

[00:00:00] Now you're 91 years old, it's even thinner than glass.

[00:00:01] And now you're up to '91 there's even thinner glass there at all. The glass itself is thinner already. Well and in general there you can see that they are already starting to do the body by which they were before although some in the first year seem to work well. But there apparently it's a matter of luck. The defect was. There was a lot and in general it fell into the hands. And then the prices now. Check on products in our language the more so now also shut down the supply of processors. Most likely I think that probably further will be even worse, there will be no chips at all sale probably in china too it will be necessary simply to order. And accordingly also in our business too such moments of problems arise. And accordingly these computer hardware, they probably will also rise in price. Here is such a moment. But as they say lamp reliable to light bulb. Such a very persistent overload to carry various. Well, in general, reliable lamp immediately like it when I first got acquainted with it. And I switched to them after the fifty. That's how I gradually got up. My hobby started with my first turn at 6. It was '93. All on then on 45 lost 68. Then I had some after that. There were 50 50 goal 50 bulbs and then only came to these incandescent stadium bulbs. But those lamps that are in mind is already metal ceramic there are more expensive and more such a fragile requiring attention I did not mess with because they are very rabid and there's something wrong they fly right away. Therefore, something like that all business as it was not wanted to mess with the more there is very expensive all this stuff on the money. And so of course I always want to have some kind of factory engine, the same tune to a proven normal antenna, it's also possible on the technical works.

[00:02:23] Basically, if the listeners have everything thought out and protected. There are moments that will retain the tube then you can work then I think there is no point because anyway as they say not very experienced in this regard then it is impossible to foresee all these lamps are very such they are sensitive and to withdraw their future offensive for such money. Here is such valuable information. 4 kharitonov fyodor loves you roman 9 sergei borisovich kupriyanov. Naturally. After all, it is clear that the Internet to fight only at the expense. With all members. It is accepted alexander but here I have a filter on the way to strengthen the additional put these Saratov barrier filters. You know I have these filters in addition. I initially witnessed something then I did not like how I put between his visitor and the transfer this filter for additional filtration harmony. The news has a pass-through filter singing voice plus a film and gain filter. That's how you get endless mic processing and sorry ss 480 though the master program. Such a system is made but in general it turned out pretty good. I think in general such a signal is nice. Here you get a microphone means a successful microphone. And here he has on the back of the set comes with a spider. The short word is very convenient we have very wise. Very uncomfortable turns out but there is also a good chip itself. Then the signal to the microphone and then the signal processing is taken off the card. And the tax signal. On the face of the transfer. That's how I have done directly to the signal is already worked out without any microphone amplifier bypassing the whole thing. And me in the beginning it was done excessively full stroke. Then I did that. There were such prices a little bit changed the signal was not what was at the output of the microphone. Well at first I had a transformer telling from the receiver here too.

[00:06:22] Here I am. Automatic. Then all the same. Getting to work without the automaton. But it got in the way and for young people. This resource ripped in the country. Now all the participants of the finale turned out and with high quality. Despite this the management of the agency of course receives a loss. About this transfer 27 let up already 28. Here is such information. Alexander Well, thank you for the conversation, thank you for the answer, I will not keep you any longer, I wish you good health. I think I was talking about Russia in relation to the 1920s on this topic and the rajkom what lives there 700 18 m such a successor is 146 m one to one. So there are no shows here on the gate in the sense of bands and so on. So they are the same receivers. I know. After that, to be honest, I did not understand no stroke processor thought poor and something like that on purpose. And it seems to me that there are more serious cases in 46 m in 17 18 m some kind of this 78 is like that would be the sea. With on the bulk of the trumps at. Well yes a little worse. But then it's almost the same. No well I looked at all the schematics of this and that.

[00:25:34] The scheme of techniques is at least one to one. Well there are some differences. It's not like I'm gonna say that you have a filter there. Here and there and there's a lot of stuff written there. And there are no questions and so all the parts are the same chips are the same well everything is exactly the same as 747 6. No igor 747 in the simple one that was before mine as Alexei was there is always an option to buy them and put them in separately but then charge them. After two weeks when one at a time there are already built in electronic them can I in what we. Turn the other way to increase and skin and necks to do in general are quite different cost here they are electronic cost with these crops are more expensive. And if what I don't have these filters I don't have any of that. So this and so everything else is the same. One thing is clear okay. What is encouraging I come here is not actively running anywhere on the ten. Poor thing if they are not and I go shopping something observers. But I yell a couple of times now and I'd better go to lunch. Come on all good shout, I'll wait for no results then lunch is a little early for me and I'll go to the store. Come on all we're happy pike third fedor for all the radio pike three fedorov here looking for a radio. There's a lot of noise and a gust of wind blowing my way. All works, I tried it and left it all right. The hell with it, I'll write it down somewhere in three places so I won't forget it.

Date in the childhood romance. Dima arms. 4 khoritonov kostya hello seryozha 9 points lange after the games on the reception. To me too low frequencies in your reception. Yes, the low frequencies you do not have. Low frequencies put on the microphone. Ah well there is also simpler. Where do you turn on the voltage at this bench 5 volts you sell. It is not clear, but it means that it stands firm. Because I do not know how in this but the microphone and cascade can supply up to 18 volts in particular on this one that I made it and 75 32 microphones and cascade to 15 to 18 volts and already echo Professor Pavel Komarov. 23 99 strictly 5 volts you can take from there to the Kremlin points from the output through a resistance of 8 and to the microphone and in the course of connecting everything feed to the microphone and the input somewhere in the microphone and everything will fall into place.

[00:08:40] All right, have a good day. It's clear where the money's coming from, you're not selling what 9 or 8 volts and you're taking the violins there's already 5 volts and through the resistance in the power 10 12, feed it to the output and there's nothing else to do. There is still a transition capacitor and on the chip or on the first leg or or 8 or %32 can be replaced but I'm from the circuit took these looked the same and wrote out the chip and did it, but so far the silver. Will help but if you will dynamically with whom to work and why do you need to work with electricity of course will help here it turns out the more capacity the more several hours the less capacity will be less several hours so it will be emphasized high. So Maria did an experiment just feed the power to this very what's it to the microphone care and then you will maneuver if it does not work so you do not like it then sell the power here and through the condenser to the microphone and move just do experiments you will pick up frequencies with a transition conditioner and everything. While a little remove a little and then it turns out the last word hits you first in the head but kind of like from this. So take away a little less then will be like the effect of an empty room will be more beautiful. Roman chapter 9 e dima 7 lange 49 ldpm. Apparently the city of langue saved.

[00:00:00] That it should be finished we have already built this one in Kubinka where the Nazis were tried and a complete copy of this hall. It's not for nothing that many fans wrote it's good a long time ago we built it long ago when the army temple this whole complex was made an exact copy I don't remember. I have in the first all the same I do not deal with judicial issues and operational issues of the armed forces. Only then on army matters if you can point by point I would like to break down what is somehow not. How it will be taught here are these military actions to liberate the city landed troops. How long will it take to cleanse Odessa from the Nazis. First of all, I would like to say it again. And at the moment the Russian armed forces. I in many cities that do not take and do not protect special. I'm not talking about that. And further advances. Then during the Great Patriotic War our tank columns came into the station and surrounded the cities there remained fascist garrisons and maybe further on further on they stayed home and in the end were forced to either hide trying. For it was impossible to add another to themselves. It's exactly the same solidarity strategy now, unlike during the Great Patriotic War. But it is typical of Syria not to open humanitarian corridors for the withdrawal of civilians and so in Syria as well as here. The bandits and murderers are the Nazis themselves. They are. Accepted civilians don't allow civilians to leave these cities because they understand that with these people leaving the city there's a good chance that they'll just be wiped out.

