubts about this person's patriotism. And what is more it is clear that she does everything possible to keep the scaffolding and critics. As a matter of fact this is.

[00:02:55] Information. Olga, thank you very much. Olga Donskaya a journalist from Channel 5 was on our air from Odessa. Well, here's the breaking news, the negotiations between the Russian and Ukrainian delegations have concluded and I'm going to read you these messages right now, this breaking news is literally one line, so the Ukrainian representatives have agreed to create a corridor for civilians. Russia will go as far as it takes to protect its interests, Rogozin says. This has nothing to do directly with the negotiations, but nevertheless it's important to read this lightning bolt for you as well. So, as far as the negotiations are concerned, the Ukrainian side has again stated that there may be a temporary ceasefire during the evacuation where it is taking place. Another statement, unfortunately, we did not get the results that the Ukrainian side hoped for. I have not seen any statements from the Russian side so far, but as soon as they appear I will report them immediately. Sergey Sukharev, the Mayor of Zhytomyr, will join us for our broadcast. Hello. Good evening. Please tell us about the situation in Zhytomyr.

[00:04:24] But yesterday was for this strike and the strike. The missile strike struck populated areas unfortunately nothing can be seen wanted to get into the air defense zone of the military airfield but hit in the real sector a crater of 10 meters 100 meters to about thirty meters. And literally a few hours later there was another bombing strike it was they fell on the residential areas of the city. Yes it is also the private sector about six seven houses actually destroyed completely partially. Including the department of the hospital in the 6 m building, where there were sick systems. All the doors were not damaged but we lost three shifts about 9 people. Because I left in what is still a work in progress have been extracted failed 13 people including six children.

[00:05:49] Thank God serious.

[00:05:51] The first victims have been punished. Yesterday, a roadblock near Zhytomyr was shelled. There are also four dead. The war goes on and on. I'm glad there is now after the night when I arrived after the bombing on the scene took a piece of the bomb that took away

[00:06:23] Lives of our lives and

[00:06:26] Life goes on at this very moment of the bombing in this district office wounded two

[00:06:33] Children. And tell me, do you understand at all, it's clear that no one understands why Putin needs this war. What will happen next, but specifically about Zhytomyr, do you understand why they are bombing Zhytomyr this way they are getting closer to Kyiv?

[00:06:54] Until now. And there's also a desire to intimidate and it's all the same there are military facilities and rearming of the Russian army such that it's impossible to carry out

successful bombing I don't know frankly and alarming. There have been several alarm explanations tonight and there have been several alarm explanations during the day but thank goodness tonight has been relatively quiet

[00:07:27] And in a humanitarian sense, what's the situation.

[00:07:32] For that we've assembled children's food and of course the disruptions they can disrupt the logistics of supply across the country it's disrupted. And in principle, we're building up supplies a little bit earlier. Plus there is a big flow of humanitarian aid, including I am grateful to the Czech Republic for their help. We already get cars in Poland, the Czech Republic and other European countries virtually every day. And thank you very much for that.

[00:08:15] Someone from the Russian military is trying to get in touch with you.

[00:08:22] No not only have I heard. But I don't see the point in that.

[00:08:28] So the Ukrainian flag died

[00:08:31] And the Ukrainian city early in the morning, they don't intend to give it unintentionally. It's clear that with territorial defense it's not an army but we have large enough and reserve forces to at least and without barriers. That's something we know how to do.

[00:08:53] Thank you very much for coming on the air it was the mayor of Zhytomyr Sergey Sukhum

[00:08:59] Thank you so much to him.

[00:09:03] In the first channel ruha published footage that shows how rescuers work in cars. These cars were provided to them by volunteers. The footage you see now is the Moscow district of Kharkiv where a shell hit a residential building from a multi-story building taking out the victims and quickly taking them to doctors in civilian cars. I think now what to guess here is my leg which was given to me today by volunteers. I will now show you how a volunteer saves lives. Friends volunteers help be sure to see all the blood in the car is the blood of the civilians we were carrying. Today after the shelling. So friends help the military help volunteers and it saves the lives of civilians. Russian troops are bombing the city of Izyum in Kharkiv region. The shelling began as early as midnight and is still going on. Shells are falling on residential buildings. Officially, eight people are already known to have been killed, two of whom are children. In some areas of this district center there is no electricity and no Internet. Local residents sit in basements all day long. But those who have basements do have them. According to the deputy mayor of Izyum, Vladimir Fokin, the bombardments are repeated with an interval of 90 minutes. We contacted a resident of Izyum who was in the basement at the time of the conversation. From Russian shelling.

[00:10:35] It has to be said.

[00:10:47] What.

[00:10:49] There's still a white light from work. The crew lives terribly miserable that the situation someone needs through the room even easier even better to live. It was the fear of the crowd. It's a good blow to our crew interests.

[00:11:55] Meanwhile, the Hague prosecutor's office has asked anyone who has documentary evidence of possible Russian war crimes in Ukraine to submit these materials to their e-mail account which you can find on the Hague prosecutor's office website. It is reported that you can write in any language, ask them photo video documents eyewitness testimonies. The prosecutor's office is waiting for evidence of the following facts I will now quote the killing of civilians rocket bombs and artillery strikes on hospitals

[00:12:27] Schools residential buildings and other civilian facilities. Now from all over the world today all over

[00:12:38] Europe from Norway to Malta, the bells of major churches were ringing in solidarity. And. In Paris, volunteers are collecting parcels to send to Ukraine and here necessities goods for children canned goods. Volunteers are preparing. They say they barely have time to sort that

[00:13:16] What the civilians bring in. What's in Europe.

