Such information Dmitriy trainers pavel radio zinaida Shelest Kharitonov humor and Lesha photo temperature is about a degree and a half, the wind is blowing hard for two days. The minister at the reception, Dmitriy said: "We have the temperature is about minus 5, but about two hours ago I called the wind forecast up to 14 meters per second, but now it is about meters per second. The temperature outside is about 2 or 3 degrees. Yeah. We've got more serious gusts over 27 meters. The antenna's all wobbly. Well, in principle, so far so good. Two, two, two days, flight's normal. Or is it like them, there are two earth antennas and of course two at 160 180 meters. What a beauty. All this is accepted. Yuri Makarov one cable 8 40. The height of the two is 14 meters. The mast is made of shit and sticks. Works at. It is exactly the same on me or rather as one camera at 40 points made. And to the same camera at 80 160. That's how I cheated so to speak. In principle it works at 40 excellent builds and in 80 and 160 meters is also present. Somewhere in the order of about 17 meters on the reception it is decent decent. But I've got the votes for a plot of 20 I article yes I have a plot of 20 by 20.

[00:00:05] Yeah yeah yeah. I've seen two meshes two meshes connect the control and screen meshes connect to ground and through the ring. But that's the one before 2000. And so he writes two kilo volts he gets 900 watts there for example. Which is again for a while. So no further questions. As of Wednesday night. No I have an appointment on the roof of course the presentation of the five-story building in. Sitting. Even a little over 20. Loudly the national team influenced the sixth. Anna olga nikolayevna appointments. The order of passage varies from the same regions themselves take to 9 points rates in front of the fourth district took plus 15 then the rate disappeared for eight points. Soviet. But I hear you loudly. Another 20 years love I did not take you throughout. Maslov added the head of state. If my words followed me. Later I in

moscow. For andrei sechin reception. Yes. I just that. A. Mother. This is district 9. Father samara samara. 1939. They're trying to make contact now. This. And even the result. Odessa stage of preparation. The reaction is clear. In short, it lies on the roof under the open. And gave up most of it. The main value which lies on your roof and you never have much for example. There is no snow here. The painter is a janitor, too. The flowers are in full bloom. Ulyana and her gathers all thank you very much in sochi for the city year goodbye. Yes 70. By. Hello Anna Olga Nikolaevna. And he in response. Fedor andreev is here. All is well. Ivan Krasko. Dmitry fedorovich nikolai nikolayevich.

[00:12:05] Today. Does not give analogy nikolai ozerov. Accepted wonderful thanks for your help. I have a question about germany in the 70s and 70s, I understand you're russians living there, you speak russian. Having received additional answers rfc president nikolai thicky. I am a little bit like that tonight. Thank you for coming up. I have a lot of attributes for the city. Goodbye all the best. Dear anna olha nikolai here to be. Anton 4 Belarus once again. Resources america spain geopolitics and i haven't worked with european sanctions for so long that by the way i forgot even still in russian. Spain Elena she is on 4 kharitonov. Dmitry pleasantly wonderful good evening I myself perceive loudly all my problems. Andreev listen to the reception. I do not accept Helena on the advice of his mother in Madrid, Spain, but it is clear and what time you have Angelina at the reception. It is clear clear clear clear and high from the ground high is for example. How much. 4 understandable or 4 kharitonov influenced olya and nikolai but accepted now in germany too. The station was in the Russian language. Here you are the second station. I thought that was it. Here they approached the station from there the city of madrid also reside. You are Russian for example. But it is clear yelena a on 4 charitonova america yours. That's it. Well, thank you, thank you. The city looks at the history of the city of sochi. Do you have any questions and answer any questions at all now this turn and you are happy with how it works for example. I see. But you don't take me loudly.

[00:17:06] April. Understood understandably. Elena anna 4 children 1 vote 6 anna olga nikolaevna pavel. Well thank you. Well yes here. Like here in spain, for example. I understand that you can live anywhere. You can live anywhere, the main thing is to have the means of subsistence to live on. So the new Antena is not going in your direction, not towards Europe and not even towards Spain, my antenna goes to the ninth district and works in the opposite direction. Listen Elena Anna 4 baritone according to you. But the transmission is changing it. Eat well served. But again homesickness here for example. Clearly, but clearly clearly elena on the right Grekova 6. Nicholas it is clear there are good guys who looked. In the suburbs of Moscow, what power you have answers. I very often hear what people say. Thank you very much. With regard to Dobkin health good luck. Happy Holidays. Any other concert is only. My husband and I had to. He did. What. Only to him financial help can not be at all. And that's it. My daughter came back from Siberia and went back to new york. Could you them and the call for unification. I categorically do not believe in her. Я. Today's the day. That is not hear you hear boldly goodbye great money broadcast children's clothing and diplomas who do not know. I can directly hear his first reception. Foreign policy reforms can be. And you. From our territory is no longer clear. I took or who else put what would like why.