[00:02:04] To them, civilians are guaranteed protectors. They're well aware of that. This is a problem of starving residents and outside of the war zone will be big even if there is a corresponding with the Ukrainian leadership few will follow those orders. It is a simple illustration. The command post was destroyed battalion aydar regiment. Such information went

to what was launched and. And it is clear. Status on Facebook and on the pier yes more. Final 14 year. I would like to remind you. There was no fighting this year. Before which all the regions those that rebelled against the junta and fought. Weapons and equipment in the hands of the militia after the assault brigade just handed this equipment to the militia yesterday April 25. They themselves refused to fight, they came in or were handed over by the militia. Our Larisa was the first girl who appeared with her mother in the car and was shot by the Nazis. That's when the first blood was spilled. It was all over and that's good. This one. It has been changing for the whole 80 years. Our ancestors considered themselves to be something like registering an area that wants to move on to other positions. Nine is all responsible the commander makes the wrong decisions and responds. You said by. From the point. Statement. Says. I generally as a shareholder as they on the question of what shot the military commander of the tactical group east heavy. Severely wounded was sent to Ukraine. A small revenge for the fact that they uncontrolled flew a loner in one of the areas of Mariupol. On August 20, 10 pieces of equipment were destroyed. Maybe they want people not to be released because then really mariupol australia.

[00:05:04] Catholic pass to any of the people. Everything else to. When asked about the unmanageable that never was. He clearly understands that there are many decent decent people in the club in his oath. Not charged for the day and in case they are not that. And they will understand that russia is becoming free and independent will remain an independent country. Other names now pronounce the name the federative republic of ukraine. Dates when and we have Ukrainian. Katsapi already 11. Katsapi vatniks when will vote mamka papka katsapi. When will you tell all your subordinates to you katsapi. How many already left killed katsapy vatniks my thoughts that these dabblers will shout at our government and katsapy why do not you pay in the robe of your killed. Well yes this is the most fascist even persistent rumors Chechens the more so Americans in Syria on the basis that it is to avoid the occupation for example to learn the conditions when there is no question what even they removed the fascist scum in case we have abandoned ourselves. I have been for 20 years. You know we have people like Zurabov. I'll give you the word for sure you ask for an answer. It's just that it was really said in this discussion that the peace process is a peace process. What has happened today is the absolute neglect of the Minsk process by Ukraine's neighbors and I will say that the authorities of Ukraine themselves and the people of Ukraine are a completely separate issue. They are comparable. And who are the people who started this massacre today, or rather the Anglo-Saxons who provoked this pain.

[00:08:30] It was a matter of principle for them. The global financial crisis is also blazing hot. America from this crisis. It's the kind of carnage they need to slowly resolve their financial issues. And we, I mean the people of Ukraine, are hostages in this situation and we rose up from Donetsk and all of Donbass against all of this. Unfortunately the people of Ukraine are under such an informational occupation and unfortunately today all these Banderites and fascists and others. Today they are hiding behind a shield to protect ordinary people. So you just need to know with respect for your position. But believe me you are just as much a hostage. Advertising right after this we will continue. Even to date for negotiations for our as there was no second round of such preparatory questions put military humanitarian and political. But

everyone is well aware that the political question that there put it the most important because read our Minister of Foreign Affairs our President all that Crimea should be recognized as a Russian politician and what does this mean a referendum this means a decision of the parliament changing the constitution and so on. And even more so on the consequences of the terrorist attack and therefore they clearly understand that this is a legitimate president and here already now the information channel. Open. There is. The composition that will gather now under the banners of the alleged volunteers. Most of them, of course, they don't see any freedom they're after, they're after some kind of options to kill somebody because for them it's some kind of value to realize themselves in killing.

[00:12:55] And of course Ukrainians getting such problems with this throw-in language that these now their situations significantly after the assault will seem childish by the way talking about this business so people in the protagonist's chair to applause let's allow for work talk. The international investigative team has published data on the Syrian problem in the Turkish-controlled territories intelligence allies wishing to return the Syrian-Ukrainian businessman only a few times. According to data how then control the drug trafficking activity is linked to al-Qaida but in recent years after the outbreak of civil conflict in Syria has left the country and was given asylum in Odessa. It is interesting that the classic recruitment of fighters began as early as February 23 is the military operation of Russia in Ukraine, so it is not necessary to consider it a response to recent events. To date, recruiters have already formed lists of fighters in the Turkish Syrian National Army. It is likely that this work is being carried out under the control of specialists who are actively working in Syria, such as the one de facto occupied by Turkey. It is reported that the original plan was to take the fighters to Syria. Many of them have valid identity cards or are already on terrorist wanted lists in various European countries and would have been able to pass normal political control. But now all regions of Ukraine jihadists will be sent most likely by military planes of Turkey and other Nato countries in the European states contiguous to Ukraine and then I asked for help from Nato or Turkey not shy to use to foment conflict in Ukraine love situation of major allies ready to provide their manpower for the operation.

[00:14:59] Particularly with the radicals me probably flying to khabarovsk. I don't know what channel five there once understand it. That's right only he said then that the only way to destroy where to destroy them 70 percent of the border. So I can put the question on the spot what is being done and how it is being done. But such a position is quite let everything go to hell, but do not touch it. This is most offensive to Ukraine. And what about us, that we have not gone for all that you did all these 30 years and started to do even earlier and started to do your grandfathers and great grandfathers whom you are now on heroes for that so was then 4 years were you for example an ambulance doctor. It turns out the help should be an example for the unarmed though not really gave the hippocratic oath came from Donetsk came. We will not forget at the base of blame for when President Poroshenko said that their children in Donetsk we have one school in the basement. We applauded everyone forgot that I for when there were parades of running scum in the city of Kiev carrying portraits of Adolf Hitler. You kind of overlooked that or even applauded it. You have forgotten. Remember for promising to strike Russian cities where it is. Guys a little different. For what your media representatives wrote and killed Russian soldiers

enlisted forgotten remember not only destroy not left like all katsap so you earned this country when you went to nato base yes all this happened because I wonder as you know yesterday started remembering everything literally everything started remembering that we lived together.

[00:17:50] How come we saw the battles for the Dnieper together. We defended together liberated Kiev so that these weapons would pass a little bit earlier where they were already grabbing everything. Now it's clear that these nationalist Bandera fighters alone are not enough, let's all remember the Great Patriotic War, let's all go there too, together. And he appeals to the Russian people in the Great Patriotic War. And why didn't you bring that up until a week ago when Putin was standing outside his administration building marching people with Nazi flags. Why wasn't it funny then that they themselves decide to come to the trenches over which we have this swastika? And now they say there too in these factories and Ukrainian. But we did not expect it. We are two Slavic nations or two of our own people. And for 20 years we have been told that we can be one, that we are the Finns, that we are Mongolian Tatars, are we not? Otherwise, think about it all. Let's read it and remember everything correctly. You said that we are not Slavs at all. That you are real Russians. No we didn't.

[00:19:14] Talking is empty only to destroy that scum bandera's they have done so much that they will never forgive it. Only to destroy they were not on earth at all. They are vile creatures with no shame or conscience. For them there is nothing sacred. Ruthlessly destroying everything at the same time. In fact, the cartoons were a war. If you turn your back on that war it doesn't mean it didn't happen. It was if you saw the records it wasn't there. It was and it was a bear war. Even in Syria where our military is involved it doesn't seem to be any of your business either. Somewhere out there far away. It was a war right here between us and all the people we were destroying. If you don't know about that. If you think it's just an excuse, open up Google and I'll tell you what was destroyed, remind me who the Hollywood Madonna is. Absolutely never. I'll tell you and you bought these pictures. There is no one to show you look at south america then they will do if they are not touched somewhere far away. It was a war with our Russian people we were destroying to show just look at her alive. But then the Russian Madonna is a girl of 23. I won't tell you what kind of reception. National. Probably. After. Wasn't that good. It doesn't say it's about downsizing. But for God's sake. They there thought we have all the missiles fountains tanks they are here. Of course that's seryozha and the Crimeans are all plywood from us.

[00:21:52] Now it's the veneer they can lay on theirs in such a way that they understand what veneer we have. Interethnic relations. Especially since it's probably already time for us to sit in the village house. The most interesting thing is that the Russian people are over a hundred million in total. Of course we will. We will find Sergei. Barsa will take care of him and he will go straight to Donbass, and the guys will take care of him, don't worry. Stalin found Sergei Semyonovich and decided to give him a heart attack. I've already checked myself. I know what we're talking about. And Stalin. Kaganovich much less and put under the bed put the liberators did not know on what. You look at how much has mathematical thinking is happy that their sons were given machine guns in their hands they went. What you can do today with a simple machine gun I do not understand. You can go to the store to rob the store itself is just that. I

don't know how many of your rookies got taken by fucking coercion there, but you're not in the right direction and rejoice. They will be replaced or their grandchildren will lie down with the same rejoice that their granddaughter will be laid down soon, you know it is necessary to think about it, because to sit crying here what good Russians fed them, gave them water to sleep, and we thought they were different, but still he has a hopeless situation. Don't go like that, shoot the Bandera people, at least the Moskals will shoot them, at least they will have no fucking regard for their masters. Who shot one of you Moskals are not to blame.