[00:13:23] It's just bells ringing in solidarity with Ukraine against this insane war that's already going on with bells ringing for everyone for one minute every day. While this senseless war is going on we are declaring our solidarity with the people in Ukraine who are scared of war who are afraid for their lives who are forced to flee who are suffering because of it. Although bakeries in Frankfurt have an index of baked goods sales with the Ukrainian flag will go to help refugees who are now arriving in Germany. In Berlin today there was another action of solidarity with Ukraine more than 5 thousand people under the Bundestag chanted stop Putin. They held banners and posters calling for an end to the war. Sergei Resnik I am here because I want peace I want to be a human being for all the people who are dying in Ukraine or fleeing refugees. We must not remain silent, we must not forget about them. We can we must support them. This is Panama, a group of protesters called on the Panamanian government to close the Panama Canal to Russian ships as punishment for the invasion of Ukraine. The move was really more of a symbolic move because so many Russian ships actually use this waterway to the Atlantic and Pacific. The Russian Defense Ministry released footage of its troops moving through Ukraine. The video was posted on the department's youtube. This video shows bmp btrs and tanks trucks and helicopters ka 52. Many of the vehicles have Latin letters and at the very beginning of this video you can see that the convoy is passing a road sign that says Kiev region Soviet district. This area borders with Belarus. Apparently, Russian equipment entered Ukraine from there. The Dozhd TV channel is stopping work after their website was blocked, and in anticipation of tomorrow's vote in the State Duma, the Russian parliament must pass a law that holds Russia responsible for allegedly distributing films about the war. Any information

that does not come from the Russian Ministry of Defense can become a fake. Director General Natalya Sindeyeva said that this is not the end of work, but only a temporary suspension. Let's see a fragment of this broadcast. There is no this phone. Tomorrow the work will be almost impossible. We all have to tell about the beautiful exhibition.

[00:16:01] Dynamo Forward so.

[00:16:06] This is the last newscast. I think this season and now we are. And suspended by all the circumstances that we've been involved in and. I was writing my short speech interrupted natalia episode as now the representative of russia is speaking at the negotiations we have decided today is the issue of saving people civilians who are in the zone of military clashes. So on the part of the representatives of the Ministry of Defense of the Russian Federation and the Ministry of Defense of Ukraine, we agreed on a format for a regime to maintain humanitarian corridors for civilians in a possible temporary cessation of hostilities in the humanitarian corridor sector for the duration of the civilian withdrawal. I think that significant progress once again the Russian Federation encourages civilians who find themselves in this situation in the event that hostilities continue to take advantage of these humanitarian reserves or to do everything possible to ensure that hostilities cease. As it was in russia vladimir medinski representative of russia in the negotiations. Earlier it was reported that some kind of agreement was reached between the Russian side itself and the Ukrainian side on humanitarian corridors. Well, let's see. There's also a broadcast now from there, let's see. To reach an understanding on the important issue of humanitarian corridors, of course, the mechanics have yet to be determined and primarily by the military establishment. But nevertheless we now have something to answer to dozens of people whose. If relatives of parents are in dangerous zones on the territory of Ukraine I think that in the near future there will be an opportunity to leave these zones safely. Even more important because these are human lives.

[00:18:51] And of course.

[00:18:55] In order to implement the agreements, I won't be voicing them today. There will be a third and important round of negotiations in the very next few days that will require a gigantic effort. Some of the agreements will need to be consolidated and then go through the national identification process. But it's a

[00:19:21] The question may not be so

[00:19:25] fast and yet to procrastinate on the implementation of those agreements that have been reached and will be secured at the highest level in the very near future maybe even hours that will be reached in the next round of negotiations. By no means is a woman responsible. You have to work. Slutsky is the head of the state Duma committee on international relations and he also represents russia in the negotiations. So russia and ukraine agreed to create humanitarian corridors to evacuate civilians. That was the statement made by an adviser to the head of Ukrainian President Viktor Yushchenko's office on the Russian side after this second round of talks in Belarus. Let's listen to the direct speech. The second round has just concluded.

[00:20:28] Second round of talks.

[00:20:29] Between the Russian and Ukrainian sides. Unfortunately to our great regret we didn't get what we hoped for. The only thing I can say is to discuss the humanitarian aspect in detail because quite a few towns are now surrounded. The most dramatic situation with food and medicine is the possibility of evacuation. So I will read out the official commission that the sides have reached and we have therefore agreed to continue work in the third round as soon as possible. Officially, I can say that the sides have reached an understanding that there will be joint provision of humanitarian corridors for the evacuation of civilians and also for bringing medicine and food to the areas where the fighting has been most intense, and I stress the possibility of a temporary cease-fire while the evacuation is taking place, which is happening at the moment. There may be a ceasefire during the evacuation. To this end, a special analysis of channels of communication and interaction will be organized in the very near future and appropriate logistical procedures will be formed. But the U.S. and EU embassies at the United Nations are calling for a human rights commission to investigate Russia's human rights abuses in Ukraine. The commission of inquiry is one of the strongest tools the un has at its disposal and its findings could also be referred to an international criminal court. The prosecutor's team of the court in The Hague and as of today has already left for Ukraine and the courts. Mr. President, it is impossible to imagine that a member of this council a nation that fought so bravely with us against fascism would commit these egregious violations. But President Putin has proven to us that he has no respect for human rights, the United Nations Charter and international law. So the council needs to establish a commission of inquiry to investigate alleged violations of human rights and humanitarian law to preserve evidence and prevent impunity. And Russia must be held accountable.

[00:22:49] We are deeply concerned about the daily reports of civilian casualties and Russia's use of cluster munitions in cities where innocent people are trying to take shelter. We have seen pictures and videos of Russian troops bombing residential areas and civilian facilities of hospitals and kindergartens. And Russia is becoming increasingly violent.

[00:23:13] As of now, it continues

[00:23:16] The war in Ukraine is now in its eighth day we will continue to tell you what's going on. My name is Elena, I'm passing the word Washington right now. That's where our program is coming out now America. Later in this studio, Julia Maletskaya will come in and summarize this day and tell us about

[00:23:35] How.

[00:23:37] Us. Yes.

[00:00:35] How We.

[00:00:01] We were stifled by the aggression against Ukraine to us. They recommended 20 meters each to do it then it will have no counterbalance beams as they will be called.

[00:00:19] I did so radio nikolai 6 pavel fedor all this right.

[00:00:27] radio nikolai 6. Leonid pavel center.

[00:00:33] leonid pavel center. But now there's a station up to 9 in smolensk. Alexander good evening.

[00:00:41] Copy that. Alexander thank you good evening. I'm sure I perceive the Fury in the 8m solar settlement and hello.

[00:00:51] Roger Yuri listen to the experiment first antenna second second second. And again the first of April.

[00:01:02] You know there's no difference alexander and poet. I look at this very thing on audio with my ears as well. I don't see a difference in general reception.

[00:01:15] Well that's good thank you. There's no question that it's not me you answered the reception.

[00:01:24] No questions asked. Alexander Smolensk. All the best. Happy upcoming attentive. Or rather, already going. The last week is already coming. All the best. 73 Bye.

[00:01:37] Likewise. 73. I watched leonid kostya dima 80 reception.

[00:01:47] Dismissed dmitry anna ivanovna and jack.

[00:01:53] And burned 7. Who.