[00:25:01] A little later he all else who. Along with that to meet and who was sick. We already have a good evening. Zenith St. Petersburg in a beautiful memory recently. I don't drink and don't smoke, who knows your kind and series about. In the last. Turning. I have to. Waving his hand Sergei. Right on his song about. Worse than youth spoke by. Very cheerful and. Most likely the principle. There is evidence. There is and. S. That I benefited sacrificed the referee after the crisis often he was clearly not leaving. I am a young handsome clearly strong character of the game. Let's hear who else approached the dialogue city ulyana on the air we will come to us I will show you a woman. Reception. It is very desirable that everyone is just very that and. But still... I suspect that for all that love Russian culture, you can by European standards. But I don't see anyone before that with Yura. I think about him if I judge by what he was accepted. Well, I think he's just one by one with a powerful arsenal. Today we are just the case. It's a pleasure. Well it's not that kind of fashion in Russia they have to have aluminum, not a light bulb of a Zhiguli at 15 meters. They're already after the transition. Of course. He's taking us to Australia and England. But. Simply. Glory to Russia. Dmitry andrianov participant. The artist's daughter was born. her former friends depend on words for the future. Study. Him. Recall. Maybe you disturb that sued the child. Liverpool specifically awarded. Sampdoria might. We all understand. Unlikely to cope and start winning.

[00:31:40] And. We're moscow. But if suddenly something happens. And yet. Because after the presidential interviews, I kind of have a television set and no one could see me or the roads or anyone could see me. But also the mood and forces and suddenly my in one place a change of mood by he walks and here no one won. Well suddenly his. By. What concessions not. The season is a hard time. Is it easy for him hard. Somewhere he is sitting this season. Kerzhakov expressed. And in aggravate. South of the country should be included in the top 200 on the streets of firms very rarely if they no one could what in the fight in the area in the area of poutine all in Ukraine and contrary to this started the campaign his office and he explained me everything in order all laid out. It's heating up. From here it is from here and all the accumulated all look at the phone. You can guess that kind of thing and you probably what there was playing with guns I was standing good and not laughing. So yeah and how to say. But to go on stage like I do not want to. That is possible to go myself to the wrong place watched this case. Well now the participants of this closer to who suggested that is I as in the anecdote can it to the second mouth do not give a checkers on the head for. First it is necessary. By logic, if allowed by Nato but to the devil 30. But here. But years in five minutes when talking the reception will abruptly abruptly the next day abruptly and abruptly dropped in with frosts around the house.

But here the interference began to put +15 and all your questions. Andrey thank you I did it on the internet. Your criminal government is making sure you have no complaints about what you are doing in order for the two worlds to be disrupted. Radio freedom were occupying him not appropriate his purely Syrian security services and even had disagreements and in other cases for example came to and horror he was lying so I could I very well so long these questions from the conversation who is there still his. It's those who are still on February 8. I say me. They exchanged a phrase or two like 8 and a half and I don't know what to introduce to the soviet empire at the beginning of the summer I think Leonid was telling Iran what kind of questions and I don't have any questions. Now I waited in about ten minutes because I can say this reception save in ten minutes you can get to February 6 and back.

[00:14:24] Let's then in about 15 minutes 10 5. These next to the sky on this kind of thing costs a lot of time. What kind of bullshit is this. Tomorrow's report instead of doing quotes will not look big. They need. Pressed one day now watching the air intercepts were heard on the collapse of some kind. And I have such an antenna. And the first who was vadim borisovich radio perm boris sergeevich radio 1 boris sergei roman anton 3 roman leonid maria 5 days plus 15 hello alexander. In tambov reception alexander zinchenko 9. By the way anatoly st. Petersburg quite loudly stated where the dawn should listen to two stations do not know all but worked in the family and the designer. And suddenly hello. Five nine plus 15. Seryozha how is the reception there is great brother great on the A in general is beautiful excellent and on the host. Gone in the fog while surrendering anatoliy sedov homeland 7:3.

[00:17:24] Conventionally speaking the housewarming party I and my wife already recorded in the machine didn't go away but went away for a while for a while will be water. All right well have a nice holiday bye. But the last time the bear worked, he also had what experience Salavat Aliev had, as it were 500 for three for three, the situation is the same there in the 9 m area and the content is 30 meters high and it is a shame to give the same amount of money to the same three fifty. Somebody this is in your basement district far away should work. Who is responsible should behave at court. In general, the series has long been going to now look for. I have radio communication already learning who answers the account we are talking to each other will interfere all answers the silver frame yes still on the ground should. But as an officer two masts between them and vertically through 10 meters horizontally at 37. This is not a square it turns out and the frame it is stated type don it in one end should engage you just you just have innovation. You hit the brick with a brick wash. Well you see they are high stitching the bottom one is about 17 meters maybe. Here the north corner is lower there is not enough height I have at different points 15 meters can 14 put a new strip of 5 6 meters into the ground and reception. So it's not as if it's not perpendicular to me down you've got a webbing on top of it going down though another webbing at the bottom then into two parts of 10 meters each but in no way vertical with a slight slope to the east and not enough height vertically and higher.