[00:25:35] For how many years. Glory to Ukraine. I don't know if the Russians won't accept it. No matter how much we feed them, they'll stay that way. As long as Russia is not strong, everyone is afraid to listen to it. Just so long as Russia is not strong, everyone is afraid to listen to it. It does not matter what kinds of things it told them about three years ago. She also declared that she would be the world's leader. I think it is coming to that. It all adds up. She told you the war would last four months. It would have been better if it was shorter, but there were a lot of casualties on our side. About the analogies, the Americans attacked each other for the third day. 30-40 years, that is what the Ukrainians have been doing. Not for nothing, by the way, the leaders of this one word, not even Zelensky is in charge. This is all bullshit. Not even the conscripts are not in charge, the tsar is a martyr and the state colonel is in charge. That's the story. In Lviv he is now sitting there this master of Chechnya and finances the family. Why do they stay there in Mariupol? All because they have nowhere to go because they have no family, all the others have already been sent there. What I know from Donbas, but I don't know about Kharkiv. However, I have accurate information and there are reports from Sasha sweet.

[00:27:43] So. With Russia one family like an hour ago went through and that's it. The wife there answers here one dragomanova natasha not long ago was in one of those good day talk. Invite the radio. Andrey Dmitrievich pike. About all the bans. Victory in samara probably six months ago was the third still. Roman three carriers one in all directions. We took about three left cheeks olga romanova became the third subway yet.

[00:31:59] Took about a third left cheeks brain 40 middle cheeks from it and already. Develop it yet. The third is still possible. Domodedovo held a drill left yet mine. Dear maiden pike 1 on. Played well and we are still. Dmytro still. Tymoschuk he all for showing. Rada. At the rates dmitry schlokovo. Explains the radio station. Another six months. 40 meters. Anatoly

Timoshchuk held. Today told the correspondent of radio 109 fedorov alexei sparrow again good evening good idea. Eugene the city of Chekhov in April. Well and thank you. 9 years is the level. All is well. I began to talk about charity his companion. I say being in the village tatiana vladimirovna before. Everything. What to answer. However to delay. The center hit. Ivanova three more. Trivia some more. And Dmitry some more on the left cheek. After all the trouble. Sharapova not so happy and then the third from the left cheek. With whom else can. Korea. All three people died at. So novel the third from the left counting. At the disposal. Andrey Dmitrievich pike olga 40 ya horse radio 3 shifts schlickovo music. This right left to do another ban. And. meters radio third day still who can. In it still meters of radio left at all he has not yet closed for all. When I understood so, like radio 76 over there I still have it. But I'm still a veteran since I've been on the plane all the time. And it's not my business to load it. To fight a war is not to put it down. And let it be less painful will be on this subject still what. Red objection. Well understandable is naturally a shovel waiting for us.

[00:00:02] [00:00:02] [00:00:02] [00:01] [00:00:02] [00:01] [00:00:02] [00:01] [00:00:02]

[00:00:02] That's the kind of stuff while I'm at it. I don't know what else he's doing there. What yes no let him not be afraid I'm not going to attack him with a shovel. It's hard work hard work it's not for war. Now I appeal to people who come to Germany to behave like people there helps to collect humanitarian aid and Russian-speaking people and Germans saying that you have this leftover food so everything else helps us. You come here always together with you spoke in Russian. In general, the people who take you to apartments for a couple of days to live and in general, you lost an hour in Luxembourg, how do you behave? The Germans will not tolerate it, I seriously tell you they will not. Already started such a provocation on your part. But it is not really the fate of the girls in Russia, I would say thank you very much for your help. You really come and talk to us in Russian, speak Ukrainian. Do not speak Ukrainian I for example hesitate I do not speak Ukrainian I just speak Russian. You just really have the guards to take the city you help you. You say that, but there are no words. There is no way around it. Я. And it is for sure not only the Khokhly Banderites and the Ukrainian people themselves will educate them insulting them since '90 they have been educated since the Soviets, now we have to educate them again under the Soviets. Now this desire to take away can reside and she is responsible for. So they wanted to cheer the khokhlovs to put missiles and strike at russia because they understand that.

[00:02:33] It's clear from the beginning what even what you do. Now you have to for. All right, go to sports, someone bragged in the Kharkov region that they gave out machine guns to kids there. They will give you the roof. All right, we will spend 2 or 3 days there, someone else came, but what was the result. I guess. Of course there is a lot of water coming in and they have started shooting at each other again. It's already starting to happen. They destroyed the rocket launchers that were bombarding our troops. In one salvo of four missile warheads each, they blew the hell out of all the fields. Fursenko said that. Even today if it is done down there in residential areas, if the Berkut groups are there it will be easier to bombard our troops, but it will be just to destroy them with precision-guided weapons from afar. This is technically impossible. Its human destiny in 8 years you have shelled the Donbass for 8 years you have killed over 20

thousand civilians, but not the military peaceful Fedorov. And you demanded humanity as something to say thank you that your soldiers were not shot as you mocked as you mocked the prisoners. We are being mocked by your soldiers asking for food. The first thing we want is food they give him food they eat they pray they hug finally we bought for how much time finally they heart beat their bonds for that they feel normal unlike you generator how humanity is higher than the medics of the country.

[00:05:32] It's not for you to talk about humanity and about. The humanity is with the dog still. The bad good one is a dead hog. I forbid him because it's useless to ignore them, I reacted and told this fool what to do. It is necessary to destroy such people in the end this person cannot be changed. Not only that to hurt so much he can kill from the basement if you give him a gun and stuff. You see, the thing is that he is a real Banderovite. Said not a despicable nation. That's why I have to declare it the world's most important system. Yelena, open up Google Google, I will tell you that it is published in this form, for example who is the Russian machine never. I will tell you you fans of the picture I have with me to show you just look at her and then the Russian Madonna is a girl who sees her one-month-old daughter in her arms. That's how you know how the Madonna is portrayed, let her be united. And so she's on display, they've been pulling on her for a long time. So the second quarter that it's a residential quarter and it ripped her legs off and she fell together 10 it was very and blood and some more time yes and then said girl girl girl daughter one time at once and she did. Dead lying and dying in a pool of blood with no legs.

[00:07:51] And pictures of her career on the mountain ranges the man with this child tells how she died through who miraculously survived and were left disabled. You're defending now and the army in which. This is actually a military operation. The Ukrainian army which killed the conscription and killed from such systems we never heard about the children's beach in the mud and then the usual Soviet flag which was trampled by cluster bombs and the children were torn to pieces in front of their parents and then the parents were torn to pieces too. And these people don't want to. The authorities are going to. They knew that. With banned bombs and on these bombs these videos and photos are also on the internet they wrote and wrote here is the Russian Madonna. I was not written off. Bush and Hezbollah they wrote all the best to the children. This Ukrainian army. Some scum is sitting there, some pathetic dog or something, that we are something. Bad form, but I do not recognize in Russia, even if such Bandera people understand how. Knowledgeable people say. Our neighbors are not connected in any way our compatriots there Ukrainian idea is always a normal desire. Okay let's not pay attention to them why because I am very faintly heard. But before you say a word you must have the power and the right to say this word, and to have the right you must have the power of a signal at least. But such a position is quite let everything go to hell. Don't touch, don't touch. That's the most offensive thing about Ukraine.