[00:01:57] ivan guryanov and

[00:02:00] ivan guryanov reception john from milan. Good evening. 5 9 I'm on the plus side smolensky alexander reception sasha welcome.

[00:02:10] good evening 59 plus 10 victor lievovich.

[00:02:15] Kirill Viktorovich listen to experiment 1. The second second. The first of April the first one is louder the bells are right. Yeah I see, thank you. No questions about what will happen to me answered the press.

[00:02:35] sascha khokhlov radio link drop.

[00:02:40] I don't do that I can't at

[00:02:44] Lucky

[00:02:46] date in moscow leonid kostin kostin on 83

[00:02:50] dmitry radio

[00:02:52] ivan dmitry anna good evening 10 in plus alexander in smolensk reception

[00:03:01] alexander good evening loud receive ulyana anatoly leonid kostya dima dmitry anna  
ivan 15 hear vitaly krasnodar reception

[00:03:13] Vitaly accepted. Vitaly listen to my experiment first. Second second. First first first.  
Second second. And the first of April.

[00:03:28] But in this case the first place I thought I saw loud for about 10 years she was a Baltic

[00:03:38] That's about it. Although I was listening before that was an experiment with the  
cameraman.

[00:03:46] I couldn't see anything the same way. But in this case the first one was.

[00:03:53] 10 more than the second reception.

[00:03:57] Yeah I see. Okay thank you. If you have any more questions for me, I'll answer them.

[00:04:06] Yes, of course there will. I wonder what the laws are for experimenting like this. I think  
maybe I'll try it again. What's your technique.

[00:04:18] There's a ramp out there. The basic ideas are right and the other one is roughly  
slanted reception.

[00:04:28] Clearly now works that.

[00:04:31] And at the moment the slant works. And here you are on the ramp. And the tilt and  
the reception.

[00:04:41] Well that's a definite tilt now. I've got no gain. You can see the tilt is correct and in my  
direction you write clearly.

[00:04:53] That I see less. Although it's understandably subjective in directions. But in this  
direction it is one hundred percent turned out several times experimented not always the same  
result that is the tilt and the field 10 10. Specifically in the plus reception.

[00:05:12] I see thank you. Thank you good health we wish you always hear the reception.

[00:05:20] Thank you very much. That's the last time we met on the road and now we're at 80. All the best health good luck happiness in the family until future all three bye.

[00:05:34] Thank you so much I'm Leonid Dima 83.

[00:05:42] ryan anton sergei dmitry mikhail.

[00:05:46] radio chanson dmitri dmitri. Michael please receiver

[00:05:52] In three days. Good evening. At 9:10 pm. Alexander Smolenskaya reception.

[00:06:00] Yes dear alexander good evening. Thank you very much for your answer. Great to hear alexander five nine three nine plus 15 20. The lawlessness in Pushkino is the Moscow region of the North East. My name is Volodya Vladimir. Sasha reception.

[00:06:18] Raspberry accepted. Listen. I'll switch the price. The first one. She herself and her first brezhneva alexander.

[00:06:33] There's absolutely no difference in my direction. It doesn't make any difference whether it's this way or that way.

[00:06:41] All right, that's what I wanted in one antenna. Chop the root. It's too expensive to keep two antennas on the same band. All right. We'll leave it fine for now, thanks. If you have any questions for me yesterday.

[00:07:03] Accepted wanted to ask what Boris antennas I have working investors on this band. 14 meter telescope and two pieces of 18 meter 60 centimeter envelopes made. What kind of antennas sascha if it's not a secret reception.

[00:07:22] This is the antenna I'm working on right now tilt and finger. And this is the gangway ramp go off the ramp. And this is the tilt at.

[00:07:35] No smoking for a long time. And there's also the question of how by reception.

[00:07:42] On reception is the same as on transmission reception.

[00:07:46] Well that's great. I don't know. If the area allows why keep, like, two antennas. Of course you can tame some antenna or for them shoulders will get a different range. Even the receiving one.

[00:08:02] Well I'm looking at latvia now cable is expensive for 140 rubles he sells us. Phantom cameras are crap. Keeping two antennas on the same band with expensive cable. The fold is that you need a different band then it's better to close the reception.

[00:08:23] Yeah yeah I'm of that opinion too. If two dmitry mikhail and now probably even more expensive cable, then there's nothing to wait for. There is no way to make it cheaper. Only a rise in price even reception.

[00:08:43] I think so too, I told the correspondent before. So we'll think about it. All right, thank you for an interesting meeting. No further questions. I wish you good health. Goodbye.

[00:09:05] Yes. I wanted to ask you one more question. As they say, just out of curiosity, what kind of transfer works to reinforce control north. Here's a Boeing 747 and just the original north I have a microphone really only 16 olympus and ms 14 and a desktop receiver. A light bulb where o 74 b should call voltage helps. Winged 1600 volts is just one thing to measure the power. But judging from that 400 watt probably I have that range somehow get a reception

[00:09:46] Nothing good comes out all right. No there's all brand name proprietary gear here. Uses the north elite class in 5 thousand mt. The method helps amplify me. I conducted.

[00:10:07] 2022.

[00:10:09] Lamps contain 500. Right now in poland kilowatt advance stage reception.

[00:10:19] I just wanted to say sascha probably a kilowatt or so good technique. And the song is good and the quality of the signal is great, so his neighbor asked me if I could excuse you, I'm sorry, but the weather is fine. The day is warm up to 6 in the woods, sunny at night up to minus 4. It was 12 at night, but in the north-east it was minus. But I don't think your weather is probably a little different than yours to come.

[00:10:58] About the same weather. The snow doesn't melt well. It takes until lunchtime to warm up. In the evening the frost starts snowing again. Oh, and I forgot to tell you that I still use branded microphones for 200. To this apparatus, which also costs some dough. Probably the attractions of your apparatus reception.

[00:11:27] Yes I'm up to date and alexander. Well the technique is great it feels great. Because the signal is very good and everything is at its best, as they say. Well, thank you very much. No further questions. It was nice talking to you. Have a good evening. And the most important thing is the health of the children, goodbye.

[00:11:52] Thank you, I'm always glad to hear from you.

[00:12:00] Three Dima Mau

[00:12:03] Heritage. Good evening. 5 9 10 plus you alexander smolensky reception.

[00:12:10] Sasha good evening good reception good signal. Andrzej Podmoskovnyy voskresensk raiders.