[00:20:11] That's to make it look like a bookstore to improve the books and record an average of 10 meters. 50 years. Understood and that's kind of how you have it and the term. Luzhkov understood not really all bad about everything. At least it's Smolensk and it's still okay. And then count please 8 wounded 2. On dear friends for you for us. Fedor korotkov name eldar at the reception for 10 minutes ago communication with him was reception. I wanted to show your station. Started getting through to the 35th I was passing open 35 at exactly receiving on the reception through a lot and loud 15 18 20. Well listen Serga how are you going to be receiving from me passing through and opened up eldar. If three planes plus 20 still hear few people believe this 20 goes better the passage went. Recall sergei tambov reception yes sergei dear once again glad to hear your voices once again prayer but your church is rising report up went up check the nine. That's how your station began to rise. Sergei here is the information. Just wanted to say darling for a while I have come to the place of the main mass is still not that well thank you. Health to you and the meeting microphone to alexander. Now for about forty more minutes, then we'll plug it in. Those who these two series budkin work yes yes thank you. And the denouements too 5 9 5 9 10 to 15 years bought the name of sergei rodionov.

[00:22:50] zinaida galina olga the reception of sergei dorenko next on the occasion of passing more than 20 cars it's a little bit difficult in my opinion I think your rate recalls olga. Very glad we crossed paths once again, God bless your health. Yes yes yes yes health brother great very strong very powerful follow 5 2 TV presenter and host all the best. All the best goodbye good luck. Thank you dear, but I wanted to ask you a few more questions like this. I wanted to ask

you what do you understand the microphone or Japanese computer microphone we have now, I wanted to specifically long-distance communication with my voice. You know, on the reception of a signal was good such a swing as it is volume as if you have there in the background a little bit closer to the microphone and speak directly to 15 20 25 centimeters should be as said when approached now takes his voice on the reception. And try here even louder, better close to him. Try to find the shooter. 8 years old, the fly says yes. That's what I understand, the level of the pitch went 25, which is great, now I'll pass it all the time, he'll say I have a good ear for music. But the thing is, now you know everything, and then you feel a little bit far away, like you're sitting there behind the door. And now you come right up close, like when you were taught you know what you just got in the hallways made up someone near the door who was running somewhere at the construction site or who was sitting at someone's.

[00:25:16] But I got in a little bit because the elephant. It's too quiet for me to turn down the reception a little bit can be considered in a couple of minutes will appear on the expansion then and there will be a reception. But as they say walk just on the aeroflot just like a cruiser has put me myself no wiretap as they say about you put taught by me I think the microphone here for this sometimes louder sometimes not afraid. Sergei for example was taken but all is well. It's better to make the whole thing clear. All right then, thanks again health 70 and goodbye. It is necessary to earn health, the most important thing is that no one gets sick at the reception. Thank you, goodbye, everyone helped. At the same time I heard him... Going down. And run is possible to dmitri. Radio 2 dmitry anna beetle. Actually. Yes, yes, run. First wanted to spend with you now, but did not wait. He answers. That's what I'm talking about radio programs, I took first place on April 2 and the reception of high ranking people. Yes and came in general in a good way.

For the sake of it I came to Ingushetia. There is no one there. I don't know who you worked with there. All his films I think vasily dmitry tambov is my krasnoyarsk. Nikolai didn't work with that. They are on different frequencies not that insurance companies. Before the start of the competition sky and silence. And there was no one else of ours. [00:41:39] And the fact that it's been snowing and the wind is so staggering up to 20 meters is good. Boris fedorovich while to the north fleet a little bit such also from less like a prostitute. Two days in a row, wet snow and rain poured as far as tomatoes in some places, even up to 50 centimeters on the tula so much snow. Machines are not working, they don't want to go somewhere. Yes I'll win but you're good in all areas I don't even know not under me but I mean under everything guarded. Come on, cheers, cheers. For where three years to no one. Andrei, I have a question. Please. Yes, please. I have been living in Odessa for two years, two centuries, I can tell you, take Dzagoev for two years. Leonid Olha 20 radio Anna and all I understand I did not just 20 rhodium but I was not really interested in it, let's just say not in the UV, because I see now a second now 32 such an agreement I try to do a thesis there, at least not received any interest not to talk about potatoes. Here you are and thank you. I will not keep you any longer. I won't keep you waiting any longer. I wish you all the best. 73 for now, goblin. About Gogol. 2. Very much in these very new. And please if I can answer and put the card so you can. I think that no one was already engaged I thought that everyone is engaged in this case as abandoned the certificate I can leave and so on. It is clear that in principle this whole thing is done electronically through the same blog all sorts of cards there. But here you need exactly by. I wrote for myself. Thank you hold up I won't do it again.

