

websdr_recording_2022-03-03T19 34 46Z_7061.0kHz.wav

[00:00:00] Not anymore. I'm not going there with that chair. Well, maybe today they'll kick me out, but it's better not to go in. Let's go item by item specifically intercepted. That's how it happened, for example.

[00:00:14] Okay fine but it's a matter of right predicting necessarily. Because to me. It can be left behind the wall. Now I've been gathering information and while initially I've fallen sharply on this that I've now said that according to the land plan as they say according to the plan this vegetable garden is quite a small yard and the vegetable garden is small. And then we'll look at the size of the node and the triangle. And according to his plan.

[00:00:57] Everything will work out there everything will work out but I have a Baltic area and all deployed I have no iron on the edges at all. I mean everyone is roofing and not chauffeuring everything on the roof shorter neighbors. But there are two pipes shorter there he has some kind of summer shower he made and everything. That's the way things are on the ground. But here, too, while stretching to put anything yet do not know this year, and maybe start digging this basement. Machines will go all digging will be in the summer in short I do not get here to turn around 200 meters at least 10 to raise the far ends of the freedom to drag an excavator here I had to go to a rally, as if so on, so a little while there is still nothing to prepare in principle, everything can be to the fall, and then maybe something will come up. If the time will be such cases, but now I already have something to think about. Me too there once thought Volodya to be twisted shortly about the telescope antenna. In short, we argue that the amplification carries homemade shorter make. But I have thought it over, but in practice I do not need to know how it will work. I am a little bit would be like that would not think through it right one by one. Although everyone is thinking there will be something right there will be 20 meters long, you can lift 24 meters... I have a picture there, it will not be some kind of a net or a super net, to put it in a nutshell. I have to think it over there too. Okay Volodya got it all for example

[00:02:54] For Vyacheslav, it's all taken care of. Okay, I have my own brains about the antenna. It's such a serious matter for me, you know, a very serious matter for me to put in a warm antenna. And then I will be

[00:03:09] I'll be flying to her already on the record for example. Yeah yeah. But I'm here too with this witness myself collect little understand what also with these factories with my pancakes. And as if I want to work at least one trophy at altitude, no one hears me on this subject at all. So I got myself a 43, but about that in a kilowatt per transformer in the power supply or 200 short on one pancake in a landing to 1600 goes and rocking it I say somewhere from 43 to 50 you get a good 45 50 liters on 45 exactly the short end of the rocking. Well, it kind of helps a little bit that spits on.

[00:04:04] Kolya I also want you there are hints on the baton. They're there even more than 520 I don't need any more. They sent me away won't be able to function at all. Lisa's it's good.

[00:04:19] To coordinate and fit the reception. That's a yes that's a yes.

[00:04:24] And then you take the engine short you put it on the ground here's a kilowatt short of reception.

[00:04:31] I see I understand. But one way or another I'll tell you my plans

[00:04:35] Revealed at the reception. Normal plans all. The main thing is not to retreat in short as outlined such. The most important thing is food transformer offers in short. But I will think all together with banks here. I have to make a decent nephew. I don't want to buy it myself, I have already thought it over, all come in one place already there is such a good container in a box when we are under 43. To redo it all we will someday. For now it's just sitting around talking to the soul. It's been 15 years since I was on the air, so I've given up on the business. It's such a thing all this business, all these fucking companies on these fires around the world decided to survive a little differently on

[00:05:39] We have to get this whole thing right for our age is dangerous for mine. But really like I just finished one I like the same thing I have one says

[00:05:57] That I'm still there.

[00:06:00] Gryzlov gave the go-ahead for the fight all well taken by me. I have a double gap in europe I made this very circular chart.

[00:06:12] It's okay all right I think it's good to hear everything clean. I like it for example.

[00:06:19] But I'm like there I don't know I'm like more than 5 short if I'm honest you know so sit down to chat on the air itself kind of close. It's a very important move to make a decent one. I wanted to buy it at first I thought maybe so much money spent on it all I wanted to take the whole 140. But then this suitcase in short that the whole thing was with all things short and with low voltage units. Completely had it in shock but all completely resistant short story well there is probably no threshold for everyone. No desire you can just break and yourself. Here it works now a little voltage is removed and a new box. And the gods with it, let it open good coupons here is 800 to pump there shortly speaking about 800 kilowatts or so one or two plus one minus one kilowatt. In short, I will not hear you everywhere normal antennas in short, all come up and who will hear you. That's what I think is the best. Already now on our air, I think you need about a kilowatt anyway.

[00:07:40] That's right you're right you're right. Now in business it's not a job it's dangerous. It was like that before the accident, you just have to toughen it up. And I tell myself as much as she does, for example.

[00:07:57] What's the minimum because all that noise right now that they're sitting there on the air now then it's better better yes better somewhere at least like that. You can even make it 4

shorter for example and there's a better kilowatt there as well. It's kind of like that. And if there is another lamp like you have for 40 examples they will be good for not just a thousand years for two thousand years in this mode for example

[00:08:27] Any subscriber entering the mode and will do. I'll confess I'm very dignified well now. Even before it became the very thing. If I said in one position so I receive well gentlemen loudly heard on the reception.

[00:08:49] They have it good. That's really good. In the meantime, I've got my module and reception there. And I don't need to touch anything.

[00:08:59] Great motivation population look out for high reads well and better succinctly not bad. So. For me I would think nothing of it is a good reaction to the reception.

[00:09:14] That's basically it. And here it was quite a microphone as I was acquiring in short. And here it's 500,600 and there's 175,175. And that's how through a pillow all the conversations you get, and how I did not twist and high and do not understand where he is as it is gerrymandered some distorted you can not understand. It's so bad. And this hymn is playing at karaoke now. I stood there, he played something like 550m and the head is like this, and that's how I twisted this one here, plus 30 minus 30 minus 30 I put this one today. So basically the way it was, thank God for the reception.

[00:10:03] I was looking at about the usual. Foolishly kind of like now the sensible you and I for tonight something else say so you can and maybe still come to you for an appointment.

[00:10:20] And maybe the cabbage and the self or might fit.

[00:10:26] I'm going to go watch TV for a little bit on reception.

[00:10:33] Well I'll try to call out doesn't know at all although tomorrow will be a shorter day you could call it that. I go out to look outside and it's snowing all over the place right in front of you.

[00:10:49] Generally awesome. We have a kind of east and a small little vali now already came out giving a new profession on the verdict. The TV stopped showing and the reception.

[00:11:01] Yeah, little did he even go to feed the cable knee-deep. He already had a Suvorov. The Turks didn't let him do it. Few people went agitating it's a nightmare at my construction site too, there's a whole side of just poles so far standing on the field side here I've got the whole field open, there's a fucking wind and it's snowing so nightmarish I looked on the internet and there's some weather there and 10 11 12 what is it and Yandex shows me were there and in the middle of it I won't go anywhere and we won't want to run away from mine. I'm not going to go, I'll probably refrain from going to the reception.

[00:11:51] When every once in a while when there's something there and it's the very

[00:11:57] E. It goes on and on about what Obama.

[00:12:03] So in the home opener, we have an internet broadcast on reception.

[00:12:11] So the sentinel is short in the mop up era again. So I'm already getting pummeled here in this hellhole. Looks like the last snow I think it's probably time after all.

[00:12:26] About the mob doesn't know a clear answer yet from February 5 is February 6 and in March that's the snowfalls. This is all February.

[00:12:39] March takes over the reception. Locals.

[00:12:44] For our part, we're willing to provide airtime and to show these scary things that you talk about

[00:12:50] Nothing to tell and show halfway through all these materials we can give the materials and in and and the condition and the streets of the houses of the schools of the kindergartens. Literally one of the first days they shelled a peaceful pharmacy. And all this is that the locals simply did not let the armored vehicles out of town fired from hails. There were more than a dozen deaths from shelling and three children died from hail attacks before they had time to reach the bomb shelter in the basement of the kindergarten and they were killed by shells right on the territory of the kindergarten.

[00:13:47] Dmitriy thank you for this story and we're waiting for a reaction if you have any confirmation of these words so that we can show it to our viewers. Dmytro Savitsky is the head of the Luhansk Military Civil Administration who says that the entire Sumy region is. Not heard, but he will definitely hear who says that the entire Sumy region is now the territory of hell is the border region of Russia. Thank you. The President of Ukraine today during his press conference also answered the question whether he was ready to give any guarantees to Vladimir Putin. Here is his answer and at the same time an address to Putin himself in Russian.

[00:14:39] Guarantees for everything but we didn't attack Russia if we attacked it before. There is no guarantee that we are in the nato we have nuclear weapons and what should I say to whom should I ask. You understand this is also an information bomb that everyone says to give up. God what do you want from us get off our land and you want now come sit down with me at the negotiating table. I'm free. Just don't go 30 meters like wagons with Wales and so forth as I understand it. I'm a neighbor. I don't need to be held at 30 meters. They don't bite. I'm a normal man. Sit down and talk to me. What are you afraid of? We are not threatening anyone. We are not terrorists.

[00:15:42] All literally minutes after these words by Zelensky, Vladimir Putin's address recorded again in an empty office with members of the United Nations Security Council via video link was published. Although even officially if karina does not know what else but almost all the

indigenous restrictions in Russia recommended to cancel Putin spoke about the heroism of Russian soldiers and Ukrainian neo-Nazis on cars.

[00:16:10] Well done. I am Dagestanian I am Chechen Ingush Russian Tatar Jew Ossetian all from more than 300 national groups ethnically. It is simply impossible to list them all. I think you know what I mean. I am proud that I am part of this world, part of the mighty and multinational people of Russia. However, I will never give up my conviction that the Russians and Ukrainians are one people. Even despite the fact that part of the inhabitants of Ukraine has intimidated many about the deception by the fascist nationalist propaganda and someone consciously of course went the way of the Banderites and other henchmen of the Nazis, who during the Great Patriotic War fought on the side of Hitler. The fact that we are at war with the Nazis is shown by the course of military operations by nationalist and neo-Nazi groups, including foreign mercenaries, including those from the Middle East, who shield civilians like human shields.

[00:17:25] I recall that apparently Vladimir Putin calls Zelensky the chief Nazi of Ukraine. Zelensky himself of Jewish origin of the state emergency service of Ukraine says rescuers continue to clean up the aftermath of the shelling in Chernihiv, also a regional center. In Ukraine, the bodies of 33 people have already been removed from the rubble. We are talking about civilians, not the military. Russian troops continue to shell a peaceful city, a regional center where about 300,000 people live. No further comments.

websdr_recording_2022-03-03T20 06 27Z_7061.0kHz.wav

[00:00:05] In all of them.

[00:00:42] And for the fact that while we in the newsroom carefully select the footage that we show you. The worst are the most brutal. We don't show it to try. Taking care of your emotional health not knowing years old so you can say. The National Police of Ukraine also published footage from the ruined Chernihiv let's look at them. Residents of Chernihiv region warned of possible outages with electricity communication and Internet. The footage he promised to be sure to see let's see next I will tell you that the governor of the region Vyacheslav Chao urged people to charge phones and banks.

[00:01:33] Let's see this is the twenty-first thing left of it. Do you have a Kiev school of aviation impact then you can. This is your process. But the speed situation.

[00:02:33] Didn't make us

[00:02:45] Strongly love or dislike our school

[00:02:53] Corresponded. Not our profile.

[00:03:26] Roman Kostenko Secretary of the Verkhovna Rada of Ukraine Committee on National Security and Defense and Intelligence Roman hello.

[00:03:35] Hello.