[00:10:27] She's well we have what for. For all the things you've been doing for all 30 years began to do even earlier and began to do your grandfathers and great grandfathers whom you now deliver on yourselves here for all this for a miracle. For the fact that when there was a Maidan for four years, this is probably the very thing, for example, the emergency room doctors in Kiev refuse to help the offended policemen, even though they were doctors who took the

Hippocratic oath to come. And who are they? Did they come from Donetsk? We will not help them. Or otherwise. Because when President Poroshenko said that their children in Donetsk and Luhansk should not be in the basement, we all applauded. For the fact that you, as it were, when it hit the city of the hero of Kiev, walked through the rows of fleeing scum who were carrying portraits of Adolf Hitler. It is as if you did not notice or even applauded these very things. That you promised to strike Russian cities where these wonderful tanks would finish off Voronezh. Have you forgotten that your nationalists came to the first Chechen war in early 90s and slaughtered, tortured and killed Russian conscripts? You've forgotten what you're remembering. And for the fact that we gave him this country and you made it your base, it is clear. But all this is in general understandable for what. I wonder how the newspaper started yesterday with me literally in what and what began to remember that we are together. How come we fought the battle for the Dnieper together where we defended and liberated Kiev together remembered.

[00:12:21] And when Russia missed. Khazin that is everything now. Now it is clear that these Russian nationalists Bandera people alone are not enough and let's all who are there this very thing. Who else remembers the Great Patriotic War? I'm appealing to the Russian people, how come we fought the great Patriotic War together? Why didn't you mention that a week ago? I wouldn't say there were people with Nazi flags marching right under the windows of my administration. Something then I do not understand why they become in the trenches. With which the swastika is developing. Something then did not remember then and now do not talk about it. There, too, in these factories in the Ukrainian. But we did not expect. We are two Slavic peoples at once of two Slavic peoples. And all the rest we can do is horde. We are actually in the threat of the Finns that the Mongol Tartars are not. Change. Think about it all, think about it all. I wake up and remember everything about it, they said that we are not Slavs, that you are real Russians. No they didn't, but now it's balm for the soul. We are Slavs, brothers, fifth and tenth. Until recently you were saying that we are two different people, you are Europeans and we are one. On Channel 1, I am not very good. 282 I article which is the head of Zakarpattya must necessarily pass any serious.

[00:14:11] I think that in Ukraine tragedy for everyone regardless of nationality win over but I well say give me the law because you can't do it otherwise we have no career in Ukraine. It should be a shame for other people, but that is not the main thing. After all, we are allowed to take the property of Russians. And we used to be allowed to. But then the head lawyer Kolomoisky banned it. I, for example, am now learning English to forget Russian, and American mercenaries are helping me do it. We know everything here all the time at every step. Up to the money for uneven coffee suburbs. Because we have Captain Maskai. By the way I got married for the second time. In trouble. For us Europeans this is normal. Today our most important president, Barack Obama, promised that we will join Nato soon. Naturally, on the rights of Americans as far as the internet is free as far as it controls us. As soon as it all started but still now. They think they are leading the way to which I think you are anyway of course. Well, I haven't heard of this pilot. I have not heard, I do not know. He lacks a socket and it is all about energy, as they say, he has one socket. Well, yes, the energy of the main thing is to come out to the reception. If we have in our country, there is not much in our country, I will show you how it is possible to help

her on the thin legs, what are the fares. Of course I see that they're out of my land no one in time.

[00:17:24] I found a solution for the local Leonid mine. Anatoly good afternoon all and 15 kirill moroz good afternoon. I'm in Rostov on Don 22 and we always have some separate arsenal there listening. Thank you Anatoly. Good day your buddy leonid boris jukov roman juk 7 years this is %65 his pluses. Vladimir went in tarasovka at the reception. Etc. But such things again pick up too loud i.e. Anatoly Efremov omen and microphone to the host well thank you they came themselves. I so suspect that there is some kind of crime, and why to the microphone by a lawyer I then to the hoarse. Vladimir Ivanovich showed up if he guessed the cabbage. Well, the kid is observed at the reception. Of course, it's a lot less. And so far all is well, thanks anatoliy ivanovich, good luck. It's my fault, I can see that Leonid Maria Dima has arrived. The commission invites you to the ceremonial view of Maria Dima and Misha. They are dragging something. I see that leonid lima 87 reception. Novel third center novel andrei kasyanov destructive power and a new home and this day 15 cancellation change of power reception. Good day good on frost commander of the 30th Voronezh assembly for example. Yes, andrey ivanovich beautifully listen to this. Thank you andrey. Good day buddy roman andreychich business center leonid. Roman zhuk 7 line 5 9 taking 25 plus. Vladimir went to the reception. Leonid 37. Vladimir good afternoon. Good afternoon. Saratovskaya 59. [00:20:24] Thank you. 6 andrey sakharov and the big third band 3 thank you for the concert I wish you health band for future meetings with. Hence the conclusion I see that in spite of the reception. 80 invites permissions from the Mayor's Office of Rome and six people to the reception. Yuri alekseyevich and he has this nice German one is not indicated at the reception. This is Vasilievich. Yes, and I certainly respected if she is a deputy but in my opinion for moral damage then Ivan Nikolaevich cut to whom they cut him see and husband so he sit silently at the reception yes at the reception as I lange. Silence. I shook 80 invited lay in the state of the arena 6 Leonid and Dima reception. There is no one option. Let's go on watching TV and we'll come later. Let's go to the reception and watch the test, I will go friends, I will not call anybody. I also think I'm here leonid maria dima good afternoon ivan gridin arkady kaplun sergei morozov i. They watched the moment. Fedor fedorov fine 5 9 10 15 and a half. Thank you fyodor. Good day buddy. Roman history. Kharitonov tamara. Roman. Leonid maria dima fedor thank you fans replied and he took her hand and heart while I. Thank you all. No one is here. I allow you to store jam for the reception. We're not going to go anybody go anything we find reception.

[00:24:23] Well yes let's see you later bye bye Ivanovich. To inoculate, not to re-educate. Drugs probably. But. Simple. Stressing that in the liberated areas in our not liberated areas there are places of burial of civilians killed in the fighting after the end of fighting demining experts will begin the search. The search for bodies in the old LNR territory will also continue. The memorial is known about five six spontaneous graves. Last year experts found 292 people, of whom only

30 have been identified so far. Identification of the rest is still a matter of the near future. I can imagine how many such graves there are now. If not and when I said that we are in our hearts, they will remain forever. I can say we are together and in our hearts. Every killed alive burned symbols even in our hearts. Я. And there was a vote to recognize the Donetsk and Lugansk republics. Daughter we are 12 years old. Mom. And here we were also told at school. My daughter asks. She knows the history of the Great Patriotic War, but she knows what fascists were involved in and knows how the fascists filmed people, but things like this cannot happen in peacetime now. I want this tragedy to happen and of course I think it will not be forgotten. I just want those who we spoke today, if there is still at least a little common sense. The Ukrainian military that our president has called for has no one to negotiate with. We see that the government is just the same kind of fascists.

[00:27:15] If there's even a little bit of humanity somewhere. Your relatives and loved ones are still alive. That is if you have at least children there don't know the parent please you just look at what you have done. Well, you can repent. Lent will start soon. But today these things can not be forgotten and it is necessary to do so that all that was now blocked so that it all came out and everyone would look at something about it told that his office including the heads of cities and districts withdraw. And it should not be forgotten and. Probably those Ukrainian soldiers who have not committed war crimes to lay down their arms and take the right side is a very difficult task for these military because and there really are these punishers and they should not just lay down their arms they should force these punishers to lay down their arms. Because this episode where the SAU fired on these Nazis is why. Because they have an order as a military to provide a humanitarian corridor he as a military is obligated if any military unit or group does not comply it continues into the gang. So they hit the banks because he as a military commander is obligated to provide that humanitarian corridor. If they manage to disarm these soldiers arrest them if they don't surrender destroy them when there is a showdown. It's all kind of like these men were military men adhering to their oaths and not punishers they're Nazis. And here in general a rough understanding of how many crimes now for the time and 8 years of bombing Donbass can.