[00:12:20] Andrei received excellent reception. From mikhail far live reception toilets. Well repaired the apparatus I once heard. Screamed out made him the reception.

[00:12:38] I think they did and I don't know for sure. He and I don't talk to each other right now, of course I don't.

[00:12:45] All right, thank you andrei. But there are no questions about resurrection. If there is, you're welcome to answer the prime minister.

[00:12:54] No questions. All the best. The most important fan at home 73

[00:12:58] To 73 and the answer is 87. Polite refusal. Good evening. 9 plus 5. Smolensky alexander took alexander adult respected good evening.

[00:13:16] Great accepts these 25 years old and evgeny ryasensky peter five nine evgeny parents please you microphone at

[00:13:25] Appearance listen to my experiment first antenna. Scene 2 2 2 first first 2 2 2. The first reception I.

[00:13:41] Sitting somewhere louder. Just a big difference for example.

[00:13:46] All right clearly thank you. Questions will come to me answered reception. The scene for the lead is me and the ramp and the reception.

[00:14:09] It's clear to see what's explained to us there.

[00:14:16] A good signal so on the ears is great. I don't see any distortion. All these institutes. Emphasized the low frequencies. Medium to moderately high frequencies meant but the machine is the limit. Elite class in 5 thousand. It seems like everything is as it should be. And the smart guy kind of gets it all right at.

[00:14:51] Self. Health to give you an education.

[00:15:12] Likewise be well always hear from you are welcome. Who else invited. How much time there. I'm in leonid kostya dima for 80 years. Cdk material and archive of war news bulletins go away.

[00:15:39] We approach. Approach. Background.

[00:15:53] And sacha reception. Monya from uralkali pure freedom.

[00:00:00] We're coming up.

[00:00:00] Wait this former for the reception days on the border and vandalism oleg kharitonov paint tamara. In that order tamara 5 9 plus 5 vyacheslav novotroitskoye reception. Slava accepted good evening. R. Trefilova kilowatt short 5 day 20 minutes collected fyodor krasnogvardeyskiy reception name not understood. Fedor fyodorov fyodor reception in honor of the name then I must have heard it well because I understood. After all, it seems that another group clearly gave for example I am a prisoner of the Red Army good evening. And Sergei Garmash of Voronezh Vyacheslav novel 3 third novel pilot. Pavel good evening. Five dozen to you also 22 collected fyodor krasnoarmeyskaya note. Yes all these taken loudly beautifully started all right will not be a question in terms of health, well-being while the wealth. As usual customary thank you friends and also happy holiday 7:3. Please vyacheslav thank you with the Shrovetide holiday. I went out there today, too. People live in the village, they were singing Christmas carols, and I had no time to get there. Good evening. Good evening, shaking hands acquaintance so far 7 years. Ivan Boris and you Boris moiseyev 5 10 25. Vyacheslav novotroitskoy reception was listed but go to bed. Ivan 5 days in Donetsk even glorious thing is accepted to take a good loud shower listen Christmas tree. Let's all list the businesses of Donetsk good evening. And addresses I sat in Voronezh. There I met my guest speech went to welcome in Donetsk with words. Yes overcome health issues wellbeing. Abakan. And thanks for the connection. There still knew everyone. All the best. Shrovetide you all have a good evening. Radio 3 2 channel sings that is radio 2 boris on radio 2 center boris tamara 5 9 7 somewhere 5 meters vyacheslav novotroitskoye reception. Vyacheslav good afternoon radio 2 boris center tamara for the last 20 27 now city ramenskoye moscow region.

[00:03:00] Name please tell time again. Evgeny zhenya evgeny yes yes life ramenskoye all accepted to live well life because for the third day now press sovetskaya 9 9 20 and for 20 in vyacheslav voronezh on the reception radio sign 3 kilowatt here radio 2 boris and tamara. Good evening to you. Evgeny ramenskoye moscow region to make a decision will not be a question in this regard you health so clouds of world fame mike sorry bye all the goodbye to you from the Shrovetide. Good evening. V.karpov thanks alexey dmitriyevich radio 3 2 channels toyota reception we. Who was right. Dmitriy not interested in you. Dmitriy zero Ivan Dmitriy sign in my opinion. In my opinion so 5 9 exactly 5 9. Vyacheslav Novotroitskoye with support at the entrance for a while formed a horn. Donetsk good evening. Roman in 3 hours 15 to 20 in Voronezh at the reception. Figuratively speaking two Africans plus 30 houses I vladimir I replied that the upcoming speeches probably all loudly beautiful final all right will not be a question on Donetsk. Health, happiness and well-being. Thank you for your wish. Good. Yushchenko like me. And thank you thank you bye bye day also good evening you and acquaintance so far I do not see. Vladimir Sergeyevich 76 Oh, I wrote down another one. Oh, my God, I'm so sorry, Volodya. Thank you all the best. The three twos are catching on reception. Radio 3 kilowatt kilowatt her radio 3 kilowatt her radio 3 and 2 kilowatt aek approx. invite radio 3 and 2 kilowatt give on radio 3 kilowatt. Radio 3 kilowatt kilowatt. Radio 3 kilowatt kilowatt. Reception. Lada I'll

be different let's go for the bands thank you health and wellness bye bye. Come on bye bye good evening and bye I'll talk to you. Roman 9. Dima.

[00:00:18] [00:00:18] [00:00:18] [00:00:18] [00:00:18] [Recorded] 2022-03-03T18 37  
58Z\_3640.0kHz.wav

[00:00:18] If Ukrainian

[00:00:20] Army and Ukrainian. Bin laden where she spent the night near mariupol is hard enough to explain but. Seasons were conquering new banks. Vessels and barrels and tubes of cookies were appearing taking children for their own.

[00:00:50] When you talk about

[00:00:52] Somalia interviewed Lavrov asking for the Russians to finally come in as Putin's European aides. No they were spinning American cartoons if she was on a merry-go-round understanding that it can't be won and Vladimir Putin created his own Russian cartoon started spinning parodies called. I like khokhli Europeans cartoons russian like you.

[00:01:26] And you like this one.

[00:01:30] Photo from the archive. Zelensky soft on cocaine and I want to meet with Putin.

[00:01:44] Russia is struggling.

[00:01:47] There zelensky like the rest of society Ukrainians Americans. Yes yes yes well what classmates Ukrainians helped you America Joe Biden himself.

[00:02:27] Even if they are freely invincible. And it doesn't depend on any humanitarian aid.