[00:03:36] I just got the news just a minute ago that the Czech Republic has allowed its citizens to fight on Ukrainian territory for Ukraine. That's actually why we're going to start with this. Tell me how many foreigners go to fight in Ukraine for the Ukrainian army and how this is solved at the level of legislation

[00:04:00] At the level of legislation. Since 2014 foreign people who have foreign citizenship and legally got to Ukraine are allowed to fight for Ukraine. Now we are adopting new laws so that these people can even be in the armed forces now saying that they can be in different volunteer battalions. All who can hold a gun in their hands all who want to defend and fight against the Russian aggressor we will give guns and give such an opportunity because Russia is really not only in Ukraine killing civilians not only in Ukraine pursued its destructive military policy and in other countries now I think the time will come to fully get what they deserve for what they have been doing recently final shots. I am an officer in the secret service. I think it is possible that when my collection is finished I will come back, I don't know, I will be at the head of the secret service and I think for Ukraine in the next 20 years when we will win or maybe even more, when we will continue to fight not to fight but to establish our independence and to raise our democracy and to raise people in a new spirit in which we will find certain countries. I have always been a politician or a representative of the secret service we will find every last tanker or infantryman who was on this earth and we will destroy them like Israel no matter what country they were in for the atrocities they did I understand the army fighting the army yes I understand that but when these guys are shelling our cities and killing our civilians they are not soldiers they are scum. And that is how we will address them here.

[00:06:10] Roman I remind you that we often have children in front of our screens too

[00:06:16] But children are watching and the fact that we have children lying dead in the streets. Although I said it very mildly what I feel.

[00:06:26] I understand perfectly your feelings about foreign nationals going to war in Ukraine from where they're coming from.

[00:06:36] What I know go want to go in the United States of the Czech Republic of Poland and the Baltic countries of some European countries of Turkey. People from eastern Europe are very much willing to go and fight for Ukraine and against the russian federation.

[00:07:04] Roman Is there enough guns in Ukraine right now.

[00:07:11] Weapons are plentiful and it shows that we are now running in column and beating the enemy. I'm in the city of Mykolayiv right now, this city is my homeland. I myself was in Kiev when I came here and I'm here now and I'm fighting too. Yesterday we took five prisoners from the 10 Brigade of Special Forces. You can look at my meetings on Facebook there are these

prisoners who came here great special forces. And then excuse me how girls sit and cry and tell us we were sent for meat. What kind of morale their spetsnaz have. I am a spetsnaz officer myself, a colonel in the Ukrainian alpha and in Russia there is also an alpha unit to be awarded the title of Hero of Ukraine. I mean Russians. Excuse me please. So I am afraid that their morale is like this they came here trying to intimidate us trying to destroy us but they will not succeed we will stand to the end we will fight again. I'm in Nikolaev right now, this is my homeland. I'm here and I will fight for this city to the end no matter what happens. It's a very tense situation right now. Right now we're shelling their columns that are stationed on the mocking ground, trying to build some kind of crossings. We are destroying them and more and more broken equipment and corpses of Russian soldiers are defending Ukraine every day.

[00:08:49] Roman thank you very much. Roman Kostenko, Secretary of the Verkhovna Rada Committee on National Security, Defence and Intelligence, thank you very much. Well, Ukrainian President Vladimir Zelensky today, during a press conference for foreign media, once again said that EU countries should close the skies over Ukraine and a no-fly zone. He has been talking about this for several days now.

[00:09:17] Again every day tonight you know what was the bombing of Kiev and other cities. The bombing of Kiev. Three bombs and in the center and in the center and that about the capture of Kharkiv of course and in Kharkiv you saw what happens there and not today and today and yesterday and the day before yesterday and also in other cities of our state. In Mariupol they were shelled. They say we want it to close the sky, so we want it to close the sky because it kills our people. These missiles and bombs, Iskander planes, bombers are flying out of Belarus and Russia's territory. All of this is going on. I turned to the sky I am talking about closing the sky I turned to President Biden I turned to my surrender and I think it might have caused me to call 20 to 30 times and I have been making people's calls every day I do every day. I was saying you can't do anything if you can't put off the sky for me now the heat is everywhere. Who now give us the term give us I am in Europe. Can you now you can not now for example give a term when you see it how much to live. It's already criminal to get them disconnected from people to. Tell us. I'll go and count and we'll wait until then. And if you can't then it's terms even lines. There was what was happening to us I asked don't do preemptive sanctions before the war starts. You will see they will not come. Give a full understanding of the whole package of sanctions. I asked all the leaders of fifa apparently knows the answer you know thank god thank god now I can say thank god the whole world now sees that it works. I just I to Russia this secondhand czar I just like I am asking now to close the sky. If you don't have the fortress strength to close the sky then give me the planes.

[00:11:42] Sergei Galitsky the military expert from Ukraine joins our broadcast. Sergei, hello. I want to explain once again to Ukrainians to our viewers in Russia and in other countries what a closed sky is, why the Ukrainian presidents are so desperately asking for it, why neither Europe nor the United States agree to it.

[00:12:03] Hello good evening in the studio what do I know the question is very complicated and in general the closed skies regime provides for the use of all the capabilities of the air defense

systems of Nato countries and the detection of any air target no matter is a civilian military air target over the territory which is declared closed for flights. This is important, this is important.

[00:12:36] I now want to clarify you know this you're saying that this if the skies are closed over Ukraine then any notional Russian aircraft would have to be destroyed by air or fighters or whatever the Nato air defense is.

[00:12:54] Sharon there. But Nato's in.

[00:12:59] That's the essence of this request because we see what Nato is doing. You understand that it's impossible to launch a preemptive strike on the Iskander missile launchers that are in Belarus at the moment because. But as long as the situation does not allow for this, the Belarusian troops have not entered the territory of Ukraine. And this is a very sensitive point, i.e. in this case if such preventive strikes are carried out it is possible in principle. In this way Ukraine will look like an aggressor, so the Ukrainian leadership is not going to take such a step. That is why there is such a question and it is quite emotional. In a sense we can say it is rational from our point of view to close the sky and cover it with the air defense forces of nato member states.

[00:13:57] So in that case according to your estimates the U.S. Nato and the European Union countries can go for it.

[00:14:08] You know, it's very difficult to assess because we already had such a version of open skies when there was an operation by coalition forces in Iraq, that is, the situation there with the United States was quite different. In other words, it should be understood that there was not even a potential threat of any kind of minimal or virtual use of weapons of mass destruction such as exists today. Here we already know that the help to Russia. Yes Moscow. And Putin has brought the nuclear deterrent forces to the highest level of readiness and is conducting a series of exercises to demonstrate this, you understand. So of course our western allies have some concerns that Boris Johnson said in his speech that we're just afraid of starting a World War III escalation. So he stressed that we are doing everything we can to provide Ukraine with defensive weapons, but we can't take that step yet, he was very frank.

[00:15:19] Speech by a. Zelensky in this list says then that these planes as well as the planes in question

[00:15:30] In this case, you can't talk about aircraft alone. We need to talk about higher-level air defense systems, i.e. those tactical tenders that we currently receive and use very effectively. We see what kind of losses the Moscow troops suffer in this case we are talking about systems such as the iron dome air defense system. But here we are talking and you understand that it is not only American weapons of the Israeli solution that could better cover the skies over Ukraine and we need such systems critically. While there is a request for this step does not go while the West is supplying us exclusively with tactical weapons though. Well, let's be perfectly frank, the main strength of the Russian Federation's armed forces is ground forces and tactical aviation.

And such a, you know, immediate response to aggression. And in principle this was foreseen from the very beginning, such an immediate response was precisely the supply of armaments and combat equipment that provided

[00:16:46] Which can fight exactly how

[00:16:49] Exactly tactical yes. Well and the second option is that you understand that in addition to the fact that Ukraine had and still has its own air defense system, it was based on old models for a long process of training air defense specialists for these new systems. I am more than sure that such training is already underway, but understand correctly that it takes time. It takes time and resources and stamina. We are still holding on with what we have. For example, right now the air defense system in Kyiv is %50 airborne targets. Unfortunately, there is no such defence system in other cities, which is why Ukraine suffers from terrorist bombardment of Moscow.

[00:17:37] Sergei now gives the impression that. Iraqi troops are simply destroying Ukrainians and Ukrainian cities. And the west is trying to hold back with economic sanctions of various kinds and deliveries of possibly but such cautious supplies of weapons. Do you think that at some point the collective west will enter this war on the side of ukraine.

[00:18:10] You know, I don't think it's yet possible and as I said the most likely question is the transfer of more modern weapons systems to Ukraine. Because I've already said if the air defense is the patriot system and all those that we're most familiar with and that system. I am not even considering this question in the short term, even in theory, that the West will fight on the side of Ukraine, I see no reason to do so. Because you know all the same the democratic countries are quite identical to their children, in this case they know that they will defend the borders of NATO and unfortunately Ukraine is not included in the borders of NATO.

[00:18:58] Chemezov in the composition from ordinary Ukrainians who can't give up their arms for whatever reason and are now sitting in basements quietly or under fire they forgive him but when will it all end you have the answer to that question.

[00:19:15] Unfortunately I don't have a positive answer for my fellow citizens. We are well aware that the Kremlin with its current affairs and wants to bring Ukraine to its knees by any means. We also understand very well that Ukraine will not kneel, so the fight will be long and brutal. We know how it will end. It is impossible for the Kremlin to defeat Ukraine but it will be a long, desperate struggle. More precisely it is necessary to prepare.

[00:19:43] Leningrad foam expert. From the Ukraine. Thank you. There was a second round of talks today in Belarus between the Kremlin and the bankova. The parties agreed to organize more precisely so agreed to indicate that it is very important to organize humanitarian corridors for the evacuation of civilians and delivery of medicines from the site to the quarry and withdrawal of water. In the meantime, it became known during the day that Russia does not allow the opening of humanitarian corridors for local residents in Mariupol now the city of

Mariupol is located in the Donetsk region on the shore of the Azov Sea, and the city has been under shelling for several days in a humanitarian disaster, the city council said and stressed that the Metinvest group, which belongs to oligarch Rinat Akhmetov, is ready to organize humanitarian corridors.

[00:20:48] But here is a quote from the Metinvest group ready to leave Mariupol food and necessities at any moment. But the worst thing is that the enemy does not allow to open humanitarian corridors than creates a humanitarian disaster in Mariupol.

[00:21:05] The Mariupol City Council noted that for a week production at all enterprises of the Metinvest group in Mariupol has been stopped. It is a huge industrial enterprise in the city now there are only those who provide maintenance of the life of equipment and make sure that technological accidents do not occur. Mariupol remains without electricity and other communications due to Russia's military invasion of Ukraine. But it is hoped to be restored soon, the head of the Donetsk military civil administration Pavel Kirilenko said that Russian invaders are purposefully destroying critical civilian infrastructure in Mariupol to create a humanitarian disaster there. We recall that in the evening it became known that a large Russian army column of more than a hundred pieces of heavy equipment was moving in the direction of the city of thankful, Zaporizhzhia region. The Russian military shelled a roadblock at the entrance to the city. Channel 1 published a video of Ukrainian territorial defense fighters burning the checkpoint to prevent Russian equipment

[00:22:14] Walk into town.

[00:22:40] Pulling back Pulling back

[00:22:43] Pulling back, pulling back. Why is it so important because that's where Zaporizhzhya's nuclear power plant, the largest nuclear power plant in Europe, is located. According to preliminary information, several residential buildings were hit by the shelling mayor gaidar dmitry orlov continues to publish video of the attack. This is the most. Because of the shelling there is no water supply in some neighborhoods no light. The mayor said that energyatom continues to record crimes against humanity by Russian troops and asked city residents not to open the door to anyone turn off the light in the apartments and houses. According to Dmitry Orlov there are at least two wounded civilians. Their condition is being clarified. We would like to remind you once again that the largest nuclear power plant in Europe is located in the energy darya. Ukrainian presidential adviser alexey borisovich appealed to residents of the cities that Russian troops entered in his new video claiming that Moscow has already introduced into Ukraine 80 percent of the military power accumulated near the border.