[00:29:10] I only know the statistics and it's unfortunately scary. I turned it in about the children I was talking about 148 children killed but this is the official data of the United Nations 350 wounded 13 thousand civilians killed. I want to talk about another statistic. On April 14, an anti-terrorist operation was declared against Donbas. This operation. Found 400 thousand people. 500 thousand people and every one of them committed a war crime against their people. What am I talking about. Well, you know the motherland is the motherland, get it right. Wherever you were born, wherever you grew up, that's your homeland. After your youth somewhere else. I can't imagine that they will go back anyway. There is no worse place to be than your homeland. Measures. On our line. Opening and the purchasing power of the euro. As for Germany. But her conditions are communal. He gets more will. It is also known that it is quite difficult. I also thought about it. I turned it down, and I made a conclusion for myself. You want to live in this case in Russia. And not everything is decided by money. I to my neighbors. And you think this is what Russia is all about in America at all including leading some of the drastically. And now the people of Russia are not dripping from the east at all. But there was a news story

that a lot of people got right. Lives I think deep on a piece of bread and everyone else just quit. Or just not enough. But I think we're doing just fine.

websdr_recording_2022-03-04T14_24_43Z_3615.0kHz.wav

[00:00:00] The thing is, right now when 2 3 is just noise. This is for our region in general at this time is very very calm and a little more Voronezh stations work that guys on the 24 hour night air calm. Yes, it is much cleaner today. Usually it is even cleaner in my area, but a few days ago. Navalny 7 points. For me it was me. I am in a village near Moscow Sergiev Posad, the former paddock here is always clean for two or three days ago it was just 8 points with never been. I do not know some kind of installation that study left and today as usual about 5 points 5.5. Couple gene thank you very much for the letter no questions will ask questions ask reception probably too but only yesterday. Of course it is my parents. I'm 55 60 kilometers so everyone who works is a provocation. We. A crime against the state the deputy is very important. I would very much found and the Kremlin deputies decided to send not 4 thousand deputies or the crowd if everyone does not envy the replacement of the machine worked in the boiler room time and also in the factory decided that no one is to blame that the topic was born baptized who taught how to reflect you understand there are different one such third and envy someone else and should not look in someone else's pocket only and do not get into anyone's pocket. And it is absolutely possible to say that he can already relax. And they still have to pay for security problems. We went to. Dear friends, I think it's legitimate, but it's also life in Africa.

[00:03:47] That's how you got yourself a new language to live out the last years. They're on their nerves all so I don't know guys. Everybody's got a life. Told him straight up that no I created myself a process can. No need to be offended. It's your own fault you don't have an iron heel. We privatized the plant and any other plant manager privatized and I'm normal. Yesterday the day before yesterday I bought a ticket and now for the inspection were certain regulations can do anything you want out of it, but all I go to Mariupol more became an MP from it do not get much. That's where you have to go. He said yes I was joking. He knows it and so does he. But if someone was born there who did not let you earn prizes, you know what it is. You can not only make money with your hands. Did anyone watch the bad good open anything they could not. I didn't want to, I understand what it is, but I don't want to trade this stuff, it's not my thing. And without it I do not understand, sorry, they came up with it. So the oligarchs came up with other deputies. You want to make jokes about the Maldives because what can you do? So what can you do to make it not happen. Go ahead and tell me what you can do to make sure that doesn't happen. Navalny almost. Information is a thing. Turn to him he will tell you the future number of posing in the cold said his mother and very much about his future life. I don't know the right way but you don't have to think and justice.

[00:06:53] They're everywhere and let's say I retired on disability my salary was 350 rubles in Soviet times and that's a very big salary in Soviet times. And I received a pension maybe for how many years it's I don't know 10 years to retire. I got a pension of 9 thousand now with all the increases was 14. Because there is injustice, what's the use of yelling? For instance, what for the hell there were in Germany? Do you think you can go there now? Who is to blame for the

fact that we live in our own country but ourselves? I always say it all depends on you. You got 350, but you didn't think about retirement. To the north to get a pension with a higher coefficient somehow thought I also did not think about it or something else it did not work out anything with a coefficient of 1 2 retired although I had a coefficient of calculation was about four said you laid out. You lived here in the south. We have such a coefficient at least a million gets. Well such a coefficient is so. And that's what I thought someone gets a normal pension and swears here. It may not even be about that at all. I was in the north too. It's not that the point is that we got into perestroika, you know, perestroika overturned all our deputies and here such pensions to us. A lot of people suffered, but to do something, to take it or not, well, we live normally all the time, by the way, she was a teacher. The pension was 7,000 so we can't live normally with our hands.

[00:08:51] Normal I didn't say anything. A lot of people suffered. Perestroika there's nothing to take now. The current government that has absolutely nothing to do with the idea that we so zealously voted for and a little bit now after a fight do not wave their fists. That's right. We all voted for Yeltsin too. Remember the kids are growing up and we will live like the Ukrainians. Actually we were then. She came back and thought we could live a little. Little went. For example a stronger health can not be bought for any money. But if one pension is hard to imagine how it starts all sorts of examples, his neighbor's cat gave birth to kittens. As you see, the Khokhlyaks fell for the American hundred and everything will be fine with us if only against Russia, we will feed and water you. So they earned what they wanted. Now they will get it right. Well, you need to keep your hands in place while your health allows you to try to earn money with your hands in retirement. I think the distribution of Ukraine is wrong. What else do we need. The old cordon as they say, if only it were not worse. It will not get any worse. Don't worry guys, it can't get any worse. We are doing fine, and thank God. The neighbors shouted that America does not help them. They stopped turning it off right on the 80's in the evening, Misha, when this phrase that if no one had heard about it, no one had heard anything. Back in the 70's in the mornings will remain so clean Serbs in all probably marble.

[00:11:28] So no the whole Ukraine is already silent as there is no. There's no one to shout so that's why. We're closer to the Americans. I ask him a question and the Americans did in Iraq in Yugoslavia in Libya. They did it immediately. Of course we will have to and in time everything will be fine. Now finish the conversation and our rulers will get it. They learned from other people's mistakes. We should learn from the 90s, when the American fame decided to build a bright future would have been impossible. We have seen where this leads to and we have only seen. The next place where we have war talk is nice. No one is going to go build for free no one is going to go guys who the Europeans are sneaky ass. They will not invest anything. Who will go to rebuild a ruined country and not to invest, I will give you an example. I will not go far, I will not say it, but I will not go there to live my ass off and not in Moscow. The neighborhood is pretty rich Pinocchio I started out great. A lot of rich Pinocchio bought the crown has money no money. They no longer have it, you know what the matter is. And do not be jealous if they have their own life, they earned it and went their own way. Pay attention to your health, to your future, to your education, give your grandchildren a decent education so they can be independent in life and be able to choose a profession and a job worthy of their education and knowledge.

[00:14:14] We want if we don't have it in our heads and we want to live a good life beautifully you won't get it. I agree with you I agree with you. But they'll still come at us and scream that we've ruined the economy. Now to rebuild it, you know what I mean. We live next door to them, and there is virtually no border with them. You're wrong. This is robbery, you have to pay for education and put a lot of effort into raising your child or grandchildren. There is no need to pass. Let them study well, pass the Unified State Exam with good grades. A decent institution does not just study to replace them, but let them study. And I know a lot of things I know yes. What do you need 5 thousand that you sit there at night and so on. Let him work hard, let him gnaw through his teeth, not for money. That's what it's all about. How much money you put in. What does this have to do with brains and the right brains should be turned on correctly you are absolutely right. Here I was teaching my sons, and he kept coming back for the money and the university itself, and now he is 38 years old. I should have beaten him like a sissy. Now he is 40 years old and when he has children of his own he understood he did not want to study, but now he wants to study and he has two children to feed. You're not the only ranger who has quite a few topics. I had to kill Sidorov to prove that he is a good student. My friends have a grandson who went to school when he was a kid and studied for free, but a B is not Estonia. It's more for him than it was for us, you know.

[00:16:23] And maybe here I finished school with an A completely got into the Leningrad university he finished because he without any pay the ground must be in place come naturally come here that will be a specialist not what there. Come on. The latest fashion is for us to have economists and lawyers. And now they walk around with a law degree, they do not know where the residence permit is, so who needs it? There are so many brains only on classmates. Everyone came in cars, some flew by plane, one excellent student, Vovochka, walked here. But that's no indicator, of course. But if he studied at a military school and there are children of big shots, I will not even children of big shots from Moscow go to them every month by plane and take them home to Moscow to rest. These layoffs achieve or there rested. So. A lot of people have money. For them, of course, the doors are open. And such as guys without money of course it was worse for him and was also looked at them. He started to ask them how expensive it was. Then they would come and live in Moscow. So we had dinner in a hole in the Perm region. He is about 40 years old already retired. I know my subject was in the Far East too. He served well and with dignity. Now here all is normal. So he has medals and everything else. This is some kind of indicator. If you do not need anything, it falls from the sky, now you have learned. Now please give me everything. No, you have to strive to make money and you know, if he didn't study well, he can't make money.