[00:46:19] Thanks for the good stuff. Oh my god it's half past 12 already good night you can say good night. Have a good night. 73 Bakaev she we're the old guard it's for a little over 60. So I but kind of all not but kind of easier for me to the case these funds a year ago opz continuation of the whole program I recognize radio communication channel and 10 meter range for the time. Yes I agree with you because I communicate with many people from your age as you say old school and they don't change either. Let's just say new technology is and I don't know why. Maybe this. I do not know what kind of fear or unwillingness, but in any case I respect their opinion, what they want to do as they say and do want a radio connection on the Internet, though that is it. Everyone has an opinion and it should be respected. So there is no question everyone is free to think what he likes. That is the opinion of Andrey Andreyev. That being said, not to offend you a little bit, I understand what the character on the card said. When I worked in the south, when I went he sent you a diploma, some kind of a review there and Afghanistan and sex and everything else is all one. I even put up for myself there is a lady there and my front all. And how many things will you bastard your age. Well, of course I didn't go into that business and went into another one on radioelectronics. I didn't catch it but still it was nice though went down my alley awkwardly.

[00:48:47] But on the Internet you know, you looked at something and that's all I understand I found myself in the hands of the whole as they say saw the card there saw the image in the form of photographed with my equipment complained about the perception of the subject on the Internet. Yes I have become one hand let's say I agree with you it is very nice it's like for example in the service to find an old postcard from my grandmother, which congratulates my family on the new year. And this card is dated 1987. Yes of course it's there and so on and so

forth but anyway we all watch color TVs we use cell phones we drive foreign cars not that foreign cars in general we drive a new car there we use microblogging technology and so on and so forth that is progress does not stand still then all the rest. Well roughly speaking before people wrote with a pen there somewhere manuscripts gave lists did, etc. etc. But we can not treat them as such and especially so. I think that technology goes forward it is not necessary to stop on the spot it is necessary to go forward that is to understand something to try to develop not to stop in one place one and the same time it is not necessary to forget what was before. All the same, more. In the same summer about the same way an old movie that we usually get promoted on TV at the new year and it evokes some good feelings good emotions as correctly defined but about the same thing you can reference 2 press as it was on radio communication thanks to radio communication and only the ways of confirming radio communication have changed.

[00:50:52] It used to be paper now electronic but anyway I don't mind paper parcels but I don't mind it at all it's all good. To me it's like old movies or old movies about Khrushchev listened and formed. Now everything has changed, that is, standing moments are utopia is necessary somehow to move forward. But this is my personal opinion, I have not imposed it on anyone. And anyone is absolutely free to disagree. That is the way it is andrey, for instance, watching you, I totally agree. All is right, everything is moving forward, but we have to move too. You think everything has stopped in this case. Of course not. All this is perfectly clear about whom I pressed to look where his hand takes off with his eyes and everything is nice too I agree. We had a phone and now smartphones with a bill. But the radio communication will remain in any case, even if it's dark, even if it's all there or square in this meter range. I hope that any radio communication will stay, and it cannot be replaced by anything. But. Two-way of course the attitude to this voice messages. Well, let's take kvn. But it is one thing you live you feel the emotions of experience as he himself responds to you. In what ever form there and so on and so forth, but this is live communication. The right leads.

[00:00:00] If there's an informant you have to take it out and put this equivalent there. The people there in america it will be different employees it's still a contagion I need such a big one somewhere to look for the same one. Anton this is the usual where the reception. Well yes I know professors typed words. So for the transfer. And so he collected himself for the money. For himself is not a fool. I was offered for three thousand. Trefilov I think before your new think me. Or there was money of my own. I need a tool. Maybe someone to throw someone would not hurt. And I have no one here on the edge, I'm practically alone in the area and there's a scandal 100 kilowatts for 500 light bulbs to connect together and parallel in parallel hopefully at the construction site that will be then and will be. I do not know but if there will it will not adjust but at most then put the dean and there electricity cut off they do not. You look what a difference right. And hats you can powerful resistance yenisei start twice. I never thought about once so it would be 50-50. It's the equivalent of the same that here will show that there already with you nothing changes just the difference and the secretary. I'm just wondering what's really out there and I'm telling you what. We never froze from tearing it you can tear this device not cable. And we don't

care what the difference is there. Oh well yeah also makes sense. But you need to be clear what you have there repeat. If there is a transformer of course there will be a difference. You have to have the cable be the authority of the reception.

[00:02:21] I've got 75 smart there is further reception for drop. Here look half of Holland for 28 meters factor 85 leandro 54. And here's two lamps 54 over 2. That would be like 108 and we have to have four days to match the price. What we have inside. Also what do you say. Yeah matom nothing I have any here one and a half or any particular length 75. By 75 I have in 14 13 75 and all there. Any length of 50 and. So the story is not as much as there is. Well as we have a triangle brought up it will not go by itself we need a transformer first and then the builder himself but it was exactly a representative and so maybe you try it so first this one is going to be scrapped leaders and frames and then believe me it will be 80 and there will be 120 you will not be able to collect you somehow do not understand this gross transformer in cable networks it you never had in triangle break and now it goes all this 70 kopeck clever 160 goes and then 13 75 goes. I have it then on the triangle cable it and coordinates the reception into the air you have to go. And here in front of this frame from 400 meters to break the nuclear line and the death of Hiroshima on which the container went to the reception before the cable Karabagh witness. Generally think by the measure there just god there me standing theorem zero put more reception here signed it is recorded by stealth. You say that there is a reception. Nikolai Vasilyevich it wouldn't fit the prime minister about me.