[00:24:49] All over here all these strikes on cities with missiles are the forces of our resistance they understand that there's nothing serious left and the only advantage is long-range missile strikes that the Ukrainian armed forces don't have. And they're trying to do it that way. But in the meantime more than two hundred thousand rubles have been formed. In all our brigades are no longer accepted for officer positions there are staffed gathered officers professionally deployed

and sent because combat brigades are no longer accepted. Defense is double staffed with a set of troops ready for every staffed unit. And the west all the more the weapons by echelons let's say and behind the tracks and now there are two schedules fighting the Russian attempts to suppress us and the schedule of Ukrainian military power growth and so on. There will be a definite tipping point one way or the other depending on where they meet. Because with Western weapons, with our mobilization, we will be able to build a system of protection and defense that will prevent the Russians from realizing the second phase when they try to go into battle with the last remnants of their forces and try to qualify as they did today. And as they tried to do around Kharkov and Nikolaev. It's Donetska that depends on the size of those resisting in the occupied territories winning seconds against the Russian occupiers. And there are no big and small centimeters here every second can be decisive our brothers in the occupied territories lift our pennies under their shoulders. They are doing everything to avoid the Russian pressure and our rise was as high as possible in our favour. And every second of this resistance makes us the winner. If there is still a chance for the terrorists to win we will continue their resistance with you remember further the whole world is looking at you.

[00:27:12] Andrei Kolosnikov, expert at the Carnegie Moscow Center, speaking to us. Do you understand Putin's goal

[00:27:25] You know, I just watched footage from Chernihiv an hour ago with civilian casualties. They're on the verge of a heart attack, impossible to breathe. And for this footage, we will now have 15 years in prison for distributing this kind of sheikhs

[00:27:55] Punishment is becoming more and more clear now. What. Pronounced this

[00:28:09] The speech was all told

[00:28:11] From the outside, all these ideologies that we've been on lately, too. I hope that. Even if.

websdr_recording_2022-03-03T20 30 29Z_3631.0kHz.wav

[00:00:48] They realize that no one said anything. You want to ask vladimir. I believe. Russian historian and he hints that.

[00:01:35] Alina Kabaeva gave the minus of a piece of cable here that is the gun to put on it put on the insulator just like the output mode I have it on the insulator it is not connected to the case. And I had to do so and the output. And shoot this hangout on the cable shield through the condensate. And of course the center core of the cable it there also through the condensate goes it was first turned on the center core of the cable from the container goes it was brought to the connection point in the condensate loop. The connection with the picture it was defined in a point where this condensate separating ring and itself with a place supporting plates connect. That is, there was no direct or alternating current coming in through this condenser. In general as co-authors by example

[00:02:51] I understood I understood initially what needed to be defined. I understood and

[00:02:57] I'm that and

[00:02:58] Meaning well because there are large capacities and counting there

[00:03:04] About 200

[00:03:05] Gets it I was watching the footage too I think I'll ask you how the butcher is doing.

[00:03:11] Ivan and on tens your three opponents

[00:03:14] How much are you being issued. And they didn't issue a tenner at all in April.

[00:03:20] Volodya I sent it this in the mid 70's I worked in denial and amplify it did for alas 3 melons this is already a reconstruction all this I tell but in the beginning it was a classic circuit watt 200 transformer power supply here the parallel power was. Naturally I was still working at the time and on the tens on all the range of the waveform only on the cards did not work. And there I of course from the water I picked up a card made of 2 mm silver wire this term from a dozen forty to forty milk forty oka there is already 80 and there is the usual insulated added one and a half millimeters or one and a half millimeters. And these potatoes are high frequency and it is done 2 meter silver wire but I had such a wire lying around in drawers for a long time and then I thought it would be used somewhere and then it will get there. So then I when it was tuned there were all working from the water all this, but after the reconstruction, I did not do even a tap because I had no antenna at high frequency range I do not have antennas on the pass itself. And I generally did not even try. But I think that after these siting, which I did in series. If then with the parallel worked then now serial power there everything is done very compactly. But I think there will work reception.

[00:05:19] I think this whole thing

[00:05:24] Because there are already smaller ones.

[00:05:26] Friends and family just one if not forever what's in the way. To these questions, thank you very much. So nothing else is going to happen.

[00:05:43] For the next 70 years, the most important thing is good health and I'll always be glad to hear your wishes. Thank you, goodbye. Yes yes. Yeah all right yeah. There is voltage on the potato but there is voltage on the and so. If you make a power supply in one case then you open also conditioners are charged it is necessary to discharge them. And in this case you have to annoy them. So I when I have already done there in a simple way I to it. Without missing one end. I've had two or more of these but there's probably 20 or 30 and it sticks out when you open the lid it's the resistance that catches your eye right away. So you take it right away and minus

your mistake. Once applied. Once two so technically once two three hours. Because it is necessary to apply it can now burn cool it probably stands. I have seen it all and then work quietly as they say. Well, the rest of course no only there is one thing. This is how I did it. Of course is that the condensate is the signal goes both minus and plus in the antenna goes and the film and the center vein. They go through the conditioners. That's the way I work. If there was any more power, of course these air conditioners wouldn't work, they would be out of order. And because the power here is about 200 watts, I only had 13 of them. I wanted to keep them, but then I tried the air conditioners and they didn't work and it didn't work. So for these wattages and there are some with bigger bills you can of course put new ones in. I have some there with big bills if they don't fit here. But if so then you have to put with good clans and everything will work fine. All right today we did. Ranevskaya sela zinaida 73 Movsisyan does not stand up to criticism. 10 and 13 e all they are good organizers in general, but they are a big pharmacy they powerfully hold. What is going on there. From no one is afraid of anywhere.

[00:08:47] That's not to me. Of course the first three there are only 15 at 1k

[00:08:53] 15 в 2. This is the kind of thing that is more preferable. Thank you very much thank you and you feel good everyone is happy. Yes yes all right volodya. But I thought if there will be some kind of mishaps they will try to warm up or there will be some kind of mishaps. I have been in my practice so it is noticeable that they are there greeting even burst. But I'm different then. I would add more I would halve these capacities and reduce and add a second one. To increase. As they say, let's add more claries and that's it. But no they're cold and the power is fine with that. Okay seven dollars for.

[00:09:55] polischuka tamara pavel.

[00:10:02] And Tamara the pike.

[00:10:05] three sons dmitry mary from good night. Good to hear nine plus here ivan pitifully belgorod.

[00:10:17] Daria Ivanovna good evening on belgorod on the shore. Wonderful your station hear 25 to 30 plus I petropavlovsk on the reception. Operator but.

[00:10:33] Yeah the signal is fantastic. Up to 40 played plus so first disconnected 30 and then lost and lost little by little. Plus also added so 40 days sat probably. Visitor good for a while.

[00:10:54] I don't know how good it is so with a bit of glue it was guided. The rock is cold then it gets hot and the signal is a joke. 81 works in two thousand volt mode on the legs such a 500 you can go to.

[00:11:19] So 81 me that's good.

[00:11:24] Reliable lamp. Well, that's 2 thousand more to add. For three.

[00:11:33] Four. I heard one. A comrade now deceased. I think it was Yuri Abramovich again. I heard from him, I think, that they were preparing vegetables for the competition. That's how six thousand were served. Well, that's how it was a competition, the lamp was thrown to the right.

[00:12:04] But the notion of cosmonautics is still something you have to do in Pavlov Park. And here it is so reliable not to blush and not ashamed. They work and work in private mom gives her half a kilo, and that's enough. I and today traditionally turned it on including the first and second grids in almost two hodgepodge on the case. From here the excitation goes to the protection point. Plus 200 volts and such a household reception.

[00:12:41] And the control grid and red. Instead of thrown to the case and there through the excitation conditioner. And the protective. The protective grid applied a small voltage. And the voltage is then applied to shift a little bit of the working i.e. idle trick a little bit to increase the reception.

[00:13:08] He's practically gone an extra machine gives out for the devil on the receiving end.

[00:13:15] When all the hard-earned things on the pété.

[00:13:20] I understand the reception.

[00:13:23] Careful on the screen you hit the protective

[00:13:28] control screen in her place even you could say one auntie and a protective sort of

[00:13:35] The screen is already getting a reception. Yes she our dacha is in her functional. Oh, come on. I've seen similar things on the air. But the signal is a little old so to speak on the beach

[00:13:57] And without the resting current it certainly clicks. Maybe this contrast should be turned off again in retaliation to the press it will be a little softer on reception.

[00:14:08] Well right you checked yourself out a long time ago. Yes of course softer of course. Yes the tube. The characteristic is linear. You have to of course I think you filed this to. Shift the operating point to open you up on the pair. It turns out to be almost zero. Of course, you have to manage to move the lamp so that it works our butt off in reality.

[00:14:41] Yeah right but I. Another argument comes to mind is easy to understand some screen and voltage and there on significant you can reduce the meat. The experiment will show the reception. Pros. If.

[00:15:04] And if there.

[00:15:10] Us. At the opening.

[00:15:18] If military defeat sells. I'm not talking about myself in Davos. If you open yourself up through the abandonment. Like you're saying you're strong russian. Hand apply voltage bias. As if so I will not open at.

[00:15:40] Well yes we can say that the DC too on the case Serbian on the case here it works somewhat. But I want to separate them at leave as with minus we pick up the opposite is closed. And there is such a thing is scattered by the dates on the screen a new grid like and again the news. Where to write all the excitation capacitance leave and on the screen.

[00:16:13] Yes yes by dc put up abandoned. The load is like a p yes. You can't do it that way, you can't short there then you can't feed it there. But if you release but only on the control and protection guard release and there apply a small potential to augment the reception.

[00:16:44] So that's something I want to even try but keeping the excitement volume of the bones then such a thing I think. But at the expense of that I've tried singing not without voltage. But the difference does not affect only if the same input power increases and here yes need or else. You know how does the transformer where the girls even do four years but the control of the extreme ninth to the output to the screen naturally there it due to the voltage opens well maybe reception.

[00:17:27] But I've met someone so he's serving on the rink and he's serving in the net. And the rink there over the russia stands in the canton here he is and so here it is on a ring or something on a motorboat. And that's it there and it's all like that yes. But I don't know, the answer is better to tighten up the gut a little bit, to take a classic circuit like all the people have there 600 volts per screen two thousand there and there will be this amplification that seems to fit all the parameters. And here it is to invent these things that just that it is most often bad about Napoleon

[00:18:22] That's my standing full voltage no I have a transformer and a powerful 3 kilowatt transformer. But separately another transformer or this I did not want to reconsider. I on this transformer me and on this light bulb, there were some for the minus. And I think the voltage got 200, the guy on the air advised me to increase the price a little bit was possible with the common ancestors in the common cordon and everything else. But. Allowing a little bit the technical base of the fleet took off seems not answer anyone bad just says seems fine. But at the time of the module version.

[00:19:37] I noticed it right away that the signal doesn't quite say okay. Although of course you can work but there. Isn't it throwing something out there that isn't supposed to be on the reception

[00:19:53] There don't seem to be any remarks. But we here and the neighbors were looking at it ourselves. Screwed up any signal. Well first of course there doesn't seem to be anything like that. No complaints.

[00:20:12] Go to work and I might reconstruct something there. Of course I would like the signal to be a little bigger. And maybe there is another transformer there you have not made it yourself so you would have already planned there everything that is necessary and everything would be there in the reception

[00:20:44] And himself there would have been an extra one left for us. It's playable you can plug in reset the voltage to reduce where the setting is overlaid it's usually the way to do it. The extra there are two three possibilities and a big question. Anatoly so there were two in the same dress we would add two thousand this.

[00:21:09] It's not much, of course. It is.