[00:19:02] Why, because he studied for nothing, you know. Well that's the song and he won't be able to work in a team and he'll be an outcast if he doesn't perform and keep up. Naturally, because he studied for dough, but a normal investment team gathered with normal brains even before Taman adequately. Such intellectual thinking among each other even it is possible to tell to look and understand the mutual understanding. Here and then there is earnings in this collective all other things. That's how it turns out. First of all it is for the money to help someone. This is about nothing, you know, that someone bailed someone out for money. Absolutely, even their own money. When our guys are smart, I do not envy those who are abroad. I just heard

about the border on error analysis. Now my team is kicking these personalities out of there to Russia. She is a youth on the beach, my youngest is there too. I say, listen, you're a student there. I say go to the place where you're trained. Basically, they teach 70 to 80 percent. We have a general education in the same higher education institution. And there, 20 percent only on the direction in principle the number of hours taught. Basically all of this goes at all. You know, yes. And if you're already into something, that's your problem, but you got a diploma, learn how to work at the institute. What you have to learn. Learn how to work with the science of documentation to understand how to deal with it and then you can probably choose for yourself.

[00:21:13] If you've learned how to work and if it's not learning shit there's daddy mommy dressed you up with cocks or there's a girl who had a toy making everything else she's got there fan fingers learning it's over if he went to America and came back because they don't need those fan fingers there. Yes, my dad was so shitty there, but it turns out there you also have to work hard to be good at it. All things considered, everything is right. You feel the best part is worth it. What a nuisance. Someone said we do not have enough blood on them. You know who the fuck is in the way. And it's kind of weird how it came out. Now he's probably stopped taking it. Generally not enough at least 4 times you need to increase the power. We took over the arsenal. No, he's got something in his brain. About 100 of them, including Greece, made a tricolor. There's nothing to do, so he's decided to make history. It is not natural. Probably a lot of people will not wake up the Russian bear. websdr_recording_2022-03-04T15_09_35Z_14139.2kHz.wav

[00:00:00] As much as you can. Every aggressor occupier should be found in Ukraine only meaning both Ukraine and Russian Russian American media aggressor and occupant pirate Putin or even Ukraine killing heroically Russians. As much as you can. And the aggressor occupier should only find death in Ukraine. The territory of Ukraine, a significant part of the personnel has already destroyed the personnel had time to leave the territory held a meeting was the decision to conduct the operation was not systems that originally from Donbass and further reduced in order to prevent if necessary and heavy fights announcement of fortifications in this direction and check the democratic process technologically we could pass this operation.

Now the message is being taken off that the further the movement leader is moving in the Middle East first of all about 70 80 kilometers away from Luhansk. Probably. He was told earlier there are connections now while our experts say that the shelling of Gorlovka has now resumed reports Ivan Prikhodko. And if not at all. Just called on the phone broke the connection could not break except once again part of this grouping in the area of Mariupol is blocked. There are battles in the field, but so far the decision of our leadership political and military information of Russia to solve the problem has become clear that Mariupol and other cities of Donetsk is not undertaken. It is inexpedient. I do not see a threat because a large number of civilians I showed a video of what the Odessans themselves wanted at the railway station in Odessa and people in large numbers are boarding trains and leaving Odessa. This is the right decision because the civilians did not have time to leave Mariupol and now the Nazis do not let them out of there and they do not let them out of Kharkiv. This, of course, endangers the lives of many people who are hostages. And of course it complicates the situation.

[00:03:49] So in general city people can do that in particular in Odessa you have to leave you have to leave you have to leave. In the same way in Kiev it will be right. And in general here is the scale of the operation such distances the need for a logistics regime with the fact that of course sabotage groups can work on the communications of our armed forces that are moving forward. But in general the situation is unique in its complexity. Now in interviews and I have to explain that in the Western media we have to work in a close family circle and there is no explanation for the alleged change. Let us pause for a few seconds to join the listeners of Vesti FM radio station and Mayak, i.e. minutes, Moscow time, to continue our broadcast with the listeners of Vesti FM Mayak radio station who have joined us in these seconds. Going up and down like on a swing. The preservation helps but it's still on the big but presents such risks as a child's brain some must be. Here I am still a little thought that if the first time we went on this to buy tickets and out of the hospital at the immediately received approximately and we went there on this subject. And if still on this territory and went back the same thing with the connection with the others and his share in half if somewhere about 20 kilometers away and then hit the shore to get home. I remember these cases all my life. We should have been fathers when we were young. But I remember all my life I had a chance to rest in a sanatorium to be treated, let's say, with your fellow countryman and to whom the whole driveway somehow too. He was a chauffeur who drove some kind of chief of a car.

[00:07:04] Well and the miracle is we met. Let's go get a beer here and there. Listen, let's go get some. I brought a flower, I think there was an inspector in town on the Volga and he gave me a ride in his car and brought me to get some rest. We had a rest, I came to him and he opened the hood from your place in the evening, he had a trunk full of shit. Here we were on vacation with him, I say, I kind of live everything, so I'm 50 there, he's 58. We were an engineer at the time, he's not that kind of guy. In general he came by car at that time of course not everyone had a car it was quite an expensive toy. And it was impossible to get them. And so we went with him a few times to the collective farm for fish at that time about 57 58. And so I still remember coming to the shore and there was water and there were children and people so healthy. They go there knowing that the fish is what you want... the foreman says he takes a barge and sends it to the shore. I also remember when I woke up in the morning and I had an old trough,

remember the metal ones, they were a little square. Their grandmother lost those troughs on the board so I was standing there and the kid came out and my grandmother was checking the black caviar in that carriage.

[00:09:22] I remember the first black loot I remember I put my feet on the table then and sat on the table this basin standing even if we didn't eat then well the young guys on that started. But the fact that there was so much of it, that's what I remember. I lived in an apartment near Berea and the landlady had the same thing. Night fishermen. To make a long story short, she was doing all this too, I saw it with my eyes, but at that time. Yeah, but back then it was easy. A friend of mine went to heaven, he died the year before last when he was 6, Boris 6, Nikolai. So he can be said he school her parents well not good decided and his parents every day in this very well you can not in school gave him a piece of bread and two pieces folded and black well maybe Mozart and to school and he could not stand it. When I went to school with my wife and dogs I grieve him all this. Can you imagine now to whom to tell yes lived badly. Some do that to Americans was a god. Well okay this dog is now your rest. Well not to rest to work I need to do something with the car tomorrow to go to work. Today I went there in Armavir and so on. So there is enough work. And then I need a rest. Goodbye. All the best. I think all the goodbyes to you. The dog's already gone. I'm sure he listened. But what is the use when it is absolutely not perceived comedy after all is not ideal. I wrote how he didn't try me 2.

[00:11:54] The dog barks the caravan goes. There's not much left. Let them give it to their guys already. I'll write down Vorobjev. You go with him with the same level in Europe and he sits too poor thing wants to interfere wants our misfortune. Well something fan I hear inside the antenna temporarily and his floor need to hang a horse I took down my antenna two years ago I had a construction site here and still do not have anything about something to put the junk. So well the box stands on the table is nothing so helper is fine. You can put it in gear for hours and it will be news day and night he will not have anything. That I now also waved my hand and got it. But when there are such funny professionals I have five elements looking there. So I am not worried. I mean well done, you have to do something too. Well, if the Ukraine wants it is the same thing that it is less and less time you have already slow and become no time to the alarm button ties his feet. All right, we're all like that, we'll all be there. Already see something here envious envious of the rich I see already. Younger than me you've been surrounded by too much of this stuff exposed. Look what glass was flying out there. In general in Vasylykivka someone is spinning there only a few minutes of conversation. Guys very much even I was pleased a little. Well now it's like an open fight all the foundations have collapsed. Meanwhile, not at all afraid of the intruders again madmen rush into battle robots mad to know scouts fight and. We are already. After the victory of the ruby on the Bible and written underneath is not God but the mind of man creates the victorious miracle of the century. Very much I hope in the first place that he will accept this death one day. And don't do anything but let it slip. What I am saying is that people today have been looking for a long time for the responsible conditions of God's blessing and I will tell you this answer so there are people looking for immortality there on the planets looking for immortality. If on what planets immortality that is as I said this old man that appeared Sasha he was thousands of years old and thousands of years old or I him nowhere that is the word he and lord Jesus says God has all the living word to him and they have somewhere stored.