[00:03:34] But well done us fascists Ukrainian friends stand behind the backs of civilians behind the backs of women Ukrainian junta do it all. Disgraceful disgraceful disgraceful. Perhaps the most real contempt today. Pogorely i and voted the cotton for europe the road in itself on its own knees advises its members

[00:04:45] Less Ukraine. Our Ukraine.

[00:04:52] Disgraceful disgraceful disdain for zelensky the most disgraceful with macklin entirely. And the more even the epiphany will be.

[00:05:13] Of course the election but including. This is according to a message on the rf ministry's website.

[00:05:38] It's going to fly out about that. So the Americans specifically for communication with our company that the Ukrainian. Khakhls when you go to moscow for a meeting. What about molotov cocktails moms. Then these bottles were. It's just incomprehensible. It was the first meeting and then it's all over. Battalions in Zaporizhzhya canvas from behind the backs of Ukrainian women from this warriors. Military. The Khokhlyas draw letters on their equipment that it is Russian equipment and pass it off as Russian is the development of the country. You know this is the cheapest soviet nation in the 40's. If vladimir Vladimirovich is sick it does not believe anyone everything will be all right. I the red army the great mighty invincible free independent as the great army second in europe and we are already the first. It's already 25.

[00:07:34] Years.

[00:07:39] And she's done it Russia itself has served. It's his private office private family business of producing oil. And now it seems like a boon to the yellow greens.

[00:08:02] Of course for us very

[00:08:03] A lot of interesting and interesting times like this. Oh they're about to start investigating.

[00:08:09] This case.

[00:08:14] Ukrainian will be fun.

[00:08:18] I was holding a meeting at the hotel tambov district ends demolition begins and all the roads are gone. So in fact all the roads are all ruined. So slowly in first gear, in second gear, the reception was here you lost your car there. They will punish us there only then still there. They have already decided to do it, they said they would drive us to the bus stop and they have not got to you yet. Last year they made a new road for all of us. Of course it's a great road now. But where did they build the 9 kilometers from the turn in our direction. Hajibekov they built to the dairy farms. And this road from the stage of Sosnovskyy district and to the turnoff to the neighborhood is impossible, there is no road, you know, these big loads go and they are not in the base. So no no very terrible road. The acting governor promised he would help with finances to fix the road here, but all the rest were taken off the New Ladoga road and now we have a Romanov Fyodor Fyodorovich. Yes, Yura hears and hears one minute. Yeah, that's it, that's it, that's it, that's it, that's it, that's the new one we got in '84 as I got the call sign.

[00:10:18] That's how it was made at that time never overhauled so there's a light bulb there's a light bulb there. That's the way it is. So Seryozha, with your permission, an old friend from Varsovka came over. Hi, sir. Hi, how are you? How are you? Yes, it was my coach Roma Kazan May 20, I see the same story as it is now I want. Now I have in 70 80s works and easy mode strengthen 4 800 agencies but at the same time in 25 even 30 minutes pops up yura. So everything is great rpg rpp. so everything is loud and say hello to our fellow countryman and his friends well. Seryozha max straight to you. And yet as they say acceptable I am roman anton 3

roman seryozha already ideas to plus 20 take sergey my name is in Dmitrovsky area of Moscow suburbs at the moment reception. Yes I live in a barracks talk a little quieter senator show 15 loudly. Fedor 26 guys 15 lessons in marching fairy reception and spring is great and another station. Listen fyodor among them there is such a latitude rpg and evening 5 here everything. Although the problem is always this too welcome guys health 15. 15 varshavsky yure reception.

[00:12:18] My word thank you. Now the composition then a few words about yourself. Please don't bring up trying I'll tell you about the Samara district which is from 40 meters into the district.

[00:12:33] Good good bake good. Yura so it's very loud to hear you here is when did you get such an apparatus for reception yes I won't talk in front of the microphone. But here I made a gift to myself well see what is waiting there for now. Now changed lame it is purely beautiful works through the north. Here he is born again. Yes you know from sergei remember working on the radio with sergei and so sergei from varshavskaya before rs remember the reception. I don't remember that anymore. Yura in general 5 10 15 and when the pupils 5 9 years 25 sat together just passed was the reception. Yes yes. Well I studied together with Vasiliy and I got an admission. No founder I took the firemen's water separately. Radio, he said it right. Yeah, not so much. But at the same time. And he himself does not accept it. He came up when we chatted yesterday about some nonsense some help some class what he said yesterday I did not understand some other took some class by. I called Yuri Osintsev, but I haven't heard from him for a long time. I don't even know what he looks like now. It's okay, it's okay. He took some kind of defenseman so much under him. I liked it, he sold it and now he's got a good one. When he was here on his 80th birthday, he opened it wide. Peter, I'm not offended by how the successor works. That's what I have for example here 5 5 points no more shows fedorovich was a character.

[00:14:41] It was showing here in this level. Here's the guys coming up, everyone understands fyodor. Yes legal guarantees that in the yard standing low flying it works for them. Reception of course. And fedorovich of course. Now let's go now, not so dramatically. You should at least protect yourself, you can go to Juar as long as the Katyusha stands where they are still protected, you see, now it will be warmer, I will do it. Well, congratulations to you too, Yura. You probably did not come to talk to me I also bought a new i 73 2:0. That's on it I promise. So I also upgraded. I see. Seryozha by the way I am through yura and from noginsk waiting for March 15 at 84 b. Seryozha. Cousin 74 84 b. If you have a reserve of yourself and technique and reception. No I will say I have reinforced Irina 33 Ukrainian mind if the wise man would also not be able to find. There is such a site sack called. Here I was sent from Novosibirsk reception. Which one you take. One small the other crooked. All I know is that they did not have more at the moment and in about six months they will be at 80 on 13 e and understandably I got it and let's something there said who she now I wanted to say he earned it on 160 routes and call sign do not remember but this age man about 40 meters in. Took off in the private sector also a long time ago watered him a set of pipes. Then took in the private sector. If you will rings in the city. 5 meters with a straight.

[00:16:58] Ether meters will put in there. Assuming that these pipes could be a Kamchatka success let's say a full program.