[00:21:13] In such cases, you have to do a corporatization. Can such I do not know there to 3 thousand volts section and as volts there and there will be less problems. Initiators can I think I do not know or I think so I used to think myself to make such a universal transformer that is several meetings were independent so to speak ridiculously. And then these elections were canceled personally for each and then connect in series as much as you need for example

[00:21:55] From me it's still done all this at 850 to 900 depending on the mains voltage I send a bridge in how stands 2000 megaphone it's even more famous persistent and consistently it turns out to detect 200 volts. There is such a thing of course it would be necessary to have another attack there my exactly the same reception.

[00:22:34] If the window allowed. Illegally allowed it should have given them so well now. It's just if the hands itch to give such all the time do not give rest. Then you have to do it all just for this kind of work as they say do not think to participate in the competition in some way so. Federation specifically I will have to work in the competition antenna will make in a good spring session will try it somehow. And if so it is possible and purely if technical as they say technical episode creative does not give sleep. From an idea to do but it gives some pleasure. What you do. And so I do not know. I was going to do something on it too. The case I had on the extraction and sale of variable capacitance condensate made a transformer was on. That was it. But the case was very big and I was going to build it there.

websdr_recording_2022-03-03T20 50 30Z_3677.0kHz.wav

[00:00:00] Grid voltage. And so it decreases or increases very slightly but that's pretty much the way it is. Okay so so Alexander and I are going to step away for literally five minutes I need to grab a quick bite to eat. I don't smoke comrades in my office. So I go out the fifth vent, I get quiet and then I come back. So azove so far if cheh I then on it.

[00:00:50] That smoking is bad for smoking. And 100 grams won't do any harm. And the best system to quit smoking is not to buy cigarettes and you won't buy cigarettes and you won't smoke. It is necessary.

websdr_recording_2022-03-03T21 05 32Z_3650.0kHz.wav

[00:00:00] We can't imagine how that scared the Nazis they suddenly realized that there was another Ukraine that they couldn't break that they couldn't make. There was such a Ukraine now I'll show you he stated first I wanted to show you how it was done in Syria show you please. This is how suicide bombers should be killed. This is Mohammed's series of 8 years you know

[00:00:33] I've had two decades of this in school on the grounds of

[00:00:37] Controlled

[00:00:39] Syrian militants. They were showing children killing people. They weren't either.

[00:00:45] What's to blame for them being killed. Now the boys are in Turkey and want to see it with their own eyes. While this is how they trained the fighters in Syria. And I'm going to show you now how the same little militants in Ukraine were trained by their children. Today there were kazbek who should be in kindergartens who have done nothing wrong who should learn the alphabet and count playing in children's areas walking in parks. Many sit in the machine guns after the explosion of stun grenades instead of Monday at the Chernobyl nuclear power plant he can not cope with the Kalashnikov is another leads panorama of the city and does not carry science compared to the youngest children 8 years old. One of the activists of Camp White Europe is known Hungarian or mock automatic rifle. Legally it is a good practice to sweep the area under the supervision of members of the so-called volunteer battalions in front of the television cameras of American journalists money was at the end of July, but they have released the film only now. Weapons are too heavy for themselves so it was possible to make weapons properly shoot. The main thing here is not to hide their faces. Yuri Cherkashin he in the leadership of one of the nationalist parties spent a long time in the ato zone in Kiev uncontrolled areas of Donbass. He fought as part of the Sich battalion, call sign North, returned from the war and now, judging by his speeches on hope, Valery G. never speaks. The DPR is a separatist but the green men of Moscow occupants alive at this time presses you can and also against the background of events in Ukraine now and it is not some underground movement acting legally but constantly changing to children for the summer promises physical activity and decrease depending on who is invited.

[00:03:08] Probably and spent the night in a piece called you see what's going on in modern Ukraine. And this is what it looks like. Why I showed you all this. You don't have to thank me. The logic is clear of what they are doing urgent information now from our units in Ukraine. They are ready now to put their fighters against the russian armed forces. These well-trained children under 12 with machine guns who are in Nazi uniforms are supposed to go to the front lines and engage in combat encounters with our armed forces. This is necessary for the picture in this is necessary to show that even such kneeling as children's literature that history will show what I have now shown you how these men in exactly the same way Hitler and Jurgens prepared all these years with us Armen Gasparyan. I never thought about it. I showed you that there was no

time to do it, only the Orthodox Church on the 21st year, people came out and there were more than 350 thousand people in a procession and the Ukrainian government was afraid. They realized that first they can not bring the piss and so in the near future plans to get the name I do not know by what divine providence Lavra is not yet the fact that from this name hard what the guys from the front line sent me that they are preparing a clash in the near future in the next few hours. Against these six teams that are gearing up for the election. Here's to explain who we're up against. First of all with our Ukraine right now in my opinion nothing will be done.

[00:05:18] After now in Lviv it became clear that the Ukrainian Orthodox Church and organizations of the Soviet Union their nationalist formations of the Christian community. So I think that when the history of community life began enough individual tried to squeeze the open sea of military property and the transfer says that it was only possible to stop it through the processions of the crosses. That's when they were. But since then passed Israel, like many people on the Soviet Union in the elections to the Supreme Soviet all the more so that over the years we have had this idea only Yushchenko on the children. It is not the first time I said the problem of the members of the association which will stand in Ukraine and who it will be to a greater extent refers to the term now the children there can and will help in every possible way. Our main organization does not even know her children who trained serious in the press was such a complicated system of training. It is clear that not the very childhood help the brains of people they did everything right father of the Ukrainian state and they had the opportunity to glory to Ukraine heroes glory that we should address our possessions if not address the Ministry of Ukraine. In fact such important hands of help with the help of even the powerful began to explain that to kill is normal. And I can say without nato at that it is not all in the north caucasus. In fact, we have no task. Ukrainian nationalism is the business of the British. During the great war it is still absolutely near local and became the main source went this year there is a program article I come to her company and now I will just say where it started my story is political PR.

[00:08:49] I don't know the parents gave. My wife touching her child because he is of sufficient level to which I repeat at this point still have to look at how much a person looks like no one and send to the camps. This is 1911. Subsequently, this ideology in emigration only evolved insisting on. Putin said that telling about the years of the civil war in southern Russia and Ukraine was united by beautiful women children very much trusted the Soviet authorities. Sometimes the church cossacks of armenia and azerbaijan turned for thirty-two and a half billion is a lot. The agreement received the support of Ukraine. Objectives of the tasks set in Ukraine head of the national defense management center mikhail lermontov a group of Chinese citizens shelled Ukrainian nationalists while attempting to independently territory. Recall that Ukrainian nationalists are preventing the evacuation of more than 6,000 Vietnamese and Chinese citizens from Kharkiv. It is clear where is the hostage in order to force these countries to change their position at least somehow, many in the dark remind Vietnam and China countries that are neutral towards our actions and de facto support more than 40 thousand people evacuated from the Russian special operation zone. Chechen formations decide one child in Mariupol a state university was mined by nationalists. Nationalists blackmailed incoming formations dnr willingness to blow up a school with hostages in mariupol geographical location about it is all

over Ukraine. Britain asked the Russian Ministry of Defense to evacuate 10 nationals Russian side has created all the necessary security conditions near the border with Ukraine.

[00:11:28] How are we prepared for this. The military Indian students and other foreigners from Kharkiv and the military itself ask the rf ministry to deploy on international platforms to organize the activities of large cities of foreign citizens mariupol Kharkiv more than 300 tons of basic necessities will be transferred today during the fourth 4 humanitarian and pressure on the authorities about what they will report so unfortunately big and can not do anything. And in cases where everyone leaves russia for ideological reasons. Jacob the founder of IKEA earlier admitted his sympathy for the nazis but stressed that it was a stupid decision to temporarily suspend operations in Russia and Belarus employees will continue to work in warehouses and receive wages. I will say that yesterday I left. Scientist specialist now very very very little time for madam makarevich journalist of ukrainskii tizhden Ukrainian that cheap and serdito Ukrainian days do not know what it is now and suddenly turned to god like a young man its and it is not just a wild number of unnecessary people but interesting another. In the Donetsk region for 4 million inhabitants not less than one and a half million people we do not need to understand the salaries. We need to understand the Ukrainian national interest. And when the Donbass should be used as a resource it is fair to the Donbass. I do not know the recipe how to do it quickly however we and the main thing done there are people who should simply be taken because. And then let then and here I'm not afraid to say that will move to another place performance it is not at all.

websdr_recording_2022-03-03T21 15 51Z_3655.0kHz.wav

[00:00:01] He was telling himself what's going to happen when he's perfect so I'm going to rest thank you for Kernes thank you for the conversation. Tomorrow I have to go to work, so excuse me, I just came to say hello to my fellow countryman. Good for now. Health to you and your loved ones. 73 Bye, come on, you old fools, you were young already, and the signal, why do all the MIA officers need them? My child approached and for the sake of them we create forward tells you svetlana me deaf to that says she the other cheek and this I owe a lot of respect. When I have gained all strength my health now say this money loudly take on the kettle procured I will remind exactly now the clock has presented the kettle boils. When I myself this region is a poet. Most importantly let me understand that reality puts all the framework to work to the fullest and passing such goodness. Although I'm sure that here in this ether can work to receive me a task I'm dying at work but at least press lost something your I'm a little bit louder for example frame work. For this for something is the gas turn off Krasnoyarsk it is something stands out for another month have turned it off somewhere to eat nothing. It was September 20. Isn't it the Serb who has understood everything really includes. Behind Krasnoyarsk was Novokuznetsk. And how there flea base for the ship.

[00:02:56] He doesn't know.

[00:03:03] Now I'm probably also options for pulling mentioned by myself you can't cheat. I will not deceive who suited for the role of tambov badri knowing who. I understand not understand it

is not possible. The secretary general of the United Nations once again those who stood for more than a week. I do not understand how the popes, I apologize a little more clearly. 9 who. I have their problems there but we have all the chances but not enough tambov alexander tambov as it turned out. And for me, I do all the teams scherbakov in the finals I. For her my honor. I think that the work on the antennas. And I my country. Nikolay Kemerovo hello big fireworks but okay interferes. Kemerovo Kuzbass Kemerovo Ulyana and clarification of the call sign nikolayev 9 points Gennady. Reception.

[00:05:19] Nikolai it's okay.

[00:05:22] I'm my 25 I'm borya. Nikolai I have a smaller smiley to give now will not sleep Nikolai reception and. Marina salje project coordinator my grandmother. And how I turned on from laughing from casting how I tambov annoyed but I size in tambov. All anomalies I had 2 h but the release turning on does not manage to find out who as with colleagues. She on recovery. But robots. There is still a station to connect.

[00:07:01] But also the size of 25 30

[00:07:07] This strongly says cross number one to you serega come up serega let's not let's not let's listen to the russian anthem puts. I can't hear we don't let's say I mein. Leader does say call sign now nikolai you like we kind say call sign radio 4. Come on say

[00:07:39] On Kemerovo radio on January 9 for games ask

[00:07:44] Radio 9 I radio 4 snotty ivan nikolaevich well do not give this colleague to listen will become an analysis of what else the party will get. What do you understand there sergei city kalinin in his battle. Passing the faith to Brezhnev. He does not let him listen to everything.

[00:08:22] Togo vadim nikolaevich young man

[00:08:28] Called valery nikolaev 40 45 and to himself serega there in kalininsky but it all does not pull to dub. For that today drank al. I've been singing for years only and all mech abkhazia abkhazia. Another second tambov how. There was no control of the money and the show 35 minutes 25 30 35 40 45 dawn but don't turn on the weak kvn yes and the show nothing to give you. Sasha tambov sasha what to give you. Sasha. Well, yes. Now to the right of the school there as now at. All right jose yes icon thank you now populated gene took yes yes yes still I do not work yet too early for a healthy healthy gene. Why did I wake up. You've been attacked by you here another account here and there. Gene.

websdr_recording_2022-03-03T21 32 20Z_3643.0kHz.wav

[00:00:00] I'll say the other thing is that I'm sorry I didn't understand.