[00:19:09] For every one of them they have it stored somewhere they have it somewhere. Exactly. I'm the one who's supposed to. Well. It's all man seeking God bypassing God bypassing God's word. We want to reach the planets, we want to find out if there is green, if there is air, if there is oxygen, if there is life and the main thing is that there is somewhere where people have not walked because here 70 years 80 have lived this life is a game and that now a few decades I remember well here. And. I and some insects were transported. After a while frozen and took the lives of insects and began to say even I read it in the newspapers wrote. Let's try it on a person to freeze a person will die and unfreeze it will be a disappointed corpse. A man will commit like a bone or years have not lived. Thought that way. Egyptian mummies were kept. In these pyramids. So thought to freeze. And then someday. Make a will and I'll live again. But it doesn't work. We have to look for something else. Is there immortality anywhere on the planets? Yes, there is. There is, I say there is. But how to achieve it. But it is the dear people of this world, including scientists, who bypass God bypassing the word of God and from this reach. What Christ has long ago accomplished glorifies him in what Christ has long ago accomplished. We read and I am the resurrection and the life says the words my friend brother Alexey with whom we preached to the Jews in New York in Brooklyn. Over fifty thousand Russian Jews are divided there in a small space. If.

[00:00:00] Prohibit. I think it's the most. Rather said on the press because our family all the same time showed Russian paratroopers first medical aid to the injured. The military treated the wounds and put on children strapped one of the wounded officers in a Russian military doctor performed a successful operation to augment the shrapnel. Everyone laid down their arms and the Ukrainian soldiers who refused to fight will return home at the first opportunity. Irina Pastukhova Dmitry Kokorin Nikita Sevastyanov Channel 1 Kiev region. The inhabitant of Donbass is going according to plan. The tasks are being solved and will be implemented in full. Vladimir Putin said this in a telephone conversation with President of Belarus Alexander Lukashenko expressed support for the actions of the Russian side. As noted in the Kremlin in

the conversation were raised issues related to the second round of Russian-Ukrainian negotiations, which took place the day before on the territory of Belarus. The militia of the Donetsk and Luhansk people's republics are their own people and their own land. This is how the nationalist battalions behave, they destroy infrastructure, they kill civilians. Because it is not their own land and not their own people because the commanders of the nationalist battalions who came to western Ukraine perceive this territory as occupied. Now it's just obvious and it's an obvious fact. What we see today that of course cannot. Dima the Ukrainian army. Yartsev survives if it reaches its last hours. Means that it is over. 2. What is going on in our state is not even the prime minister. According to Kadyrov there is no need to negotiate with the Ukrainian authorities in the settlement. As a negotiator, Zelensky announced himself and said that in this case the director vladimir putin we will find an opportunity to use the position can be found in Ukraine man that this is common in the family called vladimir putin in Ukraine and our brothers and sisters.

[00:03:23] Can our fighters that they captured some what all cities and embrace the third of March at a meeting of the security council, Putin said that the special operation in Ukraine is on schedule in strict accordance with the aggressor occupier's timetable. But that in Ukraine only successfully solved it was published by the leader of the Chechen field commanders. According to him, more than two and a half who fled without resistance to the Russian language they rely on Ukrainian nationalists. At the same time in Russia extremist and banned jackals. I say this not as an official but as a volunteer on behalf of the patriots of Russia. Choral music. Some of the Russian men. Commander Kadyrov a large-scale operation to force the peace of Vladimir Putin ordered a special unit. I ask the country's leadership of the Supreme Commander-in-Chief of the Armed Forces of Russia Vladimir Putin. The corresponding order gave these politicians and several residents of the republic of our women old and children and grandchildren Bandera and so on. Earlier, Ramzan Kadyrov showed an example of the Ukrainian political and military situation. I met in an interview with journalists head of the foreign ministry Sergey Lavrov citizens of Ukraine. They spoke to us, we will continue our operation because we can't afford to keep the infrastructure in Ukraine that threatens the security of the Russian federation and the militarization in that sense we unfortunately threaten the infrastructure and the weapons it will complete even if we sign a peace agreement it will have to include such a clause. That's why the federation council of February day president vladimir putin of course counts on a miracle on the part of the ukrainian authorities. This is a terrible situation in Ukraine said Timoshenko. I that this is a crime and this man about 1,500 were injured and 172 were captured said in the Russian department.

[00:06:58] To find out the time no longer fighting the Russians someone in front of my eyes not fighting a friend and I will say. Her decision was taken by all my friends and close friends I am very soviet era. My heart can be found in Ukraine. This death was and Ukraine. Death to Russian rural settlements family is much more comfortable poutine on the territory of Ukraine. Don't kill Russian pigs as much as you can. Every aggressor occupant should go to Ukraine only death I am not the territory of Ukraine. And all the childish things in the family have not passed the occupant poutine and Ukraine. Kill the Russians as much as you can. Every aggressor occupier should find only death in Ukraine. That and Ukraine. Death to Russian Russian Russian family

family and the aggressor and occupant killer Putin on the territory of Ukraine kills. Russian families as much as you can. The aggressor occupier should only find death in Ukraine. In the history of Ukraine. Putin's local company introduced on the territory of Ukraine. Reality show house 2. The Ukrainian media has gotten around both events in Ukraine. You can say that further work on the territory of Ukraine. Russians and Ukrainians and Russians all know how much you can and the aggressor occupier should find in Ukraine only death but also Ukraine. Not the rural family of the aggressor in the mentioned point on this reference point broadcasts to these Russian pigs as much as you can. Every aggressor occupier must find in Ukraine only death but that and Ukraine. Death to the Russians. The population death to the aggressor and occupier. I'm happy for Putin and Ukrainians kill Russians and as many as you can.

[00:11:07] Every aggressor occupier has to work here you can calculate and figure out where he works from. And russian soviet population family aggressor gang putin on the territory of ukraine. And as many as you can. Every aggressor occupier must be found in ukraine only keeping ukraine in mind. Russian soviet in their family an aggressor and occupant the whole race of Putin would like it and Ukraine. But if the aggressor. In ukraine only instead ukraine and the only aggressor family in the global market of the aggressor putin in the territory of ukraine. Of course the work is set up and in Ukraine only meaning both Ukraine and. The place where the occupant's country will be held it is called. And not only can not the aggressor occupier should find in Ukraine only death. But in Ukraine. Together with the families of the mountainous side of the occupant Putin is necessary and. These Russians not only can. Every aggressor occupant must find in ukraine only death. But if ukraine. Will give the order to take control of Kiev and Kharkov. The head of Chechnya called on the president to increase. Ramzan Kadyrov asked Putin to give an order to take control of Kiev and Kharkiv. The Chechen leader called on the president to increase the tempo of this operation and let it finish in a day or two so that Russian fighters do not continue to die. I ask you very much for us. Italy wants. 2 what. What is going on there it will save the state of our state and people. While negotiations with the Ukrainian authorities on the settlement is not needed as a negotiator Zelensky offered himself and said that in this case to solve everything for half an hour I ask to allow our fighters to show themselves to the fullest allow them to use all possible and impossible their strength to end once and for all through negotiations.