[00:17:08] Well so it sucks you start pulling out the first pipe where they've been standing all of 10 days and fixing there's an accident up there. Next you start to raise a fuss thinking and accordingly partly feeling that you immediately decide. The run tells you do not understand. And the whole package from these words. All the more important in the ground five meters from each other. Well there once this package is actually one you stay you will meet. Sasha heard about it. Yes you have a well in front of my house he has already seen wells I bought in 91. The car came to drill a depth of 28 meters. So I also thought about it at home I have the last pipe 200 such church 200. And here used to water those too were. And here I was also planning to do the same pipe there, even a chimney. That's how you understood at the top chatterbox to lower it to do shuttles and pipe there and then this rope from such an editor to lift and from there the pipe can first be lowered there on this issue and then lift it if the total length. Or rather collected it in sections there in the depth and then lift it up and somehow said in 3 years to not hold in the hands. That's what I was thinking as well because I have a well in front of the house. I so, by the way once wanted to do a vertical right over it that she was at me the top worked as an active and was behind the ground as a counterweight. Well then so little I say with this work just no longer have time. I have to get up early tomorrow and go get some rest. That's why Seryozha Yura. Peter, I'm glad to hear you are in good health of your women. I wish you all the best. And Seryozha, by the way, in September, my dad left in '20, and in November, my mom left a month and a half after my dad. So we really wanted silver. Sasha, you must have forgotten I called you just then, we were just talking. I know. Yes yes yes, I remember. I've got it written down. Thanks, Seryozha Seryozha Petr Yura, we've got a chance at Domodedovo. And petr.

[00:00:03] Radio recordings\_2022-03-03T18 57 09Z\_3613.0kHz.wav

[00:00:03] Radio 3 kilowatt kilowatt yod in we have departure to usa hi. Good evening. Glad to know channel one is showing a novel here

[00:00:15] winter zhenya gordeev and morocco alexander panchenko

[00:00:20] There wasn't a receiver standing by. That I got a lifetime in December and it's only here I've been tuning the microphones then you can't understand the antennas and so it's like only appeared shortly but now only bad weather for a week survived this house a little bit of noise and such things do not go away yet shower to work. I went away and went to have a rest. For example, for that time. Thank you very much. Health no more than three and thank you so far. Thank you all have a good evening goodbye. Radio third units work radio three kilowatt vodka radio third kilowatt its reception. Elena Afanasyeva radio. Brief fyodor who was at four arrested at intermission central on radio 4. While brief her center 5 9 received vyacheslav novotroitskoye at the same time abroad as part of his first departure here 4 kharitonova ivan brief center five ten to plus 10. Dmitry tolyatti for example day accepted excellent day good loudly understand them accepted thank you no questions. Naturally to me I will answer thank you no questions but very nice I wish you good luck health and new meetings bye bye happy

holidays to you. All the best. Who else was in peace. My wife 3. Dmitry generous Valera. Dump did not understand anything again. Roman zhukov podmoskov podmoskovje and podmoskovje podmoskovje who was receiving roman zhukov. Dmitry firtash 3 addresses vyacheslav 3 dmitry fedor 5 9 receiving 5 9 plus 5 vyacheslav novotroitskoye and 3 2 kilowatt idiots from 3 dmitry yuryevich well also 5 10 ago loudly alexander mytishchi vyacheslav for example mytishchi.

[00:02:55] Everything is recorded thank you there more I will answer goodbye goodbye and I am on the sixth beat about rhodion's mom 6 rhodion. 6. Fedor roman 5 9 5 9. Love is 5 meters. Window of the world greedy and with meters. Vyacheslav novotroitskoye I do not know now or pulled up. Six months before his side stood in time. I if here sat loudly alexander at i.e. Zhe accepted all accepted. Budennovsk. I regretfully took all well loudly well. Our question if be to me answer for example the head of the apparatus works in the apparatus usual not 850 and the assistant on 43 in the light mode. Yes yes there is such a question. The Russian side should be something to show. The same. 3 6 3 0 0 reception. May 7. The world they are there means I will not be rightly myself stand back. Okay thank you health goodbye. Got it. Well you know here they are here clean measure in everyone in everyone in this very. I've read so many articles about the north. And so I was told each server has a different setup, you know, and this is the issue of these highlanders, they will be a little bit there in short, this plant alone it would be fine looking and here it is necessary to him that he even. Roman Vasily Ivan Fedor radio. Thank you all the best but we will look at you for now. Roman Vasily 3 and Ivan Fedor. I think that was 5 9 5 9 vyacheslav novotroitskoye.

[00:05:23] I'm not sorry.

[00:05:31] Decision made total 59 well made all made the decision held the reception. Well then it's already 73 73. All the best. Pancake week and so far the saying on 73. Radio three twos work radio three kilowatt yod reception. 4 kharitonov or radio 4. Kharitonov elena yod 5 9 5 9 10 vyacheslav novotroitskoye. Good evening hello radio nikolai 4 kharitonov elena sergei 25 and vladimir city samara reception samara all understood too well receive this antenna you and I probably look at each other such things. Thank you, I will answer you. Happy holidays to you all the best. Happy Holidays to you and good luck. January 6 goes center reception center center last who was ulyanov dmitry 6 she goes to the center for an appointment 6 dmitry her center 5 9 5 9 3 6 meters he basically good quality vyacheslav novotroitskoye reception. Thank you. Good evening. This I hope our find the center. My name is Ivan I am in the village of Mikhailovskaya it is 2 5 9 9 20 how. Or through.

[00:07:54] anna 6 anna timoschuka 5 ocean radio activity anna 6 anna dmitri pschuka at the reception. Radio am 6 anna dmitry pike. Anna 6 anna dmitri pike all band 83. Radio ohm 6 ohm dmitri pike. Radio anna 6 anna dmitri pike. Radio anna 6 anna dima pike on the reception. On all 80 band radio on 6 ohm dmitri pike radio. And on 6 ohm dmitri pike all radio. Anna 6 anna timoschuka reception. Not quite killers know how to receive please microphone who called. Rodionova 6 anna dmitrieva still to all the radio and we 6 om timoschuka priem. On the radio and on 6 om dmitriy pike radio. Anna 6 anna dmitriy pike in the whole band 80 on the reception. Radio 6 anna demetri pike. Radio 6 about fashion power to all radio. Anna 6 anna dima pike.

Radio. Anna 6 anna dmitri pike reception. Radio alla 6 anna dmitri pike radio. Anna 6 anna dmitri pike to all reception. Radio 6 anna demetri pike I asked for a microphone help I don't quite know how to receive therapy.

[00:10:11] In particular I say.

[00:10:14] Must be juvenile.

[00:10:19] ari radio leonid 6. konstantin welcome novorossiysk. Gennady Yanovskaya at the reception.

[00:10:28] Я. Papers understand. Somewhere there is.