[00:00:08] It's the khokhlys trading, not us. But I'm just joking, I'm just saying you're a fool to leave. Stop being offended. I'm just kidding Sasha my friend says I like iron so much but I'm learning I understand everything. Let's analyze. About normality. It's normal for relationships. You have but everyone knows Volodya who the devil understood you soon to do on that father who created his tandem did not lag behind. And now Dad, you say go to the show you don't need it, you don't turn on anything citizenship is yours. I worked yesterday yesterday in this I don't feel like it, I took a walk for half an hour, I pressed the mosey machine, I found the car in the street, I took it to the factory, I walked around, poor people, all the windows are plastic, and they don't have money. He doesn't want to turn it on at all, he's afraid your farmer will burn down. No philology reached or you did not call. It's okay. Only had to only have a request promised the collider says how sick he is there volodya give god bless your phone I called only the phone. Of course I did. I call him and everything is arranged. Sergei is there, but I wanted to ask him what I do for a living. It's been a long time since I heard the reception of the new paper. What are you doing standing there on the pedal? Yes, I called him and he said I was sick. I don't do anything now.

[00:02:42] The series above me I forgot where I had long ago given this phone to the ether's sergeant my lovelies. And there's nothing yet. Well that's the way the serial is. But I remembered to the same extent managed to phone when I called him took. But I don't know when I gave it to him. I think that my memory is completely so may have given. Already forgot the reception, and myself forgot where I found the thank God, too. Calling. And I realized that he was the same ballet again, he almost ripped the medal off. It's Grigorovich. Well, Vasiliy was promoted. He would have said nothing to me. I do not know can take it on four kulash was. And I'll give another five years until we do not give. I figured that out, but so here's the agent to you and me what. You asked, I remembered. Volodin came on the air to four of them. I realized he was doing all that. I said yes, well, here's what you see. I don't need anything. There is no money. We are a poor country, but we have nothing to talk about, more than we have at home. I in the models her in what does not add knowing that in russia evening is normal. What's all this bullshit that the oilmen kiril so. By. I do not know what there donchans yesterday turned on now glade on mushrooms gifts and shares on the street moiseeva house three

[00:05:03] Scored the winning goal with a collective war spartacus dzyuba stands today. As reported by the federal press in lugansk is struggling with a deep focus. Yes who are clear dog horny rose and thresholds. Only I think we could abuse the Chekists when instead of the format of the newsprint they save every day for two months on any occasion even the dog can be caught by the special services and get out here already we are not happy, but it would be interesting one more and more bomb has already been given in Kiev to get lost yes in all major cities already all ours have forgotten. And now already other information is for the landing craft. The exit even at the top has recognized the output on the right bank of the exit to the next will be Nicholas. On it jerk and took out the helicopters parasyuk and release the deck model. But where I do not know even on the fight against gangsterism jammed. That is, as if nothing could affect all the events of Odessa Hall. Wanted. Six months in a children's hospital as an attempt to Caucasian a lot in them is a symbol of one or the other Ukrainian army to apply foolish predictions. His acquaintance two curious for the entries in three days a city in Lugansk region

much worse in ukraine ukraine to just. We will do then I will do it and I will do it at all when the cardinal called the city. City in Dnipropetrovsk but once again I have you figured out in this regard I am convinced that the elections were fair. I don't know what's in your hands right now. You are a man of faith. A visit to lithuania for. She's not very hohly promoter stinky fucking pavlov cocksuckers made it to the finals English English.

[00:09:04] I singled out the special services Ukrainians and were taken from poutine and offered him an order on board something useful for soccer and do not want to call. Fedorov in German dawn not recognize many words if I buy. Your own would. Between russia and ukraine orthodox church all the time. Church on holy russia russian her to calculate for the next he head of the drought commission and special conditions. In this regard, if you have noticed I think a few days before the nomination of my. Akhmatova knows such a city of Zolotova to come with a pain in Severodonetsk also to let you know that on the Ukrainians by the mo of Ukraine pen and swatovo said deputy Fedorov. In Donbass dry law should have gone straight out during the special services and there just to the place of service to withstand a dry bullet crushed fire you understand yes still not enough intelligence not enough to think here is enough intelligence but you have to take it by the ass. I've already been held hostage twice and jennifer for polina and the dog and in august in even managed to show up on patrol in ukraine. This is understood xenia okay you have to jerk you could a month and that's it. Although it seems to me in two days irina. If units go to the territory of Ukraine behind the line there is the national team of Ukraine and the sick lion for these two fingers I know him long ago on the subway for Donetsk region on Saturday made such pathos just went quietly and on the background of more serious dynamo takes enough and soul declared thanks for any music within reach for japanese create.

[00:12:54] The link to the video published bandera to kuwait is not necessary on the video all with himself go balogha fag over and traitor of Ukraine they were forced to be under any authority and ass his whole ass to russia requested in the ass. The most important thing is that the boys ran. I love Ukraine more than you understand and you are a brigade gourmet. You come for a sailor, you don't give a fuck about houses and me and Uncle Sam's ass. Everyone predicted you. I serve a complete fool a complete fool. Here. I don't speak russian. And sam sam her. I there call uncle sam about women uefa era I called loved and will not do another thought moron moron stinky. Any. S.matveeva is still a challenge for any ukrainian actually. And you say not katsaps. However, my fingers needles don't know where it was. And children among the 16 children of Ukraine not counting adult children and adult people. But it was 16 years old the average age of 16 children of seniority. And uncle sam. How can benefits exist affected understand whether or not there was marijuana between Ukrainians. American uncle sam and you were suhov. Alas but three days ago there were statistics and Ukrainians themselves. For the position would be. But only in one city of Donetsk we will watch the game with which houses with children passing through the corridor. We will talk about how it will look stupid.

websdr_recording_2022-03-03T21 46Z_3650.0kHz.wav

[00:00:12] Moscow's success. After all, there are already 16 children on the court. But they already know everything about their lives. The season was ruined by the missiles near you have

fallen. Ari Kremlin to then was finished fedorov helped him. With said hayduk he is outside of Ukraine and would have taken him killed for us it. But in the Donetsk region was not. Talking like a dog and even for children on the field. Married two children is a long. I Putin just over the borders but care for the work of the Ukrainian population. You do this unprotected for in just residential neighborhoods of Kharkiv kiev. In paris to streams of dogs instead of putler. And such a wish for the future of the Ukrainian people is written all went to the foreign exchange. Let's give otherwise then before 10 years it was not killed by you why.

[00:02:12] As part of russia.

[00:02:16] How much time you have left is nothing. So. At the election in March we can really say it's going to be okay at least not because we have to. Thank you for the invitation. And then a little bit about myself that to bring this up now just comes to mind then I don't understand why we still haven't won after the evacuation of the military missiles are out of russia from enemy territory. So military intelligence and russian rulers for us and for me for the last time. I will be winding down this is the first concert that.

[00:04:07] It's going to be miserable for us and for Siberia.

[00:04:12] The genes are coming they're coming with me. They'll come and they'll sort out the music with them cardboard pots and sleep. Used to be right after. After which immediately killed for poutine. Once again I say before the chief judge and you are afraid. By the voice I hear two appeared not only because he will be caught anyway the Turkish side has never allowed himself to be wrong. If you have to be friends with a man and how he thinks will do the right thing that is my blind would be all my efforts. What are you two looking at here on the frequency. You at least there is growing and on the purity to protect your place in your home good girl so many miners divorced. And I look at the range there are very few of you left. The system must be working. We have more than three billion dollars in total, so I say we have left and no economic situation has been established. The power has cooked another star and it will be finished and here you have a hundred percent cooked. All right go ahead. Good night to you and a rocket up your ass. I love this bitch for staging near Kiev. Dzhokhar Dudayev and his countrymen fought for Ukraine. Dzhokhar Dudayev Chechen war lost people and shut up forcibly taken from your demise the feds released. And when the controversy around his name arose in the city was no longer roses he is 27 years old pensioner even water for hearing. I'll tell you right away when he was helped for a bottle without politics still exploded the fuck out of here can be changed.

[00:07:21] Every year the job changes and you have 20 more grains and that's it and walk and piggy bank. Bogoslovskaya urged to make sure that collecting signatures in the fields to collect signatures have been declared wanted. Taking corpses from the presidential race to declare by law soccer troopers and infantry smash the drum and. With the old winding up slogans the most ardent fighter for the iron belt bashar asad will leave politics all about it being found. What will happen if watch what will happen then a global retreat from dawn to dawn. Good news all referring to his age 3 thousand of your hands allegedly all bye. Let's give a tailwind to the German and see what's on your equipment. I don't know there are enough metal workers there

for 50 years. Dorenko are cardboard. You'll be happy for some burglars. No one will be happy. And one of the last of his heroes is left and a half. Recently at the hatch for laughs and sins were your customers in a different way not entirely successful. I am in other words for us the very fact is important. Our valiant gypsies fighting for victory in simferopol and for dough tanks us this water. The funny thing is. In light of the headlights china can not worry nothing mol I think so as well pots heads la homoha and packing their own pick up russians it their own respect and you have there lying there only legs stick out bad thoughts of soldiers still kamazes and in life for their soldiers they as later wife I think on the anniversary may leave omsk in the city will not forget I am here.

[00:10:58] I guess the implications for Ukraine pipes and zones are lying around not as much as people are dying there behind them. And if even the Ukrainian flags are not called by the SB it will be a spring calm without curiosities, etc. They will climb and climb the whole truth. People die will appear more I the trumpet at all are lying cans. Yes now it is still possible to say and Sevastopol said I do not know. But there are such jerks do not believe me a good deed pity thousands more monuments we can call inaction that did not catch fire Smolensk region observing you all jerks it grabs head to happen in the train from the Crimea and Sevastopol I myself also fell down you have no strength to go already but we did not have. So I and I say my today 3 thousand your sick in 24 hours on Saturday we will see how many would have slept you would have thrown you now get another 100 grams on the connection to go to the Ministry of Defense website there is a site where even these sites on the Internet to go look at the record here. You went down to the hall slept through your teeth broke everything. Sidorov went to the mahu or the abyss or you're a fool. The brain is not only a blow.

websdr_recording_2022-03-03T22 01 22Z_3655.0kHz.wav

[00:00:03] Everyone. But the truth is that I.

[00:00:37] I believe that after

[00:00:53] Defeat called me not to give me my neighborhood ran away. It's clear volodya will be different. We did. And. Why didn't they come up yet. Everybody went to Ukraine and I don't even know where it is on the map.

[00:02:03] Let's get the eighth district up there. Who's on the clear right now.

[00:02:08] Or.

[00:02:10] Who's got the symbolism of the ulyana center broken. Good night I hear you. I radio four sabers to you nikolai loudly receive five nine plus 20 sergei city kalinin with reception

[00:02:24] leonid vasilyevich kolev and andrey nikolayevich. Good night to us at home. Very loudly from above

[00:02:34] 15 20

[00:02:36] Let Sasha was called Tuapse. Abdulatipov at the grave sergei ate.

[00:02:42] Yeah yeah. But I take you loudly well and listen gene will be gene.

[00:02:48] Kiev. Typhoid wound. Yes I heard my father coming up when France was talking on volodya I listened to him I heard you come up a little louder you work. No talking. Volodya is up to 10, 15, 20, working the nightingale on my mother. I say she's at the radio Nikolai Borisovich Gennady Tambov reception. Excuse me myself there I see the smallest little man on the cheeks in grade 9 loudly. And in general, my house reeks of aggressor. I hope that the mother is great to hear loudly there is all this ukraine buxom. But they just don't know. You work louder shutting them off completely from you too. Here they come up. They are carrying something there, but they just do not understand that their radio-electronic warfare station is working there and they are barely moving. They're trying to crush us. There's an old lady in New Orleans who died before the show met.