[00:05:05] I strongly welcome the reception. Yes I am our very you see the low antenna in this life at 6 meters. So I power everything does not give. You understand me on the arrested reception 20 managed to hear victor ivanov. Vanechka, tell me how you measured it. I gave you an example, Viktor Ivanovich. Give him examples of how many you have how many 12 I said 30 maybe more meters. And tell them the story is the reception. Well that's the definition of what voltage drop in the cockpit. What is the landing in the chamber is normal well hear a good burn. Victor has mastered all the techniques the main thing is the burn. Victor Ivanovich good night is always early. But Nikolai Vasilievich 22 is coming and you until 20 do not forget. It's crazy little Arseniy Ivan sits in the Suvorov. Victor once welcomed you senseless why the money to fund and then we were born here. But you have a microphone. I see, Vanya, I said I'm working on low power. In general, I have more power now I do not press the content I crap. So that's what I said. How to determine here it seems to amplify or amplify or let's say for example the power. How to determine the voltage drop that percent of the cable gives a kilowatt of power he has a device to measure the power. If he plugs in at least three regular cables in a week, at least the equivalent of 50 m or 75 for example, and he turns on and the power, let's say he has one kilowatt, you have a witness to the equivalent and we have it. Kilowatt and now determine that he has come in April 200 meters not I understand you 200 meters of cable.

[00:07:21] So gone you have to take that equivalent there to determine from the antenna not. Not necessarily there remains only to change the antenna from the output one cable even let this transformer one stand up to the light bulb them to determine that he has the antenna turns out and there credits this equivalent and everything. And here also turn on the transmitter and see what he has this number, it will definitely show him that there is a kilowatt, and it will not be.

Here I read I had such a shock, I have a landing almost 200-plus of these you get but I have 36 40 meters of cable. Here's the deal. Here I want you to demonstrate when there is time and it will determine what is the antenna coming to you and it is coming more or less coming to the reception yes clarification that this man it is for 10 meters if it is 2 will show. In general, why kilowatt then give even 50 Russians and then calculate as a percentage on how many falls there is not necessary kilowatt it is good but there is no resonance to change. Alexei Alexeyevich now the plane I came up. I was going to look for something else. Create advice to give advice. Viktor Ivanovich, I salute you. Good evening. It's been a long time since we crossed paths. My homeland seven kharitonova lekha size 9 plus on the bm also a long time we have not crossed paths problems and other stuff so it's 25 I hear you exactly the same as this colu 5 elena. Elena that's about 20 or so but it's also loud and it's fine a little bit quieter there goes about ten or so 15 I've got my antenna working so it's so ridiculous.

[00:09:37] So we've been talking about this cable. Yeah I've heard heard it's going to fall anyway and how it's going to fall anyway. Where to put them. Logic. It's good to hear. I do not know alexei these actions. Of course here welcome here radio joshua true talk well heard. Five nine alexey in october for example yes alexey hello dear hear well from 20 to 20 but me power 300 350 watts somewhere no more than an hour. Antenna quickly gadget it is broken and the height of 8 meters. So excuse me as they say on the band missed the time so far. In time I will make sure. In time, Alexei make antenna and will do a continuous antenna that is, I will be running two cables two system cables to let the block and will have them and the losses will be less at the last connection frame let's say 50 m and 50 m. We obtain that at that will already be less losses. But this is already experimenting, but you know the sequence of connections and parallel to the parallel will be 10 25 and at the last will be in general in a twist or the same hole. For example Vadim wrote down between the gap one cable and the gap where the screen there too the cable screen together connect but do not connect anywhere and that's it and I would go there. And all sorts of things there can already be served as it should be. In short the losses are a lot less I was doing these experiments a lot in the summer I had 272 losses there were my cable.

[00:11:38] And when I had a parallel connection I only lost about 50 at the most. Alexei Alexeyevich, you know, I'm telling you how Kolya advised it, but he can't run two cables. That's the thing. And they have to be together then the effect will be. And in this case it still works well on other bands. But here it seems to negotiate or switch with the resistance for one band exclusively turns out. Here you have a microphone and work I will not hold you on reception. Then there is such a well yes absolutely agree with you. This point should be taken into account. It is true that two cables side by side will work fine and in the other bands it will work fine. I'll tell Vasilievich that I was picking up the cable but I had exactly five minutes after the reference point I was 50 meters long. Can 55 repeat or on me I do not remember. Now I did not want to open the book. Here at 50 meters I have it by construction I don't remember 52 54 meters how much is there. So 50. So I have filed ten times. I, too, with all due respect to measure the strip but in normal. And as there measured that here the man showed that he showed himself on the reception. But that's with two cables or with one frame with one cable. I don't know about you, but we have such a cable, and I've got some guys who use a cable with a

20 or so millimeter length, and they bought it for 200 rubles per meter, and there's no loss, so there's no loss at all.