[00:10:36] This is roughly the indicator

[00:10:39] Started showing lines of points on a map in the Arab rare somewhere in the middle in the Vsevolozhsk area primo.

[00:10:48] Well yeah even. I don't know. Once questions to me about places that is.

[00:11:02] Come on, I've already forgotten how famous it is.

[00:11:09] But it's further there towards the north on the m4 there's the Zarechny village Zarechny is a hospital of regional importance approx.

[00:11:22] Yes yes it's all up there.

[00:11:29] No other pressing questions. What's good. Thank you goodbye all the best.

[00:11:42] konstantin novorossiysk 73 radio anna 6 anna dmitri pike in the 87 reception range.

[00:11:53] 6 7. By father.

[00:11:59] 6. So radio mom 6 anna tamara ulyanov. Greetings arkady arkady nadi at the casino.

[00:12:08] Like replacement aircraft carrier formed first days plus 35 nikolai and dawn settlement it's near kropotkin city as accepted at the reception. Yes yes yes.

[00:12:19] Here looked at kerch maritime.

[00:12:25] Well yes they did see for themselves. Now they just did the empire's prime at the reception first.

[00:12:33] I see okay. Since we're right next door neighbors with the high neighborhood literally good

[00:12:41] Good

[00:12:42] Best wishes for health and good health. All the best to all three so far clarified.

[00:12:48] I even my fellow countryman gave away his vladimirov. Which is.

[00:12:54] Lucky lottery ticket drawn. And everybody here lived in a folder and here's a guy.

[00:00:54] Lucky Lotto ticket pulled out of the folder and there was a guy.

[00:00:01] Shouted the whole thing will stay with the clouds I thought one vladimirov. Well, yes. Happiness of health.

[00:00:14] Preliminary voting looks beautiful kol as well with butterfly radio anna 6 anna dmitry pike all welcome. Radio alla 6 dmitri pike. Radio alla 6 anna dima pike in the band 80 reception. Radio anna 6 anna dimitriy pike. Radio anna 6 dmitri pike all on 80 reception. Radio anna 6 anna dmitri pike. Radio anna 6 anna dmitri pike all reception on radio anna 6 anna dmitri pike. Radio. Anna 6 anna demetri pike 80 band radio 6 anna dima pike on the reception. Radio anna 6 anna dmitri pike. 7 radio anna 6 anna dima pike tatiana. Radio 6 anna dmitri pike. Radio diamond 6 dmitri pike all reception. Quite radio on 6 ohm dmitri pike and on 6 anna dmitri pike for example. Range 80 at 6 dmitry pike radio anna 6 anna timoschuk all reception. Timoschuk test system. By. However, see loco expression repeats shortly at a load of 1600 somewhere it turns out. Such things went well. Slightly so to say 3 thousand years of life shorter this 43. But the reception was a very good specialist.

[00:03:16] It came out that way we had good talent.

[00:03:23] Didn't get what didn't get. Well done good good good. Bush had everything obvious that lost for example panama is a new lamp at all and so it's like it's only just. I think so started its life I take it looking at the second grid shortly all in the plus fly through. So everything is normal here. It's not jumping in the negative yet. Who cares about the cube. The plot of the movie hello to you and your children on the 8th of March. Hero of the Soviet Union. All the best. All the best. In Venice too. Happy holidays to all the women. All the best. All for now, I just wanted to. Third two kilowatts goes to radio three kilowatts kilowatts this.

[00:04:32] Both money for that.

[00:04:35] Ivan Kharitonov for example.

[00:04:38] ulyanov boris three zinaida ivan kharitonov at the reception

[00:04:42] zinaida kharitonov 5 9 +5. Vyacheslav novotroitskoye e.g.

[00:04:48] vyacheslav novotroitskoye taken volodya vladimir 59 plus 20 at the reception.

[00:04:54] But here all accepted well accepted accepted. Let's hear who else was there. Let's hear who else was there. The three twos was a Toyota at. No one's there volodya got it volodya what you're working on.

[00:05:16] One to the north sneaking 100 watts of regular power to the reception.

[00:05:21] Now here's more about what a micon 78 and that's a 78 wait that's a horror of some kind. Somewhere there's a 78 and we're like I've seen it on the internet. But the little one sounds good to you at.

[00:05:40] O. The main thing is to have good motivation.

[00:05:44] The power of it all like that. On the internet there were like almost

[00:05:51] Similar very similar machinations.

[00:05:57] He understood me here that there's one thought I don't know and probably not tearing up my dreams. Also on this account. Long story short at 700 56 pro. I do not know who to advise, I do not know in short, I have to go home to eat, sit and spin it. The answer is worthy of him what is mine and 850.

[00:06:23] In short Vyacheslav has taken well 750 about it is my dream at the reception.

[00:06:33] Well there's this one place. I look at it I can throw on it and I have to look on the internet there price tags are 64 70 already and now I don't know now with his prices actually this dollar as if he wouldn't call us before the picture. I have a comrade.

[00:06:50] A comrade has this transfer but another comrade is selling but selling for 80. I'm not ready to accept yet.

[00:07:01] But I don't know if we're overpriced with these toys in my opinion, but they're worth a few things, not that much in my opinion.

[00:07:14] I'm not ready for very expensive either. Especially says another reinforcement of 120 let's go get it. Where's that kind of money coming from at the reception.

[00:07:23] You know him. It's about the one that was at first bad, but here's an alternative from 143 to 140 at our moc. The short station where all the lamps are. He's a thinker, he's kind of like the organizers. And sort of like well in general for 10.5 short he would send it to me and I understand. It is clear, because you can not spin the same way looked on the Internet looked at

him such a huge goddamn suitcase. On the one hand, maybe I would have been glad to rehearse and good riddance to such things, but on the other hand it is certainly an interesting movie. I listened to it also on the air 156 in short for the way it works. And a fitting finale to his on air sounds of course the assumption. How you can get out of it. Well it's kind of how he is about it. And honestly honestly you know there's a clean approach. That's how our air now and spend there was like in the 90's when the people sat one on one on the air there really I know for 300 seats shortly should have been cleaner shortly to do. To skip the lanes to cut the circle to listen to someone from three kilometers away and all the left side. In short, on all sides of the short time there were three people on the air waiting to be handed out in time

[00:08:55] For the amount of time I listened to about Trotsky, in principle I didn't like it very much. And then there's a very good one that Yermak is putting out now. But even cheaper than 50 thousand he created himself on August 8 and very even worthy I say you can look at the Internet review is very good. North on the receiving end.