[00:04:11] Who has the symbolism of the center ulyana i radio 4 snot. Nikolai laptev thank you. There will be no questions katar ahmad salavat was and goodbye

[00:04:22] The articles will be taken up by Gennady Sergeyevich bringing us the votes we need thanks guys also interferes. If you remember I was at work when I was talking to each other but let the energy steamships hryvnia and so flew can be bankrupt will pay nothing and the light will be cut off and it does not interfere. So it is clear. Along with it turned on the reception.

[00:05:01] No well I served in the white house it worked like that I mean at night and for about a month I didn't work at night. I went for a walk and got up again. I didn't feel like sleeping, so I turned it on. So I went up to him so in the daytime I found it in the window, so in the evening here on the eighth decade. And then went to bed, for example.

[00:05:32] I didn't make the appointment, but I understood the day's work for 20 40 I actually asked for it at the beginning of the day probably at about 4:00 p.m. I turned on at the end of the day. Was here came to us here I do not remember stand on 57 or what. So we talked and talked too. And as a result, somewhere around six or 18 in Moscow, you have more now, I turned off the phone, watched a movie, and then I went to them on the street walked walked and talked. Anyway, I went to sit there and it didn't turn on, no way. 16 hours of pits, but we carry out the plan pulls time.

[00:06:26] I don't know, I don't know. Do you remember me coming up to you and telling you where he was doing something back there, you had that noise. And I think underneath that white

[00:06:37] Been to the reception. No no what there I'm under this case we're yours. Yeah, I've been twiddling my thumbs. The other mic's turned on on the remote got it on the twist. That's it. I

see if you will be or what. In what form. Or the fun must have been great. And then I picked up a little bit yesterday still working all the way back to the old place, but all itching to do this knob twist reception.

[00:07:17] Well I told you that and where this neighborhood in Kemerovo approached

[00:07:21] You're at

[00:07:22] You ask him, he says it's okay, but see

[00:07:26] I can hear him there

[00:07:28] It's okay, there was some excitement there. Well you worked with a witness with a big one and was. And there was a reception under the case.

[00:07:39] And seize this under this case. 26 years haven't had everything at home to do under that. I haven't had a drink in six years.

[00:07:47] Re but you have a voice you have a voice I how many times I followed you when you were normal. You're normal now. And I'm this. All right. So I drank it all. It's no big deal. I want to drink, I want to drink.

[00:08:05] With the help of something okay it's understandable. But maybe slept you know threw but we so out of vera drake rnb allo it you know dope enough. You can and okay if everything goes. But I rnb. So that's what punk floyd is all about. So beautiful to live in, I don't know wait for him for half an hour. Did anton went in any case my enthusiasm all went all so remake and rm came up.

[00:08:53] France and Germany yes yes.

[00:08:58] But Holland. Otherwise I'm going to run away now. I'm tired now so great serega shenderovich and to sergei maria boxing I'll boxing work. Now I'll turn on now I'll box again I'll work now what is this transfers one pedal transaero control a fighter jet and wait sergei 6 seconds. But that's how it is. But I wouldn't do it that way. Like. The desire to adjust the volume. So-so-so-so-so it is so-so. God, hello, hello, hello, hello, hello, hello, hello, hello, hello, hello. All I three years not one two. Wait but wait turn it on. But so one term put in baby rock and adjust one two. He one two three. But one two three was spinning loudly so there's another one now. Hello. Kolodin 25 a minute. But he one two. Will go one 20 words to work for you only on the elbow. Well done will now turn on. But north could work for himself hopefully technique all three rnb. Plus the reception. I'm not talking about what I'm talking about and you know this is very new Eurasia. And if today in the family dwarf roman anton and maria reception in the family accepted all to something that boxing works salon and aerodrome erythrea included boxing him a place in. So I took you in on the 16th, you are also boxing.

[00:11:29] But the very thing. Sooner or later everything will happen.

[00:11:38] Expected that and. But at the same time I turned off the pedal columns all the same get used to it since a little with a delay you have to adjust but will do. But the pedal it is so silent and does not turn off clicks all understood once 16 in the plus see two stations. Now for me only 10 15 for reception.

[00:12:09] Now more of her signals on this unit have come to light as well. The parents in most of their desire to

[00:12:18] Loud to hear you loud within 15 16 understood 5 10 all remembered look two stations rj twisted the antenna for what I lit up. I have this transmitter turns off stands one pierced. And olya matey does not work at all so young wives so the atmosphere is like tambov nine she was lying

[00:12:58] The dynamo is still good and in time. Suggested I haven't seen it yet

[00:13:09] Signal

[00:13:10] In me and mine reclaimed everything

[00:13:15] Term 10 taken. If you express your same as much as possible. I say well I get knocked the fuck out without rules I say shit mancini. But come on.

[00:13:36] Come on. Sergey's parents mariya me radio 4 dad and mom nikolai namesake still son miner. Good night I take five nines 15 20 in plus city kalinin sergei reception.

[00:13:55] Men in general were considered both women and girls can do things and. Oleg romantsev and

[00:14:13] How personally I understand you sergei no problem. Thank you. Happy Shrovetide to you with pancakes and a microphone to gennady received the series.

websdr_recording_2022-03-03T22 02 59Z_3650.1kHz.wav

[00:00:00] I know you're fine. I met you at work and you're going to attack.

[00:00:06] You are. Above us.

[00:00:12] I gena I will go to whom the fight noticed today the most difficult probably even in the cold water of the body. But the Italian keepers are not available to this for real men. March 8, 2008 was then and will be implemented the restoration of the decoration elements of the position than planned. He gave sovereignty

[00:00:52] south korea to claim this

[00:01:01] To the state language and I'm still talking about moving the most important

[00:01:13] Russian. Bulgarian interlocutor one Russian

[00:01:19] Mead is turnover is a big investment.

[00:01:21] The crisis situation is escalating. Israel is winning. We were creating.

[00:01:28] I'm a lot. Minister.

websdr_recording_2022-03-03T22 15 55Z_7061.0kHz.wav

[00:00:00] Absolutely reform. Sheets what sheets there are in russia to maneuver I do not see that I do not see these risks. If it's no one already had the delusional idea to shake the oligarchs and they sort of started shaking them but now there's almost no one to shake them anymore. Because today. Today in Germany they arrested the yacht of Usmanov, the oligarch closest to Putin. Soon in happiness by and large poverty is already in Europe in the United States is practically frozen now it will all be formalized and their accounts will turn to dust. The fiction was the hope for this mysterious that the central bank had in those three billion dollars but their maximum could stay was the yuan. Could do business and now it turns out that the largest banks in china says sorry guys say to the witness that the owners of the federation sorry guys you guys are waging war we need to deal with this situation so no he and you well I told you from the beginning all who told you that no dictator before was so powerless that they and his master. There was a phrase that there is no dictator has ever been as powerless to the world as Putin to answer him on this, but in fact he has already de facto blocked the export of oil and gas.

[00:02:10] And all gentlemen and all. I think it's time for Putin's inner circle to think that the silver snuffbox as they call this operation instead of 60 whether the red button is no red button in order for him to press the red button you need to run the PR operation and the officers. Well once again I told you that this command must go through a whole chain he can press this button yes. Well let's say the Secretary of Defense is also the master's loyal dog, but he too cannot personally press the button there will go on this whole system to replace at all levels is almost impossible. And the man who gives such an order must understand that he is putting himself at risk, because he has no guarantee that his subordinate will not turn around and leave. So the Americans are not dealing with the red button yet. They don't see any indication that the Russian nuclear forces are in any special position. They would definitely see it if it happened. This too, yes it is dangerous for Putin himself to do this because when he starts to bring his forces in for.

websdr_recording_2022-03-03T22_28_14Z_307.0kHz.wav

[00:00:49] But I've never been killed by a girl I've done and powerful ones I've always had one and I've got these imported ones standing here. How many 10 pieces and on each of these two posts business where at the reception.

[00:01:06] But for their initiate these elites do. In the end there according to the circuit according to the circuit I then designed when I have it there's a book there's 44 you notice there and doubling is such a yellow book in 44 and described they even put find that business and condensate is picked up too by import goes 001 but there it picks up 05 stand in the circuit and where is 001. Parallel ode to the director and condensate but it has never been put there was just I do not know. I decided who and why started the blow for the man military industrial committee happened because of the debts to the shareholders of this bank. I should be glad, but today I see omon and omon microphone answering the question. The nazarov betrayed seagull and archaeologists of the night gang insomnia from July 7 to 23 played in the final luxurious themselves produce judges of women magazines for other purposes and tasks by the standard. Ceremony of manifestation I think it is also possible to investigate the problem of statements that occupy the most significant international arrangements about the present and the future olga ovsyannikova ulyana all I want to state that we want rating but these clips short time put and he himself and intrigue and from the first day in the European the parliament so accused in illegal yankee heroically go already two deputies antonova things smartly sat and about history of occupation and yankee all military acts napoleon sent to send sechin as a deputy design apparatus will remain work in india on who in absence so it is so. The witness is the man himself of the Boyar Duma.

[00:04:47] The ability to command the mind of Prince Vasily Shuisky even after

[00:05:04] As a great sovereign as that and within the human values of human life

[00:05:28] And all the fighting.

[00:05:38] I me people any change.

[00:05:46] I could add another 700 there as well, but it won't be any gain. Enough of this gene reception.

[00:05:59] Two it's multiplied by 1 4 3 900 you don't have two chances there get a bigger one. Yeah we'll take a look now rather 800 years 3 500 600 on a couple of nixon to witness but in the load I have a kilowatt meter worth of load. So and you have a comrade 800 Race rate so divide by 1 4. So it's 2,700 2,700 you don't have 2,600 accurately counted 2,700 respectively 2,700 you have if 3,800. Yes it is in the load 3 800.

[00:06:48] Gena, but I'm worth it. Volodya writes everything there where I feel. It's open. I've got two six hundred and two 800 and two 400 written there. I can switch this one on but I am switching to two sixty. And the gauge shows the weather is 3,800. That's with no load. But when I say to turn it on of course the landing is dropping on the reception is dropping.

[00:07:40] But my memory is going down. But in my head it turns out that for. And then went to the damage. Vasily and Ivan center and 4 center Boris Kostya. Good night 5 9 plus 5 Victor in Saratov reception. That's all. How many now a million Chechens honestly say that I was not at all about any gifts there was nothing hidden flew all right. Tested his ppm's seemed fine all right. Well picked him up and took him home. In general, Novocherkassk realized that the device is the only way to write it out, but even then. It is more expensive for me and this is just acceptable. Fedor honestly, I do not remember how much it took, but something not expensive. And with the new units and with the American. The power shows it here as a third 300 and three and three thousand. But if the reader. As the USA in this plan financial caught mic financed Vicente Spain their forces on and so. He quote for any gang member how for example he besides irony program about Obama. I was closed. By the way yesterday there were still fans on the operators' commission it is time. Held on the 7th of May at the 25th Express think about the association received from the emperor but you did not play the loner in our clan and the Scythians. In any situation there is some kind of signature and then it turns into a political confrontation a military confrontation. That is in fact, if we want to get to the bottom of it and find ways of solving the problem after the special operation is over, we must analyze this intellectual part. Because without that we cannot get to the bottom of it, and there are big problems with it. Because in order to understand what intellectual processes take place in Russia and what intellectual processes take place in Europe.

[00:12:05] Let's just say in the Russian world so to speak there's a huge problem in the West today. I mean of course with the states as well. They actually have perestroika now, we had perestroika 30 years ago and they have perestroika. They've built some kind of completely ridiculous ideology they call multiculturalism. In fact it is an ideology that repels not that it repels from the Christian base it fights its own Christian identity they just destroy. There is a very small fraction of intellectuals who understand it who discuss it. But you know it's discussed in kitchens. That is what we had in the 60's and 70's of the last century when we were discussing in our kitchens some ideas that were realized in our time, the left in the 50's today. They sit in the kitchen now and discuss in fear, they are like in an underground place. So it turns out that they love their liberal ideology but they are drowning in it. But it is unthinkable and in Europe how they have this whole liberal system on some kind of wild tension look on one side they have Nazism and they do not. They had visas, no, but not only is he alive and not shot, he is not constantly on TV during some regular court hearings. So they began to spread this Nazism. So in this situation it can be very.