[00:15:30] It's good democracy freedom of human expression is good but nevertheless our brothers us give beauties to our fighters to take over kharkov kiev and all other cities decide how qualitatively. On March 3, at a meeting of the Security Council, Putin said that the special operation in Ukraine is in accordance with the schedule of special operations and that if all the tasks are successfully solved. Earlier, Kadyrov published a video of Chechen specialists. On it the commander Hussein said that his subordinates of the nationalists. According to him, over two and a half thousand Bandera fighters escaped without resistance. The head of Chechnya announced a reward of 500 thousand dollars for the heads of Ukrainian nationalist commanders. A reward is announced for the head of Ukrainian nationalist commanders of the Banderaists of Azov. At the same time in Russia extremist and banned Dudayev about Maidan battalions. I am not saying this as an official, but as a volunteer on behalf of the patriots of Russia. The same volunteers who have the financial means and who are willing to pay 500,000

dollars for the head of each commander, Kadyrov proposed launching a large-scale operation in Ukraine on all fronts. I asked Putin to order a special unit. I have asked the Commander-in-Chief of the Russian Armed Forces Vladimir Putin to give the appropriate orders to all the special units so they are able to finish off the Nazis and of course the terrorists who murdered our women, old people and children in the Chechen Republic. At school. I can feel it. Earlier, Ramzan Kadyrov showed in a film weapons and equipment of the Ukrainian army and captured Chechen OMON fighters to destroy the entire infrastructure of Ukraine is one of the main tasks facing the state. We are ready to continue our operations we will because we cannot afford to keep the infrastructure in Ukraine that threatens the security of the Russian federation and demilitarization.

[00:18:24] In that sense in terms of destroying the infrastructure and weapons that threaten us it will be brought to an end even if we sign a peace agreement it is bound to be such a clause of the Minsk agreements and the Ukrainian authorities said the ambassador of the situation in Ukraine 498 Russian military have been killed. This Sunday 11 people were killed in the Ukrainian army about 1500 were wounded 172 were captured reported in the newspaper. The Ukrainian people and in Ukraine weapons in their hands should be destroyed rabid dog. Ukrainian people and ukraine weapons in the hands of ak bars machine gun valeriy alekseyevich I renounce the russian language. In your opinion what will happen. I can promise the main hours but of course that in a row a big family is you relations practically. I feel that our country has lost a very good relationship as far as I am concerned. That the soviet union has matured as a certain 10 years ago dealing with the anthem. You probably have the following situation going on. Somebody came along and sang the Russian Nazi swine to the Soviet Union anthem. You know, to go on Father Sergius comes out. And russian billiard sports ratify russian fascist broad marks time. Now arises. Russian tourists. Regions are not afraid even if not fighting violence. Bronze soldier only we are not us motivating that Canada is not at war Russian. [00:03:38] smiles roman anatolievich. Fedor I have on the radio the topic. Liliya I think all the time on the news broadcast May 24, 2014. Nina fedorovna on the radio topics. Roman antonov fyodor at my romances romance. For this role, she was born again. So do not decide. But I do not say where do you look at the salary for one side. Anatoly Fedorovich I'm on the radio all I can bring options refinancing on the radio and I say yes yes yes. And I remind mts. Well come on die mts refinancing scheme let's call it that. Because I've never been. She never explains how it's all supposed to be. At the time it was assumed but no more than that. Moreover, this small victory brought Ukraine and stability in the region. There was talk. Ah. It is also alarming that. However, Ukrainians also walked on that very Ukraine. Ukrainians won't give up. And I think you went for ukraine and quite likely no one will take because as speculation has shown you nothing has changed. Glory to Ukraine. K. Larina can we. That's why I'm on the glory of ukraine too. Construction. And according to the press service of the Ministry of Defence of Ukraine on the issues of language restrictions sit quietly in silence, but you still continue to travel abroad by the millions. Refugees from Ukraine and wish only at the moment. And these soda pop slogans and talk are extremely dangerous. I think more and more katsapians material aid is being brought into those regions that have already been liberated from the banders also kamazes will be russian material aid mchs says tamara.

[00:09:14] Through the rank of ambulance crews more likely kyiv kharkov will start to be fed because there is already nothing to eat there too absolutely all photos anastasia do not sit rejoice rejoice. Now you can move it, I have all the grounds for the paperwork. We do not know yet 70 meters of free access to this is all that is possible. But I just children. Of course we forget. A. Although for me the event I have never seen that kind of talk. That's why you don't have to talk. I'm terribly not into it. I'm just talking about the fact that at this point in time the free country in power is different so it's all clearly visible that no one told me anything about theirs. I think it

was some kind of I do not want to think about it at all. But recent events that are ready in this they. Now. Serve. I thought a long time ago I thought about the fact that 8 years and my name and the name of the Russian troops. Particularly at the airport on the first day paratroopers checked airports in the south 7 8 mi 8 mi tales he tells you don't tell you 8 years my russia fought on. Here they are the conflict within Ukraine. Responding to the tales of having russia at war and russia in two days put all the dots on the i. It became clear that we were very much at war our acquaintances who fought. Went through. Dangerous you know. Was working as an aide when she got to that paralysis when we went through.

[00:13:00] It became apparent that we went through years ago no one came to us we started slowly until we already got to the edge of the question where did such a okay okay. So I think about the beginning of the civilians of Donbass who 8 years ago felt like it was good to live in basements and subways. I think that 8 years the inhabitants of Donbass also talk to Petro Poroshenko on wages our children will feed themselves our children will study at school and your children in Donbass although the country is one Ukraine and Donbass and the rest of Ukraine children of Donbass will not of course but they will continue torn it was publicly voiced on television. What it is. Deceived and Donbass more or less began to stir but for their words to answer guys without an answer does not happen. Just what russia gets with its thoughts after all the europe and america oligarchs spit and did to the country of hope is not right. I think that after this kind of talk is probably a little shameful. I know how they start what they used to yell at one point and then everything changed in Ukraine says they know nothing is going anywhere it is all paralyzed wagons yelling like crazy. Do not give out anything there. Even the stories of what you said is a fairy tale and our very strange war has started. So it is clear that in the Donbass. Although I don't really think it's what Kharkiv subway noticeably the Kiev subway is jammed with millions of Ukrainians.

[00:15:37] These are spine fracture goods. And we can all the more about your yard. He has a very cold winter and I went on. For the medications that run out you have to exchange it first can exchange it for me because I know the position on that. But guys this is not Ukraine and there is one country that has nothing to do with this. I am orthodox because Ukraine is a country. It's a country like ukraine in no country. Yes this position I started respecting back to help ukraine need a few billion. So come on guys respect respect the answer you passed on all your faults that not only with both hands. I am talking about the great ukrainians who fought for 8 years and on the fields of irritation of world significance it must have changed a lot and it is no longer clear ukrainian it is bad publicity it is a great nation it is ours so very much there. It is clear an hour and a half probably do not give you. They are even educated is normal. However, it is too early to tell. I said it's my wife so it's okay I'm okay says again the same thing we've already spent to date. Surely your wife is my mother mother our servicemen. So she laughs. So I want to tell you that it is unlikely and then on someone it did not work out much I have 8 years in different places on which they one-time, so I think that may begin as early as next year. However, in spite of the problems it needs to be rebuilt. A lot of work has been done not been mobilized crazy losses passed in the parliament on whom the bench which was given a new name.

[00:19:56] No lease agreement like never anyone goes anymore because I know what to negotiate if the country is not able to airfleet only guys. Medvedev understanding that we are talking about negotiations was not mentioned however there are children everywhere where there are children in the forest children or what. Well on 20 18 20 years old nobody has seen. Let's say how much demonstrates how realistically everyone there for 20 years to 25 they all went to serve in office and with their term that is before that and served in. So the children are no longer there and to refer to the fact that there are children serving there from the outside, well I would not say so. There are ordinary children there. They pay the rest they dug up themselves came to kill in Ukraine. But the Russians who are already crying are understandable. And they are alive. These are the people who have lost their own. A lot of them, but stay on the side of the dnr and your mother and you have to pay for it. His plans include I'll tell you one thing he shows his panties. The last show I watched was a correspondent telling an American young guy a cute bear in a polyethylene beautiful and medium corpse stands up an elderly woman we men no losses from the Russian side or they send us live dead at least not like you have on your island. They bury the guys who are already new. Then the fans come up with bags and I have to say the wrong one said I just remembered this case.

[00:22:28] Although it certainly wasn't American we understand that it's tales to tell about dead bodies have been and always will be about the war effort. But the children would be more if now pissed it pissed kharkov was in kharkov one and a half million people. Three million dead civilians, but no one does that, guys. That is why you should be reasonable and think that our armed forces treat you humanely instead of destroying you. The subject has asked for the armed forces in full. You hear? At least we don't show on TV not body bags that raise the price of gas cheaper than before ours did before and took it on faith and said. And. Yes I can. Yes everyone is just great no one took anything all full of chickens left back where they came from. Well, well, well, in the Ukraine and in our country all are handsome.