[00:13:44] We usually use 213. I've already checked. But there's losses anyway gave 10 watts on the output then it only gave the first one got 700-plus for 800. This is checked. I don't know don't know. All is fine cable is very good reception. I have a good high quality cable is worth a spout who cares and then see the name of it. It is so it is not thin let's say high frequency. The cable is specifically for this kind of thing so there is no loss. I honestly say I thought so too. So go to the site literally last year in the summer I checked. So this is how I got results for a while. Yes yes but I only lost less was almost none. That's when the gas chambers I used the same for us such a 40 plus meters was less than per sq. But I had a silver screen in time from central Asia 1.2 million This is a military cable. That's where I got in general on the UHF gave it a 100 watt equivalent showed in the tent my interests as it should. And I took it to the end of the antenna camera. My son had a scandal and he was moving around all 90 watts. Now that's how I lost pennies now. But it is silver absolutely 10 financials PR 50 all losses by them all the same reception. Well have understandably I have a high tech cable.

[00:15:25] Yeah I have a tile loss of millions inside 3 millimeters the core goes but not a core like there fucking core or no core leg is silver too. That's the kind of cable I have. Yes yes, but I have as I have 1 2 meters 1.2 is purely one wish not, but there is a small good screen military personnel I brought them we used such a cable for the equipment in the beam first in the station water wave and freedom passed on the audience laughing and then already came on a silver cable. To get on the signal to get when such a cable was used. All right, let's not get bogged down management is something to work on, but times experimented with all these cables, even 213 to 50 then another 50 to 50 more cables was not very I thought that the power was the same you can always laugh at something other than silver, but something on the purity 150 agent showed 04 05 somewhere it was the most it was not enough to the right landing. And all these cables were always a variation of the 213 to 150 cascade. I don't know if I got 65 or 60. That's about it. As far as I remember if at a frequency of 150 people but a few hundred will naturally be less drop. All right, Alexey, let's not do that, or we will write down the guys to work, and we will hear them in the reception. Yes, yes. Thank you very much. I've heard it once, but we haven't crossed paths, and you're welcome, Vanya. Korolev is the boss. No less he I'm all tired already I'm sitting for you the microphone.

[00:17:35] Now I ask this question signed she had to do so far and the second thank you dear but here I think it is a little but correct to do measurements if 2 even nikolai vasilyevich guilty serve will see the difference. Yes, me and my neighbors, what I guys are listening to the report does not turn on, even when they turn on you can still hear the Russian breath heard everywhere. That's all up to today the guys wanted to sleep a little bit stubbornly worked with a little bit well just in case we decided the day before tomorrow we knocked down good to have a great day. Reception April 1 anna boleyne philippa. Thank you all replied but I will not delay as it is the end of the day I will watch the news on our fronts and have to rest. So best of luck catching us on Sunday good to you from this weekend. Well the next week is going to be a healthy one for a long time to come.

[00:04:51] See you 73 at the reception. Thank you I especially don't look much today in the morning will be much fresher and everything will be cleaner and away let's go even better let's go bye bye saturated for now. Ulyana Kalinina herself olga Romanova galina olga. Good evening all and I am in 5 9 plus 10. All good night loudly hear five days +15 nikolai lipetsky and fine I now twenty I hear already lipetsky nikolai lipetsky guys are well aware of our still situation. Good signal is clean and the sound is without problems all the same linear, there is nothing to complain about, although we can say to each other and well, if no questions then good night. Want to stay on the frequency may be interesting to work with clients. Thank you, Vsevolod. I'm going to rest now. Blast and health be healthy 73 good luck so long one health see you bye. Seva I came. And although I was there 9 other guys here they offered me. It's amazing how close we are to each other. Here you are an exception. Because even the breath can sometimes come too strengthen or Volodya at 135. It's okay all the people gather. There is nothing new in such scaremongering, yes. But there's a situation now that's how we gather here. Well it's like that 735 is such a big cheerful clean you know we gather there jokes about all sorts but now the situation is not quite cheerful yet so we don't really sit like that right from the morning and forward there all so it's like that in paris began to gather there.

[00:07:23] Look, I'm teaching high right now. Or you tell me if it's worth raising high. I can raise now just as an option I'll see April. Well yeah I'm a hurrah in something I've made myself. Ksyusha to me the other day once he looked at me, he says well, it's understandable. I remember with the old microphone here I native chinese I am in general Japanese all the apparatus of this idea just before these tenths just two more polar. And the microphone on it says so and there was a 3-pin circuit. But it wasn't much different than what the Chinese make equipped cars and. Always on all iPhones I always looked at the five and then depending on the head voice there two three one. But in the 46m I had to put no higher than one even at zero. And here I put zero. And the high was five were lying around and there scattered. Why the antenna I removed. Now it seems to me on the hearing I do phones and audio studio they will ask a lot. The rest are like yes come on the name is also some firm not a bad thing and on them very normal listens they have a medium high but normal. So as much as the father left a lot of extra to do nothing. You'll hear it yourself if I'm on mine so that somehow relatively you can

compare this position is different. At the reception then everything is correct. radio boris radio 3 boris ulyanov.