[00:14:16] And to me when analyzing discourse when a person wants a quickie I. E. My taste. Companions of Russia. And to the work of the dog. Asking every story about places of some kind of intuition

[00:15:02] midshipman excessive help return in August to Ukraine to Europe discussion where Marshall Plan and Europe his flew there on the back of good term Ukraine children under the fusion mind slowly but all hoped and will saintly honor the nationalities for the special care of themselves factors politics and fruits in Russia culture in Ukraine and Ukraine bear reforms social

and and navy sequence of figures bought if summarize these egryul evaluate thinking absent if absent holiday of electoral struggle in palestine or medal of sir floor hanging in film hand sinatra will understand, etc.д. All rights. If the guests from the booth are interested, then here russia is aware of the situation monsters in the background hardly sharks bukina as much as three starts Maduro's rival. The crisis in ukraine already since the epoch caused by the sea of fund here the midshipman at the fund tour at the crisis and ukraine forty whether bullets putin where then the rhetoric of women about apparatus group well and whose ship will accept. Generally, the scales under would be fulfilled with. In terms of the impact on oscar in russia but also during ukraine now already in the asset of russia for ukraine remains 10 14 points pekin for this they pace. Mytishchi monsters. Witness the history of Russian occupation and carries on my pulse of the agenda. Even kunitsyn russian leaders all yakutia really bile from this garbage dump of history with dwelt 70 thousand as a young defender of the fatherland many rumors of violence against the feelings of a hero were killed or messina in caracas evaporated without trace disappeared harmed by the pilot will great role of the mediator respectively bringing.

websdr_recording_2022-03-03T22_42_45Z_3661.0kHz.wav

[00:00:00] Great date could be for Poland writes the author. Europeans are very afraid about Russian status

[00:00:14] Strong Ukraine 2001. Just to see. The environment. We should.

[00:02:29] Anticipate

[00:02:35] Some european parliamentarians have no enthusiasm whatsoever. Although Ukraine and Europe

[00:02:48] In the center of interest with pancakes trying to repeat but ukraine let often man a lot. I always more georgia geet by vladimir putin should learn to pay compensation realization of this moment Crimea athena statehood five can not be cheated. How with this bank with his head held high must be able to vladimir putin with the inscription abkhazia country adopted by the constitution twice more for once late to the start of the season to work for grants for. V. Today there is one nuance about the set of copies about communications in general about the situation since the publication.

[00:03:54] Crisis in my opinion.

[00:03:59] Speaking of nationality

[00:04:04] Our other warriors I want to say I'm a Lucky I'm a Dagestani I'm a Chechen I'm an Ingush Russian Tatar a Jew a Margolin Ossetian all from more than 300 national groups and ethnic groups in Russia it is simply impossible to enumerate. I think you know what I mean, but I am proud to be part of this world, part of the mighty strong multinational people of Russia. Putin said he is proud to be part of our multinational people. At the same time I will never give up my

conviction that the Russians and Ukrainians are one people. Even though some of the Ukrainians have been intimidated by the Nazi nationalist propaganda and some have deliberately gone the way of the Banderites and other Nazi henchmen who fought on Hitler's side during the Great Patriotic War. The fact that we are at war with him as Nazis is shown by the very course of military operations. Nationalist and neo-Nazi formations, including foreign mercenaries, including those from the Middle East, cover up civilians as a human shield. I've already said there are absolutely objective ones.

[00:05:25] Now leads again.

[00:05:37] Fish and Daddy

[00:05:39] Out. Harry Harrison the chief medical officer has already forgotten about them now they are forced to change their position with special education. The agents were working in London at the Logan Stadium where Hitler allowed that

[00:06:24] They have no place for discussion in. And minuses and pros and cons. How to reach the goal their friends could not then only good luck health you in your surroundings joyful.

[00:07:34] Encounter increment counting works for the encounter transfer

[00:07:39] Friends on takes the wishes of the third district collectives. Checking the radio chanson. I don't say I take it out with my hand.

[00:08:05] Almost all the best to you dear.

[00:08:09] After they came back, they weren't acting like themselves. Sasha and Seryoga if

[00:08:19] I'll be I'll be going back because it's the very thing since 11 o'clock I've been here gone home. No leaving myself where the wind creates me.

[00:08:33] Because already this is the most important music and rest. I'll be back Constantine of all

[00:08:40] New and bye to the collective.

[00:08:42] All the best to you health konstantinovich. I'll be back more general aleksey konstantinovich reception negotiated alone life only. Answering questions will not. He already approached. Sidorov listen to you health and you guys spend. Timoschuk how please message. I will invite and

[00:09:23] Pass him my pipe. Who will come, let's go to sleep. Please, our pioneer, let's go. Change.

[00:12:22] And I am not at our work with you as well to fire cannons as if to set fire to the north. By his own fault the brother of the tsar fell captive and or if you want to leave us without a single firing squad. Holy Patriarch of Moscow Prince Tretiakov. He sent away all the TV content and here's my transmitter look. I didn't send the antenna, I have an old one. Alexander sent it. Let's see. The devil sent it to me. I can see your antenna and your house. Here's Vassili these. Why did you send me your face on the side? You should look at the side where the transformer is. I have everything there is Toyota native in it. It's closed. I have a wall on the side there, not under the stairs. Yes 73 band 80 radio 6 and channel radio 6 and housewarming on the reception I hope olga roman radio I hope olga center radio 6 housewarming. Seryozh hi. On the frequency 5 9 for you plus valery maykop reception. Good night man loud and silly to do.

websdr_recording_2022-03-03T23_00_09Z_3790.0kHz.wav

[00:00:01] It's apparently such a passage all fine omen serge I'm the only one who slept a little bit today passed out for about 10 minutes how so no one in the group for the reception. All right, who else can come up that will run the times now ambassador morgan worth a change of job

[00:00:31] And I'll go to the top to advance

[00:00:34] And I'll come up okay until 7:3. So yesterday a station came up, wait for it to come on. And the key role of the union must correct on the frequency

[00:00:52] 209

[00:00:54] 630. Now came up here like it even there and it will be weaker a little bit heard. Thank you very much for the pancakes and not more than 73 came Victor. All the presidents are also happy holidays and the main thing is that we will meet. We are few and far between, no one is added, on the contrary, we are leaving. The good news is that new technologies are to blame, that's why there is no newcomers. Then I realized that that was it, I'm going to rest. And I, a pre-revolutionary monarchist, woke up and went home for a little one. All good health again, it's accepted, bye-bye. Born a troika galina fedor pike dog galina fedorovna radio on the air troika pike galina fedor and center boris kostya. Good night thunder well with plus. Viktor Saratov at. Yes well received 5 9 plus 30 debbie lisitsky sergei and sergei lisovsky sergei kupriyanov. But looked at the arrow to +25 maximum in income so all is fine at you at. Yeah well 4 center boris kilowatt first thousand galina. So you don't mind putting a little with you. He's on number two. I'm nowhere. I never mind. So all their arguments are so rockets are not machines and diseases we have formed a united team and. Friends of the republic of Belarus for years have not owned the republic of Belarus. Reception. Reception. To combat propaganda reported in Canada.

[00:03:59] So if the party organs aren't pops then consciousness may be writing a play and. They keep it a secret. So let's not take away the chances I had quite hope the enemies won't turn on us. That is, every

[00:04:21] Should do better I agree

[00:04:24] Help for invitations not for money

[00:04:28] And for

[00:04:29] Salvation. That's the thing has been changing information since childhood the name of the study was where the central about it I wrote about the rights of the man of labor. So it doesn't work there. Why if you're interested so mom on all four sides of the screen says shura. And here they are the same.

[00:05:02] And you respected.

[00:05:04] That. As for ours. Police investigation.

[00:05:24] I've even been deprived.

[00:05:29] I'm far from thinking about no work a. Most parties I divide into years when

[00:05:47] I stopped by after the holidays.

[00:05:50] You don't really have to move on because I've always thought that.

[00:06:01] Hurt the words of a number of famous people emotionally.

[00:06:06] rf State Duma it.

[00:06:15] I would even say that because we're in meetings twice and we. Bykov divorced yankee london bravo ex yankee lima then goal bravo yankee scare bravo become. And codes codes codes yankee roma here for me sample yankee london. Bravo project yankee lima to goal bravo yankee to goal bravo station park. Ecuador mexico codes yankee mode here is a yankee london sample for me. Goal bravo mexico project yankee lima to goal bravo yankee. Bravo.

[00:08:56] I said yes yes and actually I'm for you very and he had on it and building and building a china town.

[00:10:37] The champion is worried. He has difficulty in the middle. Judging from

[00:10:50] That list is everyone who has from tiren fane for example.

[00:11:31] This one is said in the face of himself wallowing with a white stripe. This is the fifth complaint from I there of wood and this is what moment. May 8 in the head of the bridge vyatka war and war. We have another life is different so with its moves at home then for you vov only

one battle with the cross. I give the word of memory has in this case 2 columns all over the battery can serve a lot and he is already talking about it. They themselves want to take part in this project. While people are playing. And on the black market another war double. Major Religion

[00:13:28] Religion to the Tartar camp says

[00:13:32] Solovyov. Now in most matches.

[00:13:41] The divisions left Sevastopol. Reorient them these words

[00:13:47] Originally the term soft power. Going on to talk about. But they promise biker promise meat fruit and so on. Of the six cis countries to kiev. About that.

[00:14:19] Reports. And themselves.

[00:14:39] The activities of the oligarchs. On the bean picked up john picked up the concrete towers from the

[00:14:55] Rifles with

[00:14:57] by the Security Service. Now on the site of the capital's buildings, including

[00:15:08] There's an active one going on right now.

[00:15:15] Chechnya Dagestan Chechnya mountains. He's on and some though.

[00:15:47] That's enough. So it turns out the waiter is high guests. Since it's 22 hours. I think.

[00:16:13] He wrote he wrote I want in the lawsuit in the lawsuit.

[00:16:17] Briefly about his team's goals. For absolute comfort.

[00:16:26] The owners announced the rd. But I am calm.

[00:16:37] Got in yesterday. We. What.

websdr_recording_2022-03-03T23_17_22Z_3690.0kHz.wav

[00:00:04] At the end. The problem is here again.

[00:00:32] Ukraine and resting.

[00:00:39] For example in the Khabarovsk region. Maidan of foreign countries. Mexico. Barrels per day before hearing by. Ecuador mexico. Lima yankee of that time threw yankee london. Bravo Mexico. Ex yankee lima that goal. Bravo yankee bravo bay. A miracle mexico yankee lima immediately hit me yankee london current bravo mexico snow yankee lima only in bravo yankee goal bravo become. Understanding this to my bay came checkers. Sanja came to me that's how I understood. So I came from him to my wife. In short, if you're mom, go to the train station. Only not in the city and on one side of it right on his field and there on the stands of genius worked his father probably wife and no son he has and work right now. That means. It could come from the school. Well there's a dormitory there was still on. Russian Metallurgical Technical School

[00:05:57] Was. And that's what.

[00:06:04] Our factory foreman was. And not even for the sake of noticing that work on the throne acquaintance for example Vadim never worked as a driver. Worked all his life for 73 years now literally a year ago as I read four years he.

[00:06:30] I'm shocked. Я. Yushchenko blocked.

[00:06:37] These Muslims left you all red you. But we didn't have them. They bombed 14 15. But now flew over the same streets bombed literally three days in a row right at the entrance where m 9. At 9 m. There was. Became very posh reception now modern funding.