[00:09:26] Who puts out this yermak at

[00:09:30] The mercenaries began to be allowed in the reception

[00:09:34] How do you get him out of Kharkov?

[00:09:39] Already disappeared and we have a lot of them already. It's in.

[00:09:47] This plant how does it do it or

[00:09:51] No the factory started making the factory but now I don't know maybe they don't make it at all anymore. But started making literally about a year ago he started making this yarmak at the reception.

[00:10:06] And compared to what kind of transfer can it even be compared to these here again a loser of three thousand no one anywhere or anywhere at all. Or how will he arrive.

[00:10:16] If I don't want to mess with your head. I don't know what else he's compared to, you have to look it up on the Internet. I've only watched him alone I've watched nothing else. About the comparison I didn't watch anything. I only watched him at the reception.

[00:10:37] Yeah he watched it I got on the Internet watching how they're doing. And then you know it's all going on and you watch and 5,000 nicknames watch on the Internet how they work there just include it on the button and the noise of the airwaves in short, you know. I understand but there's customs to line it all up in short. I do not know, but if overboard as they say everything is cracking and how to write, I think the first case of something to smooth things out in short. And if there is no altyn, then I do not know here even now it is worth 850. In short, he's taking me shortly saying that I think for 5 thousand to bet there will be maybe a little more beautiful but there will be three on the table

[00:11:28] I see, but now you have for a schumacher how much.

[00:11:33] It's only half gone.

[00:11:36] At impact that's generally great I got 59 plus 5 airwaves noise on the reception.

[00:11:43] Well no no I'm just happy right now listening on this very speaker I'm sitting listening short channel here is how it's regular short in this 850 m on it now I'm receiving and will proceed to elevate. And when I'm wearing headphones it's beautiful, I check the font, I lower it. And then this monster or whatever it is there is extreme and also raised also the book at all clear. I don't understand anything like in the good 80s and 90s. That's my ether for example.

[00:12:19] I see, I understand, Vyacheslav, but I have almost zero noise, zero noise at 20 on the reception.

[00:12:28] Yeah, well I had a bomb like that. I got rid of it later. And first there was a short advertisement that I had here the antonov began to rope in short with cable like all the noise I collected all these lanterns short while I collected all the lantern noise and here in general what not turn on the television in the kitchen turned on shortly saying this 20 channels short all went crackling shortly saying in the air well short the nightmare once I made a triangle short everything and everything disappeared behind the ground more everything as it should and for the ground where there is a noise and the ground does not flick there for example.

[00:13:12] I see I see and I have exactly like you just said I have a ruler now it was done in the fall it was done on a different Russia people's work. What it did and how it stayed. I just have a wire and cable coming from the North, and there is a 27 and a 13 meter gap in the wire going up North. But the noise is terrible, just terrible noises. But I'm going to start doing it with heat. I already have a mast, I will put it up. I will. I after the famous master 48 81 kings came here for the palace of Soviets club. That's how I started on the triangle reception laughed.

[00:14:04] I think that's the way this whole thing is going and the antenna zhuravsky is making noise there all over again the left will be cut. Bright memory and you're about 80 percent cleaner for sure, but roughly

[00:14:16] Understandable but there's more. Even though I have a private sector, but my lot is very small very small and we've already figured out that just like I said at the reception.

[00:14:29] Finale softly basically 29 over 100 here for what I want. Of course it's within reason here you can for the sake of something think shit he's going to put two grand shortly saying understand that it's a lot shorter between them now and you understand how you started to estimate how much it's going to tell and how much it's all going to be. That it's just not that nightmare short as a spider in a spider's web short in these walls, but there is one idea I do not know where to put it short that without all the hassle without anything. The width I mean here is

shorter to make it, but I'm on it, respectively, all the other gun. I don't know if I can get a clearance for this antenna to go up 40 meters. You don't need a permit or don't know about that.

[00:15:17] That's the kind of decision I'm going to be putting up. I have a factory mast of 10 elbows of which 9 are whistling at one point and one elbow instead of 50 is the factory aluminum mast went 55 millimeters. The solution is the diameter of the pipe. It is the factory one. I'll be putting it in. I'll be elbowing from it already. I'll be doing it on the receiving end when I've already made up my mind like that.

[00:15:54] And how tall it's going to be I missed it.

[00:15:57] Exactly 16 meters on reception.

[00:16:01] Oh, I get it. Well in principle it's okay that and the height is basically okay 16 meters. The method was also counted shortly everything by this algebra shortly. Then I look at the terrain there all the way to the ground in short, everything is understood. In short, everything was counted by the computer. Well also about the same was 17 meters mast to catch. This is all decent at 50 meters there all as it should be. Well, I also thought, well, there is no triangle anyway, you know, I already did and all, and before that I believed that the same as you now the process. He was putting everything together, you know, all the workers are floating or running, you know, everything. Everything that can be collected in short all the negativity. Now it all hangs on these little guys. So he has to sit in all directions shortly all with whom you can and can not. But the fact that at least I don't come out a hooligan wanted to serve but it's creepy in general specifically harmony so many of these carriers on you pancakes I don't know this I personally don't know here may be a version of all included I have there but right through every there will literally three kilometers short harmony three kilometers in the south as they say carriers there such serious just such things like that for example.

[00:17:24] Vyacheslav well you know I'll take note. You talk about the kramnik. I just looked it up on the internet and it says that there's a minimum number of points with it. You know it's a matter of miscalculations on reception.

[00:17:43] But I'm seriously telling you I got a normal theme. I didn't expect it myself. Maybe it's low yet, maybe it's because of that, I don't know, but it's 7.5 meters and it's far, I got all the hits to the north, turned on the wall of the triangle and a meter and a half from the ground. Maybe that's why yet. But to raise it, I think all the same noise will not be such as the rope will not be. I think so because it may be the population of the ether itself may grow and all. For example I get it.

[00:18:15] I figured out that it's nothing about judges and not just once in a while myself and I'll listen to it. Thank you very much Vyacheslav I took you into consideration at the reception.

[00:18:29] And it turns out that the field cable is shorter than the two wires that go with it. So I took it and all the lighter ones I had in one strand and I basically made 80 meters of it, so I have

one motor that stretches horizontally for seven and a half meters. Then what's there is another 27 something like 20 meters of cable 50 and. Then what's more there started to adjust and everything turns out to be about one in it now and two ranges short like thought I was captured here in the ten and the insurance is short of.