[00:09:16] Now I've raised the pitch a little bit, but I can't hear myself control myself. No, I haven't heard much of that. Maybe on the sport side I'm a little high up now. Maybe so fresh and what do you say your opinion on the reception. But I didn't hear the 44th exact precision you have to appreciate now these are the sounds of a hat. Will it be engaged now it is then easy and if it says such high subsidies of course and the surplus is checked there well it is clear there what do you sleep there serve the generator at the construction site there without the generator I work through this microphone here this voice say such I generator where the results can immediately. I personally have not seen. You said all more often but still look and send even you busy at me on my antenna not knowing something I have clouds or something. Yeah yeah. Well I can hear you well by the way, you're always like never before. I remember your transmissions in the winter time and now it is spring, so the local transmissions have been going on for a few days and we have been here for about 12 hours and the transmissions have been going on for 44 years and I do not know how ridiculous it is to have a snack, to have a snack. I kind of don't appreciate control in the winter 44 40 years I can clean up back seva April.

[00:11:12] So. 44 diner month network and restaurants too on one one on a second offer no. The second position is a long case because I've got malaysia here too. There's a lot of risk here. 31 31 31 position and malaysia. So I need to move two points from one kilometer to five kilometers I move from two to three bags for 15 pieces you know. And I can't get it fast, but I'll find it like this while I leave it. Kind of obvious in the ears not less often that sometimes high frequency 44 44. Cycle no such an obvious and bosnia so far stopped the reception. Yes no normally all clearly showed I listened and the signal was changing down up and there Rostov tanks I have only two balls three matches us takes fire there is either good look good and residents are very clear in. So there is no problem. Yes yes yes. When in what year in the army. There somebody somebody somebody somebody else came up and for the guys now the microphone is one. Yeah I think I have highs that are too big. What year I joined the army. September 24, '68. I graduated in April from the Technical School of Railway Construction and Exploitation. I even managed to build a piece of road over the summer, and I got a handyman on my record as a track worker. First category second third senior worker brigadier and even foreman. And that's if when you open the new workers hands there furnace and the first is written and in november the twenty-fourth from '68 recognized and 20 demob was worn straight from the shift through the woods not waiting for the congo on the boots even already not worn second temps all second pairs it was us at the congo I served with Sasha one client oilman alexander lives in this great novgorod and my mother in the mass grave with him.

[00:13:55] On how we said such a field and we were there to spend the night. And in four days he didn't deserve even in four days everyone was worried and thought he wouldn't let go. The normal course of everything. So that's how the time flew by sash. Yes yes I got it, I got it. Listen, let's listen to who of ours came up to me and the guys came up to him and demanded. In the commentary for you, who met him, but who the guys. What are you so... Because I need a break from chelsea I'm not alone so my voice at home business trip should calm down a little

bit. Let's steer, please. I'll take the post and I'll take the post. Yeah, Sasha's here. I don't know if it's with or without reinforcement. Maybe our guys don't know I'm a nuclear power plant and an artery. Hi, Sasha. It's ten to twelve. Good to hear from you. Sasha, come in. With the symbols of the Soviet. All together from Kyrgyzstan. Roman anna sergei listen sasha I sometimes hear you louder between me and misha maybe you and I so to speak I have a son and east. So it's clear and 135 I'm not present very often sometimes okay.

[00:15:43] The local setting turns out so well. Good night to you quietly I hear you no harsh sounds no such a natural voice. Maybe nasta needs a high frequency like we're used to and we hear this kind of thing. I'll leave you guys alone. I'll go again, Sasha. Bye. Come on, darling, at least you're on, that's good. You don't turn it on that often. You're doing fine. 10 20 10 20. It is nice to hear the sound, by the way you have a good working scheme. Come on 73, keep in touch 5 and mp3 my 7 3 see you guys later. We will try our best. But 10 years later the family was the same. And you are so piece and talk. 10 12 Sasha, I understand the media a little bit, so she herself is not too much in the history of frequencies. Sasha, what do you think? On the general background or will your successor stay that way. Art. February. Slovenia. With little. Or. Now I'll watch two and a half and there's a failure. Now in the moment of failure. Radio 3 boris and I solid malaysia and malaysia failed baby can lift I don't know reception. Obviously this. You don't have to as. No, I'm a little bit at home now as soon as you have the middle of the field so I look like a man, because I have a kind of feminine voice. I've moved the top one up a bit. How much is left to say. Hope for sergei radio 3 boris ulyana raised a little bit the middle.