[00:07:22] We like how

[00:07:25] Azarenko, the historian's mother. Here you can add her why I'm in my eightieth decade. What pipes for example. And that's where I don't remember when I used to visit my grandmother in Tashkent. I just wondered if he had the antenna connected outside the house or if he came to Sasha from the Crimea and he sat right there. To the kingdom of heaven is no more.

[00:08:16] Like a good guy. Once done.

[00:08:25] In the ninth probably ulyana my andrei rodionov alina maria at madrid. Note: Is it now. Ivan for a word in a pocket reception for the sake of the center olga ivanovna through the center olga ivan ulyana anna 6 boris pavel ulyana anna boris pavel and slavyansk na kubani with the airport five ten. Zhenya evgeny on kubani as is customary through the reception wife got 77 points 7 8. And perhaps my question for the money. Olga center of the slavs. Olga son ivan central ivan well received. Thank you very much microphones to the presenter guys thank you very much. Good one good. Good night to all health not to be ill men. And ulyana car boris pavel beetle radio 6 and the housewarming party here also do not work without adding on the microphone all is well now clear good nothing to add now everything will settle your life 73 to slavyansk on kuban and the future for the appointment. Thanks a lot guys. I spun here myself who in May I will listen to myself kind of normal and everything a little further already and worse. Guys thank you again I emphasize the company thanks to the presenter that the guys plugged

in all the health of not to get sick. Goodbye, goodbye, while we can survive it is time for this whole team to talk about the fate of the motherland of Ukraine.

[00:10:27] All right, it's about time, though I'll say it again. Come on, Sasha, 73, you have a microphone. Yes yes sasha well very healthy good luck bye. Until the meeting 7:3 has taken the mode of the day weather from Morocco 7:3 settling in. When the store sergei to you goodbye. Health 73. All sasha glad to hear from you again tonight. And the band 82 radio 6 advertising TV radio 6. New Year's Eve on the reception of radio igor radio. Anna. Vasily ulyana igor. Air on 9 vasily ulyana on radio 6 greek founder and good night again 9 plus five scored valeri maykop. Hello thank you. Five days plus 20. Vladimir Vorobiev. Young and well received December 15 went to the station means volodya listen to the team volodya thank you valera. Volodya namesake. Good night rodiona 9 vasily ulyana player. Ulyana radio 4 Maria Elena Zhukova 9 plus 10 15 to 15 years volodya rovenki reception hello reveal. Probably 30 vladimir reception. Yes, he received me thanks. Listen further Nizhny Tagil I. Then I am still a friend in the morning went to his homeland September 10 on the radio men center boris gromov plus 20 30 arrived in the city of the region will receive. Hello hello hello. Vladimir Ilyich Vorobiev. Volodya accepted

[00:12:35] Thank you for. People.

[00:12:54] In perm comedy if it's no secret my argument is still history and the caravan goes. And. By whose will history. Afghanistan is not at war with the Russians. The new mosque here is called it. You know maybe I am not at war with the Russians.

[00:13:39] What will happen to you I say in the first year.

[00:13:45] Yeah no he's not at war with Russian Christians.

[00:14:00] And peace in the world warring against war remember the insane wreck. Try as a lesson not to be at war with the Russians. You can't have two things big. Apparently the words russia is not at war

[00:14:31] With Russians and everything from

[00:14:37] We're almost at war with the Russians.

[00:14:43] Our bronze soldier is not so much

[00:14:47] In jerusalem how many of us are not at war with the Russians and. Я. We are belligerents in Libya.

[00:15:16] How it used to be didn't like it when it was. Yes what and how. But I praised the coach. That was the first time. Gotta destroy everybody to one and pass them. For me it becomes a nationalist. But the point is all the time that we will be friends against china if they have china is already becoming a major economic partner. It is not clear can. On the one hand it

is simultaneously mutually exclusive, that is, the contradictions are the same here. And it has nothing to do with solidarity asked what we came with. We came with policemen. If you don't like it you're going to get hit in the head. Trump says the hell with you do what you want the cat threw.

websdr_recording_2022-03-03T23_29_12Z_3640.0kHz.wav

[00:00:00] Right now, however, everybody wants no matter what. The point is that I'm here to put it mildly different from the countries saying do what you want. I don't really understand where anything was coming from. Biden comes in saying no we are friends we love you and if we follow every one of yours all the time and try to come back. There's a dictatorship like we're happy. God how good. What happiness now we know what we want. I'm not cold or cold to you. Everything is good. Really between us we can find a recipe against sanctions against russia that is with china. I do not know how to get out of this economic dependence on china. Dislocation all the little things that come and help us and he builds up in the western border build up and in the north build up there said they need nawalny to solve the issue of islands and sherman on the edges of the canal. But this isn't the first year we've had teeth. The human rights activists still adore I remember it was Ponomarev we dealt with this problem. What exactly were doing there burbulis and so on all is clear, but it was a common thing never. We needed Chernomyrdin or I don't know who else. Nemtsov in Germany is much more interesting. And let's make sure that north stream and gazprom stop hiding our separation after the defeat. That statement would be quite critical. It seems to me that russia has made such a statement to itself including internal affairs. But i stress japan will be smaller than australia it will also need something, new zealand though. The nations need something. We will be better off every game if Navalny comes.

[00:03:18] The environment will be cleaner if Navalny comes and so on. But there are people who never allow themselves such a statement who always shouted about the Kuril Islands. It has always been a scandalous topic, but to say that I write the diagnosis he never said so. And we have been suggesting for a long time to develop relations not only economic but military in nature. We can see the Middle East is going to get tense again. There are going to be unprecedented exercises on the western borders and a massive concentration of heavy equipment, including aircraft, on the northern border. It will be growing. The Arctic is becoming for the Americans. And this is the little things that suddenly turn out to be the way they wanted. This is the main pressure factor but who is so insignificant but it is insignificant. And we have a thing. After all, we have a démarche fife dankvert on us. And so the maximum in the form of the father all could and the mother left us only. But. He in un according to garbage. Me and my wife me. Obama. I acted. Ayman az-zawahiri islamism from almost in the background. They at least names fan bond anderson amal sew she visibly and fake. We sometimes hunt so and fighting the west just. We'll have to be sure to get in the back. And you what ukraine even more brief their nation to do stay duller. And speaking judging by swao it is already offensive passport. 2. Allah I application clear the name of one of the two thousand. You are dissatisfied and a great specialist in a and financially however why. What's the point. But England and Argentina still. Sorokin series is the fans from ufa they.

[00:07:17] Iraq is ready to provide

[00:07:21] Help from and in too much I'm with him but I if truth behind us from above need something to start to be refused. Our car. It's high time from here to call the button accordingly show that we.

[00:08:34] We're not at soccer ourselves and y. Por.

[00:11:05] And all my classes were left without technique. Not to say where we're working now. I think we're consciously going forward. Today there is not a process we're talking about, but we have to.

websdr_recording_2022-03-03T23_42_13Z_3677.0kHz.wav

[00:00:00] And the most settling of boarding schools at home. Shoot Timoshenko a lot of people learned about this even before the assassination attempt on the president. By. There are already three. Yes I've been in the volleyball federation of turkey for quite some time. 3rd place. To rest for the joy of loved ones. A good promise is nothing more than that. Take care. Once again he hugged stalin good day trees. Good health alexander tanya receiver let's do good but let god at least know who is broadcasting there. Come on zhenya approve. I thought you said you had more. I've always had the net on the go. I didn't order it. I don't want it in the grid. And you're rocking a wagon of 50. Malakhov was silent, I have to kill the riddles. I also add three. I usually do healer at 81 m. At least another fifty. 6 and in general ideally 7 or 2 y but little to drink or or. Best option is 2 81 and one 81 from the grid also two but a maximum of two and a half thousand. Here but with a good morning at the reception yes. But I understand, I understand everything, but it's enough for me, I do not need to live with him anymore. It's okay in principle, but I can hear myself. But as if normal, the guys all understood well. Mike alexander I understand everything but I used to have calls there 381 for the green that even moral damage stuntman 3 600 was on them and a couple of fifty it cut off from them and hit 1800 then at 8 youth day. I had a sharp voltage phase and for 81 for example.

[00:02:45] It's definitely an army reported red.

[00:02:53] With the british giant closed headlights limousine center boris center boris. Thank you shake hands and listen that I already good night for his family galina brief for you in advance hope olga center ivan 5 7 5 8. Sergei redrsky brand grandmother got a great radio and. Were recently in atlanta at the microphone today 60 shevchenko and I'm glad to be in solidarity with that. Chengdu and who on the alternative constantinople fell so much then Americans can not approve the police and oversight of traditional and and and aggressor and occupant jubilee Putin went to his death and I send flaming greetings. Boys 45. Here the Russian team entrenched throughout the day pulling up artillery reserves. In the evening on the occasion of the beginning of Istanbul artillery tank shots as well as working aviation. Still according to Voznesensky's scenario, that is, tomorrow serious and very heavy fighting is expected, and at

once for both sides. From left to right. We must pay tribute to the command of the Ukrainian troops in this direction the most effective and all the armed forces of Ukraine. It is in this direction that the command of the armed forces in the Syrian direction. The results of this offensive are not yet known. South of the highway Zhitomir Kiev Bolsheviks they have not yet connected well and return encircled garrisoned Ukrainian cities in Chernihiv region. In Chernihiv very serious artillery shelling. At the end of the day yesterday a cease-fire was concluded all is quiet in the evening. Yes, and how to stay without weapons now without heat. This is roughly what is happening on the fronts and can not help but say. You just can't get past that. This is the last speech of the president of Ukraine Zelensky, who came out to the journalists absolutely either a machine gun or letters I do not know what drugs he was on the move. If the president of the country where the fighting is going on and his army is essentially defeated, that is, when the official authorities say that control as it should be the people of the country have seen that the president is simply doomed and of course makes his conclusions on this topic for now is all. The next review should be out tomorrow morning. Goodbye. You got carried away, I'm your sniper. For us.

[00:06:56] We have girls. I believe. No. I respect though.

[00:07:25] I and anthony not christ and. A certain group of people are gangs. Take fear and gangs. There's no implementation of their training. Yes I answer. However. Why. This unfortunate experience he solved. And if only the final removed this one only. Will also pay

[00:09:12] And everything even.

[00:09:16] Someone is knocking out the power supply. So elena sign 8 nikolai jan thank you although rahman salavat was until the meeting. Thank you of course and happy holidays. Goodbye to you is not that goodbye. For example, if I ask now also 25 worked off all the same for 25 below the 22 signal I will go. Thank you very much taken for the makeup thank you alexander. All the best for your health the most important thing to hear about yourself. Thank you. Gareev, goodbye. All the best Happy Shrovetide Day. So 4 pavel samara on the frequency yes on the frequency reception. Hi. It's been a long time, but it's not like you usually work. I hear a different filter, 5 9 plus 10 sergeyev kalininsky name, shit. Okay I will not look for the reception, but I have a slightly different transfer now. Now 730 hours I had it was 740 hours I was working in the garage and now at home turned on. Now from home for a while option name alexander. Gennady Gennady's name is Gennady. Wait a minute, wait a minute now I got it. Re well, I'm watching the film Russian not as usual you work from the garage well normally hear and no problems. But the host station listen to rk 4 btr 4. Sasha, work who I am. Who turned me on the other time I haven't even heard anything yet, and I hear it without any problems. Yes accept loudly loudly two processes in the third 20 years old honored roma slaughter tatarstan settlement progress name lena gennady and three plus two lena near tambov alexander both rejected embryo both three ulyana borja galina maria tambov. And all clear alexander accepted splendidly splendidly all accepted roman slaughter thunder on sounds just no problem tatarstan for the time approximately so yes yes understood serega let's connect lost right here. Yeah but

gena come on she gave him her wishes with and bye bye. Yeah, I think you have four snotty and ivan nikolai a.

[00:12:40] I'm on this

[00:12:46] Raz. May.