[00:18:15] Sasha is like that in this version Sasha reception. Well natash so it's okay now. But it's better now or it was better before. As I understood you here volodya you suggested volodya. For example the following analogy normal signal. The first one was also normal to read to understand how it was at all. Then when you are still a child it became normal at all unpleasant. And thanks Vasily Fedorovich radio 3 boris ulianov our alexander moscow 9 plus 10 plus more 15. So that's your name. My name is alexander, I'm not far from kursk. While working for the Ministry of Transport, it was possible to get an accordion. Sasha takes you well all but so on the pluses go out today looks like a good passage so local I understand alexander we will listen to his comrade. Another alexander sascha to you. I don't know exactly. Lavrinovich is really Sergei. Alexander for example. In the material on sergei vassilyevich road map nine plus 10. Alexander obolonsky district for example in the sense. I see. Alexander, thank you for the tip. All right, while we work with such a signal to raise the mighty, of course, our life is made up of that bars to tighten. Alexander, thank you for the tip, Vasily Fedorovich. He said he does not care about the Russians who live in Ashgabat, Turkmenistan. If you are guaranteed gas supplies to Europe, I think the Ukrainians will fight since Soviet times. Because the goal is not to ensure order and well-being of the Donbass on it can be maintained in a completely different state. They just have to health care southwest african increase my home region yaroslav mazurka disease. Why. Because there is no cure because that's your problem. We have a lot of people still have a very serious disease. I don't want to say the word manifest or oil and gas sales by. Today we want to give. Or for example. The most important thing for the sake of but zinaida elena zhuk and roman zozulya solved the problems. Or two or three. There were born two or two zinaida and elena zhukova influence. Kilometers. [00:00:00] He doesn't like as much as possible maybe that's why they so brutally use carpet bombing of Kharkov maybe that's why the Americans use it. But what's your right to the effectiveness of the Ukrainian military's use of Ukraine's weapons. What I think is the emergence of such allegedly prepare generals and the American political leadership to the fact that in Ukraine you can without fear of losing can in general send weapons more serious than the same there is still time of course. And at this basic rate that Russia is under the heel of the occupier and not Ukraine at all in fact. The point is why the economic situation in Ukraine is not collapsing and why it persists. The dollar exchange rate is holding at a decent level, it has not collapsed twice as much as in Russia. Because yes the west helps with money the west gives money and the west largely artificially does not give the Ukrainian economy a Hopkins and this is very important because it keeps people's sense of normality and does not allow panic to spread. And in Russia there is already a real panic in the world. In Russia a huge number of people started to flee even before any hostilities had started. Those who are smarter and those who have what opportunities. Because the majority of the people can't run away, but they were there and we don't know where they will go later when all the joys of the Russian world will begin, which Vladimir Putin has already prepared in the economic sense.

[00:04:24] Well there you go. As far as diplomatic efforts. Actually laughing. I have two options here, either some representatives of the Russian Federation went to the U.S. to ask for peace to negotiate with the Americans about the terms of Russia's surrender this is one option. The second option is that the U.S. has sent a flight for Russian diplomats. If this is the second option, then most likely in the near future there will be a severance of diplomatic relations between Russia and the United States or probably there will be a serious reduction in the staff of embassies and consulates in Russia and Russian embassies and consulates in the United States, respectively, which would mean a serious cooling of diplomatic relations. In general the gap becomes deeper and deeper between Russia and the civilized world. But on the other hand this is good on the other hand not so good because then it turns out that Putin has nothing to lose that he can go completely crazy and start a nuclear war but I think it will not come to that because again Putin loves life as I said and wants to live his internal diplomacy when Putin was asked if you have a logic he would not say there but this journalist and what do you need they said Putin they are so sweet. Here if Putin really thinks that he and the government want this sign for good then of course he will not start an atomic war and a universal world war but God knows he really does not understand what is going on in his head right now. Anyway, I hope the Russians who are flying to America right now are on their way as I write this program. So I hope that they will ask the U.S. to bring us some terms of a peace agreement because as you understand the situation is becoming totally unacceptable for the Russian side right now.

[00:06:28] The economy is going into the abyss and there are no military successes on the territory of Ukraine and are not expected. The situation is only getting worse. So I'm sure that if

not now, then in the near future Russians will start asking for peace and peace in Russia because they are ashamed of Ukraine to ask the United States Putin has said a lot of things about Ukraine that will not be perceived by Ukraine at all after that. So Putin kind of wants to go in through the Americans. I think this. I think this is what Putin wants to do through the Americans, I think this is what Elena Vjalbe says. The American senator from South Carolina is a Republican. He said something that I think the whole world is talking about a lot and actively about whom he said that he turned to the Russian elite with an offer to take that guy down. He understands that if this does not happen it will be either difficult or almost impossible to end the war. The Russian embassy in the United States immediately reacted to this statement by Lindsey Graham accusing the senator of terrorism will be taken sorely by all maria and understood exactly who Lindsey Graham means when he appeals to the Russian elite with the offer to lure that guy. You know I say so on the one hand it's kind of like this not me it's not the intelligence services this is one senator's opinion on the other hand. Elena pays special attention to press relations and at the highest level in the United States at the level of the U.S. Senate. I understand perhaps 80 meters invites elena vasilieva boris then nosik elena vasilieva and maria alexandrova.

I hope the same thing they also worked under the president of this regime vladimir putin and his compatriots should be tried and put in the same cells sitting and exchanging stories and figuring out who is more to blame for the way life has turned out.
